(2 August 1960)

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been establish-

traffic information and radar vectors to avoid observed traffic. Consequently,

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route" published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas
   a. No additional operational restriction, control or communication requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operated within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Basic Mark X equipped military flights operating within radar advisory areas will adjust transponders to operate on Mode 3. Unless otherwise instructed by air traffic control, Mark X SIF equipped flights will adjust transponder to Mode 3, Code 62, except that ADC flights will adjust transponder to Mode 3, Code 00. Those military flights operating on a mode other than Mode 3 will adjust transponder to operate on Mode 3 and the assigned mode simultaneously. Civil turbojet transponders will be adjusted to reply on Mode A, Code **40**. Other civil aircraft will adjust transponder to reply on Mode A, Code 62.
   b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.
   c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas
   The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.
   a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.
   b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF/ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR VORTAC Jet Route #1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR VORTAC Jet Route #2 (Houston, Texas to Lake Charles, La.) Houston, Texas to New Orleans, La.)
3. VOR VORTAC Jet Route #3 (Oakland, Calif., to Spokane, Wash.)
4. VOR VORTAC Jet Route #4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR VORTAC Jet Route #6 Tulsa, Okla., to New York, N.Y.)
6. VOR VORTAC Jet Route #12 (Baltimore, Md., to Pittsburgh, Pa.)
7.
8. VOR VORTAC Jet Route #16 (Portland, Ore., to Pullman, Mich.; Buffalo, N.Y., to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont. to Int. of J16V with Category "A" radar flight advisory area of J90V SW of Billings, Mont. Eff. 28 July 60.
9. VOR VORTAC Jet Route #19(Omaha, Nebr., to Int. J19V with J64V). Eff. 28 July 60.
10. VOR VORTAC Jet Route #21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
11. VOR VORTAC Jet Route #22 Lake Charles, La., to intersection with J55V).
12. VOR VORTAC Jet Route #24 (Phoenix, Ariz., to Albuquerque, N.M.)
13. VOR VORTAC Jet Route #25 (Dallas, Tex., to Tulsa, Okla.)
14. VOR VORTAC Jet Route #26 (Amarillo, Tex., to Appleton, Ohio.)
15. VOR VORTAC Jet Route #29 (Houston, Tex., to Memphis, Tenn and Dayton, Ohio to Cleveland, Ohio.)
16. VOR VORTAC Jet Route #31 (Dallas, Tex., to Chicago, Ill.)
17. VOR VORTAC Jet Route #33(Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
18. VOR VORTAC Jet Route #34 (Cleveland, Ohio to Pittsburgh, Pa.)
19. VOR VORTAC Jet Route #35 (New Orleans, La., to St. Louis, Mo.)
20. VOR VORTAC Jet Route #37 (New Orleans, La., to Spartanburg, S.C.)
21. VOR VORTAC Jet Route #41 (Miami, Fla. VOR to St. Petersburg, Fla. VOR.)
22. VOR VORTAC Jet Route #41 (Kansas City, Mo., to Omaha, Nebr.) Eff. 28 July 60.
23. VOR VORTAC Jet Route #42 (Dallas, Tex., to New York, N.Y.
24. VOR VORTAC Jet Route #43 (Atlanta, Ga., to Waterville, Ohio.) Eff. 13 Aug. 60.
25. VOR VORTAC Jet Route #45 (Alma, Ga., to St. Louis, Mo.)
26. VOR VORTAC Jet Route #49 (Alma, Ga., to Spartanburg, S.C.)
27. VOR VORTAC Jet Route #52 Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR, Greenwood, Miss., VOR, Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala., extension to J52V.
28. VOR VORTAC Jet Route #53 (Miami, Fla., to the Int. of J53V and J81V; Spartanburg, S.C., to Pittsburgh, Pa.)
29. VOR VORTAC Jet Route #55 (From the intersection with J22V to Kenton, Del.)
30. VOR VORTAC Jet Route #58 (San Francisco, Calif., to New Orleans, La.) Non-radar advisory area from 20 nmi W of Pioche, Nev., VOR to 90 nmi SE of Alamosa, Colo., VOR.)
31. VOR VORTAC Jet Route #60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.
32. VOR VORTAC Jet Route #62 (Idlewild, N.Y., to Nantucket VOR.)
33. VOR VORTAC Jet Route #64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
34. VOR VORTAC Jet Route #67 (Idlewild, N.Y., to U.S.-Canadian Border.)
35. VOR VORTAC Jet Route #69 (Spartanburg, S.C., to Gordonsville, Va.)

(Continued)

36. VOR/VORTAC Jet Route #71 (Appleton, Ohio to Front Royal, Va.)
37. VOR VORTAC Jet Route #75 (Miami, Fla., to U.S.-Canadian Border)
38. VOR/VORTAC Jet Route #77 (Miami, Fla., to U.S. Canadian Border)
39. VOR/VORTAC Jet Route #78 (Los Angeles, Calif., to New York, N.Y.)
40. VOR/VORTAC Jet Route #79 (Miami, Fla., to Idlewild, N.Y.)
41. VOR/VORTAC Jet Route #80 (Denver, Colo., to New York, N.Y.) Nonradar advisory area that portion of JR-80 from 120 nmi ESE of Denver, Colo., VOR to 25 nmi W of Hill City, Kansas VOR.
42. VOR/VORTAC Jet Route #81 (The intersection of J81V and J53V to Barracuda Int.)
43. VOR/VORTAC Jet Route #82 (Chicago, Ill., to Boston, Mass.)
44. VOR VORTAC Jet Route #84 (Oakland, Calif., to the U.S. Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
45. VOR/VORTAC Jet Route #85 (Miami, Fla., to the U.S.-Canadian Border.)
46. VOR VORTAC Jet Route #87 (Houston, Tex., to Northbrook, Ill.)
47. VOR/VORTAC Jet Route #89 (Northbrook, Ill., to Miami, Fla.)
48. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)
49. VOR/VORTAC Jet Route #90 (Seattle, Wash., to Chicago, Ill.)
50. VOR/VORTAC Jet Route #95 (Idlewild, N.Y., to U.S.-Canadian Border) Eff. 28 July 60.

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Port Allen rbn.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct. radial to the Victoria (Patricia Bay). B.C., Canada RR.
20. Wolbach, Nebraska VOR; direct to Pawnee City, Nebraska VOR.
21. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass.
22. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
    b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
23. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
    Baltimore, Md., Terminal Area--
    a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
    b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
24. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
    b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
    c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
    d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
    e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
25. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
    b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
    c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 264° M radial; to Int. of Palmdale, Calif., 264° M radial and J-1-V.
    d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
    e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
26. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
    b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
    c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.
27. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.
28. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S.C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S.C., VOR.

(Continued)

29. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:

38. From the Egmont Key, Fla., NDB via Control Area Extension 1226 to the Grand Isle, La. NDB.

29. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

30. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

31. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

32. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

33. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

34. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

35. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.

36. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).

37. From the St. Petersburg, Fla., VOR to the Int. of the St. Petersburg, Fla., VOR 274° M radial with Control Area Extension 1226.

(Continued)

38. From the Egmont Key, Fla., NDB via Control Area Extension 1226 to the Grand Isle, La, NDB.
39. From the Grand Isle, La., NDB via direct to the New Orleans, La., VOR.
40. From the Int. of J85-V and J41-V direct to the Egmont Key, Fla, NDB.
41. Green Federal Airway #1(From the Int. of G1 with U.S.-Canadian Border W of Millinocket, Me., to Int. of G1 with U.S.-Canadian Border NE of Millinocket, Me.)
42. Within 100 nmi radius of Guam rdo rng and 20 nmi either side of a rhumb line route as indicated below:
1. Honolulu/Guam
2. Guam/Wake
3. Guam/Manila

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

FREQUENCY CHANGE - 126.18 MC to 126.20 MC: FAA will change all existing 126,18 mc frequency assignments to 126.20 mc during the month of July 1960. The individual locations affected will be NOTAMED as the changes are accomplished. The military services have advised their commands to make the change not later than July 1, 1960.

VOR/DMET or TACAN EQUIPPED AIRCRAFT: The FAA has implemented new procedures and separation standards for the control of VOR/DMET or TACAN equipped aircraft. In order that ATC can apply these standards, pilots of aircraft so equipped are requested to include the statement "TACAN (or DMET) Equipped" in the remarks section of their flight plan.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight nformation Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

SPECIAL NOTICE

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC TAC)

SPECIAL NOTICE

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is 14 August 1960:

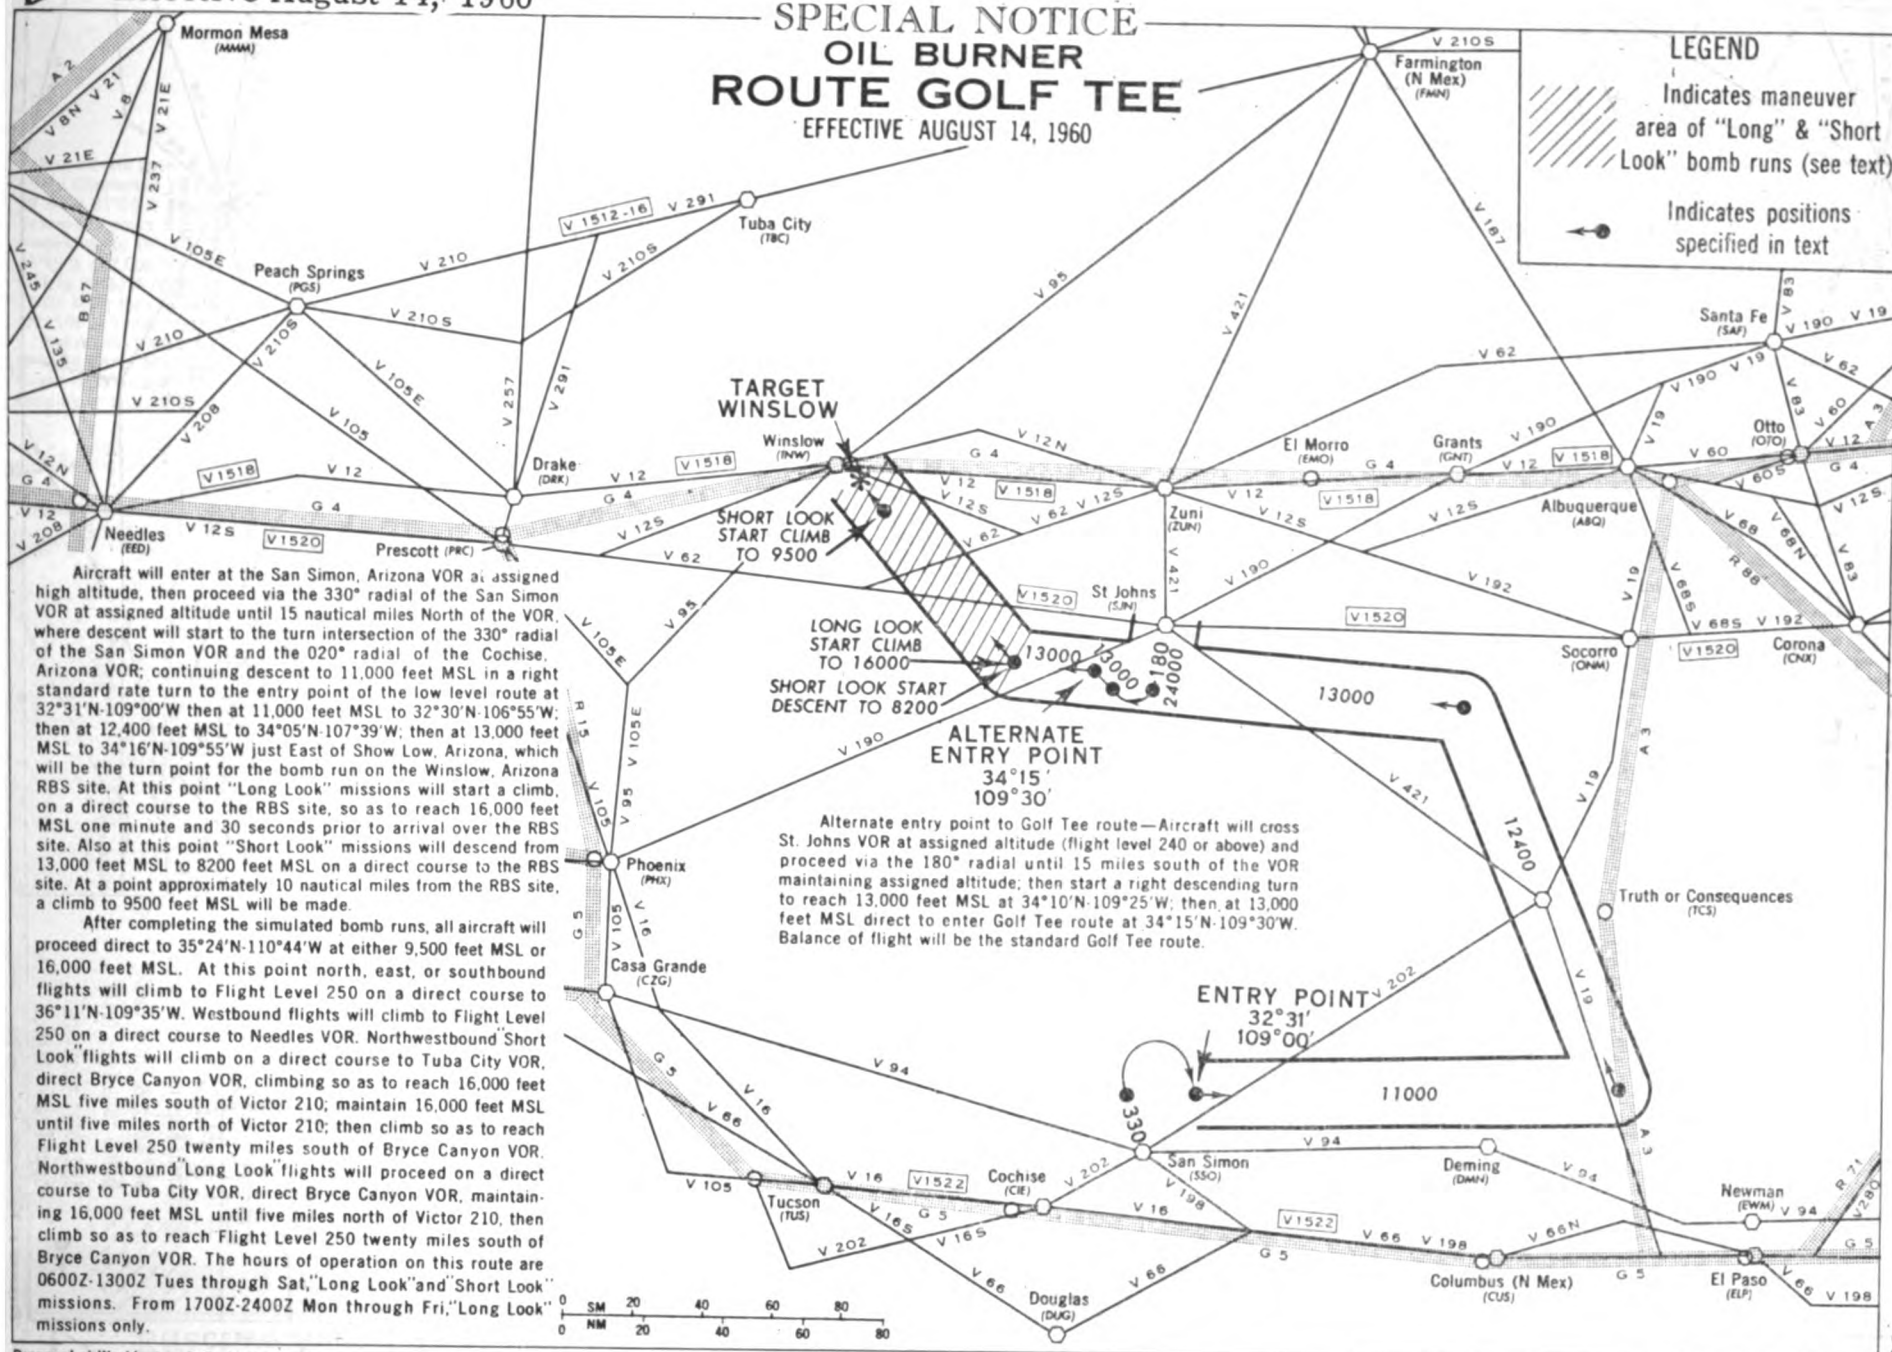
SECOND ANNUAL GENERAL AVIATION FLY-IN: All pilots are invited to attend the second annual general aviation "fly in" to be held October 1, 1960 at the Federal Aviation Agency's National Aviation Facilities Experimental Center at Atlantic City, New Jersey."



SKY SHIELD EXERCISE: Effective September 10, 1960 between 0600Z and 1200Z a large scale air defense exercise to be known as SKY SHIELD will be conducted regardless of weather. The exercise will encompass the entire North American Continent North of the Mexican Border. The Administrator of FAA has determined that in the interest of safety, non-participating aircraft should not operate in the continental U.S. and Alaska during the exercise period. Pilots must plan their flights so as to be on the ground or outside the exercise area by 0600Z giving consideration to possible delay factors such as weather, departure delays, etc. During the early phase of the exercise, participating aircraft will be operating at all altitudes out to approximately 600 nmi from the coastline. Aircraft bound for the continental U.S. including Alaska will not be issued an Air Traffic Control clearance to approach closer than 150 miles to the Coast prior to 1200Z since flight in the offshore area will be hazardous during the entire exercise period.

NAVIGATIONAL WARNING-USAF OPERATION "OIL BURNER". USAF (Strategic Air Command) is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during times specified for each route.

(2 August 1960).

Effective August 14, 1960

SPECIAL NOTICE
OIL BURNER
ROUTE GOLF TEE
EFFECTIVE AUGUST 14, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Cochise, Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W; then at 12,400 feet MSL to 34°05'N-107°39'W; then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs, all aircraft will proceed direct to 35°24'N-110°44'W at either 9,500 feet MSL or 16,000 feet MSL. At this point north, east, or southbound flights will climb to Flight Level 250 on a direct course to 36°11'N-109°35'W. Westbound flights will climb to Flight Level 250 on a direct course to Needles VOR. Northwestbound "Short Look" flights will climb on a direct course to Tuba City VOR, direct Bryce Canyon VOR, climbing so as to reach 16,000 feet MSL five miles south of Victor 210; maintain 16,000 feet MSL until five miles north of Victor 210; then climb so as to reach Flight Level 250 twenty miles south of Bryce Canyon VOR. Northwestbound "Long Look" flights will proceed on a direct course to Tuba City VOR, direct Bryce Canyon VOR, maintaining 16,000 feet MSL until five miles north of Victor 210, then climb so as to reach Flight Level 250 twenty miles south of Bryce Canyon VOR. The hours of operation on this route are 0600Z-1300Z Tues through Sat, "Long Look" and "Short Look" missions. From 1700Z-2400Z Mon through Fri, "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10'N-109°25'W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W. Balance of flight will be the standard Golf Tee route.

SPECIAL NOTICE

OIL BURNER

ROUTE TAR PAIL

EFFECTIVE AUGUST 14, 1960

Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to enter Victor Airway 94 west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Tucumcari, New Mexico, VOR 279° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W; thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27'N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 071° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial; "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N 102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516, thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

TARGET 38°02' 103°30'

SHORT LOOK START CLIMB TO 8000

LONG LOOK START CLIMB TO 23000

ENTRY POINT CARLSBAD VOR

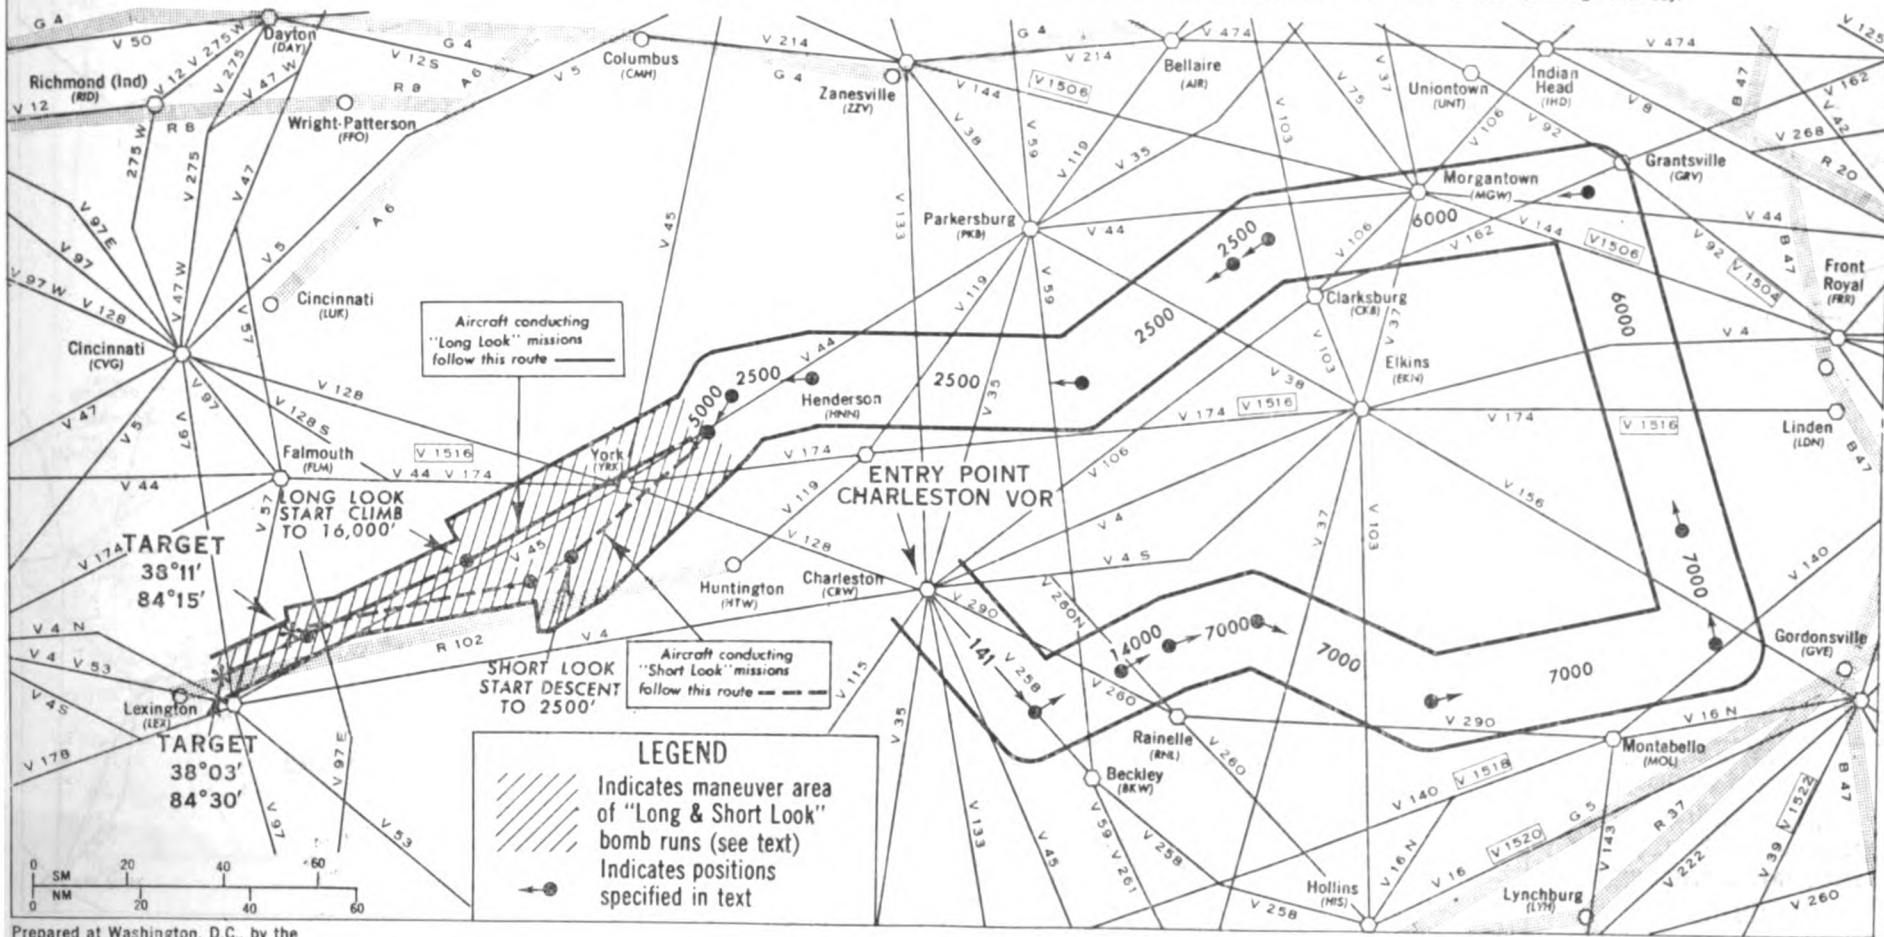
SPECIAL NOTICE

OIL BURNER

ROUTE GREEN VALLEY



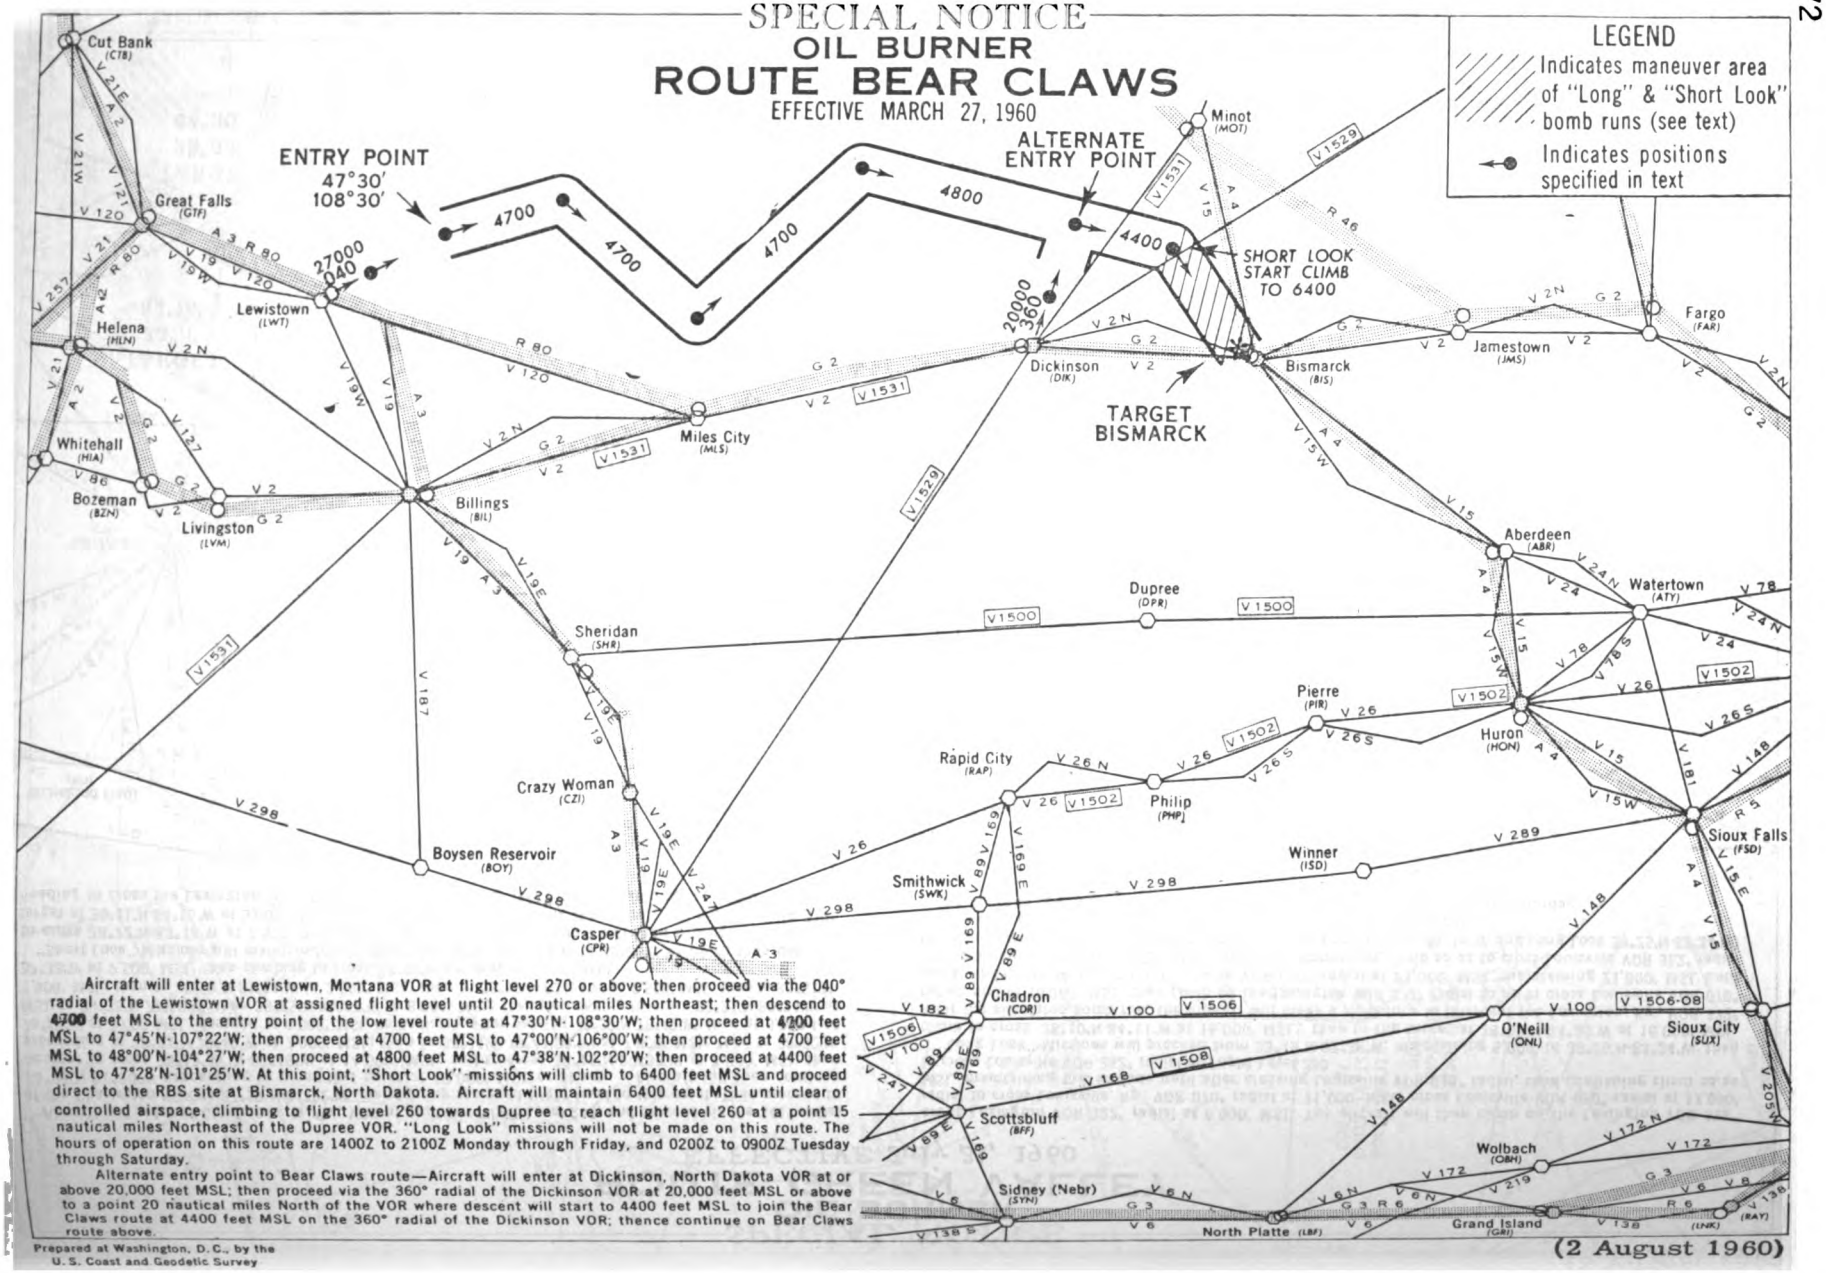
EFFECTIVE July 31, 1960

Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240; and proceed via the 141° radial of the Charleston VOR to 37°59'N-81°22'W, maintaining assigned flight level to this point. Then proceed to 38°08'N-81°00'W descending to cross this point at 19,000' MSL or above. Aircraft will then continue descent to cross 38°12'30"N-80°49'W at 14,000' MSL; and to cross 38°16'N-80°30'W at 7,000' MSL; then proceeding to 38°01'N-79°49'W at 7,000' MSL; then to 38°11'N-78°41'30"W at 7,000' MSL; then to 38°32'N-78°49'W at 7,000 MSL; descend to 6,000' MSL immediately after passing 38°32'N-78°49'W; then at 6,000 feet MSL to 39°33'N-79°10'W; then 39°25'N-80°27'W at 6,000' MSL; then descending to cross 39°21'N-80°34'W at 2,500' MSL; then to 38°59'N-81°11'W at 2,500' MSL; then to 38°59'N-82°14'W at 2,500' MSL; then to 38°51'N-82°33'W at 2,500' MSL; then climbing to cross 38°49'N-82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N-82°38'W to 38°26'N-83°09'W; then descend to cross 38°22'N-83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N-84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL; then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL; cross Louisville VOR 050° radial at 17,000' MSL, maintaining this altitude until after crossing Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 280.

"Long Look" Missions will proceed from 38°49'N-82°38'W; maintaining 5,000' to 38°25'N-83°34'W; then climb to cross 38°10'N-84°11'W at 16,000' MSL; then to the target at 38°03'N-84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 322° radial, still at 16,000' MSL; then climb on the Lexington VOR 322° radial so as to cross Louisville VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL; maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310. At end of navigation points (Short Look 38°22'N-83°18'W, and Long Look 38°25'N-83°34'W) route widths reduced from 20 statute miles to 10 statute miles to target.

The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday.



Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(2 August 1960)

SPECIAL NOTICE

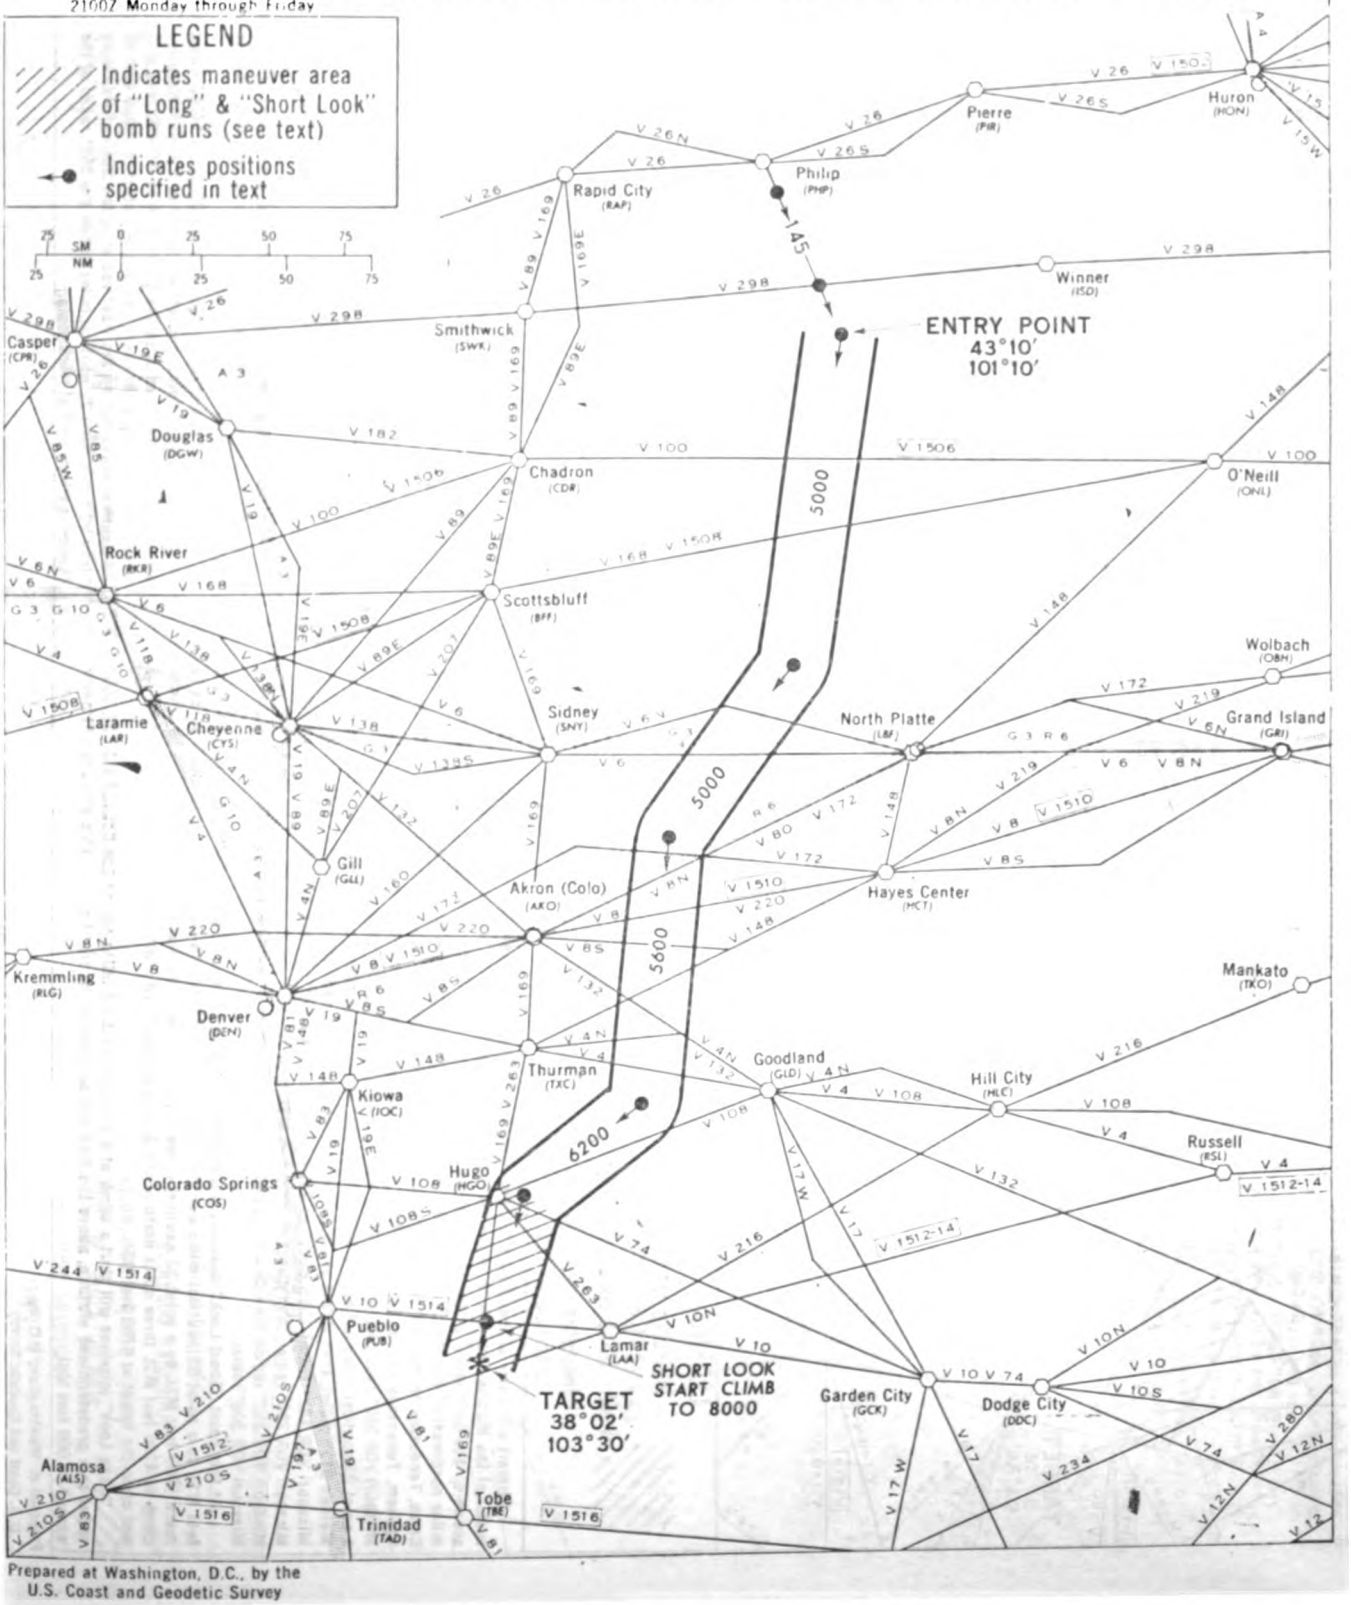
OIL BURNER
ROUTE BEAR CLAWS

EFFECTIVE MARCH 27, 1960

Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N-101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

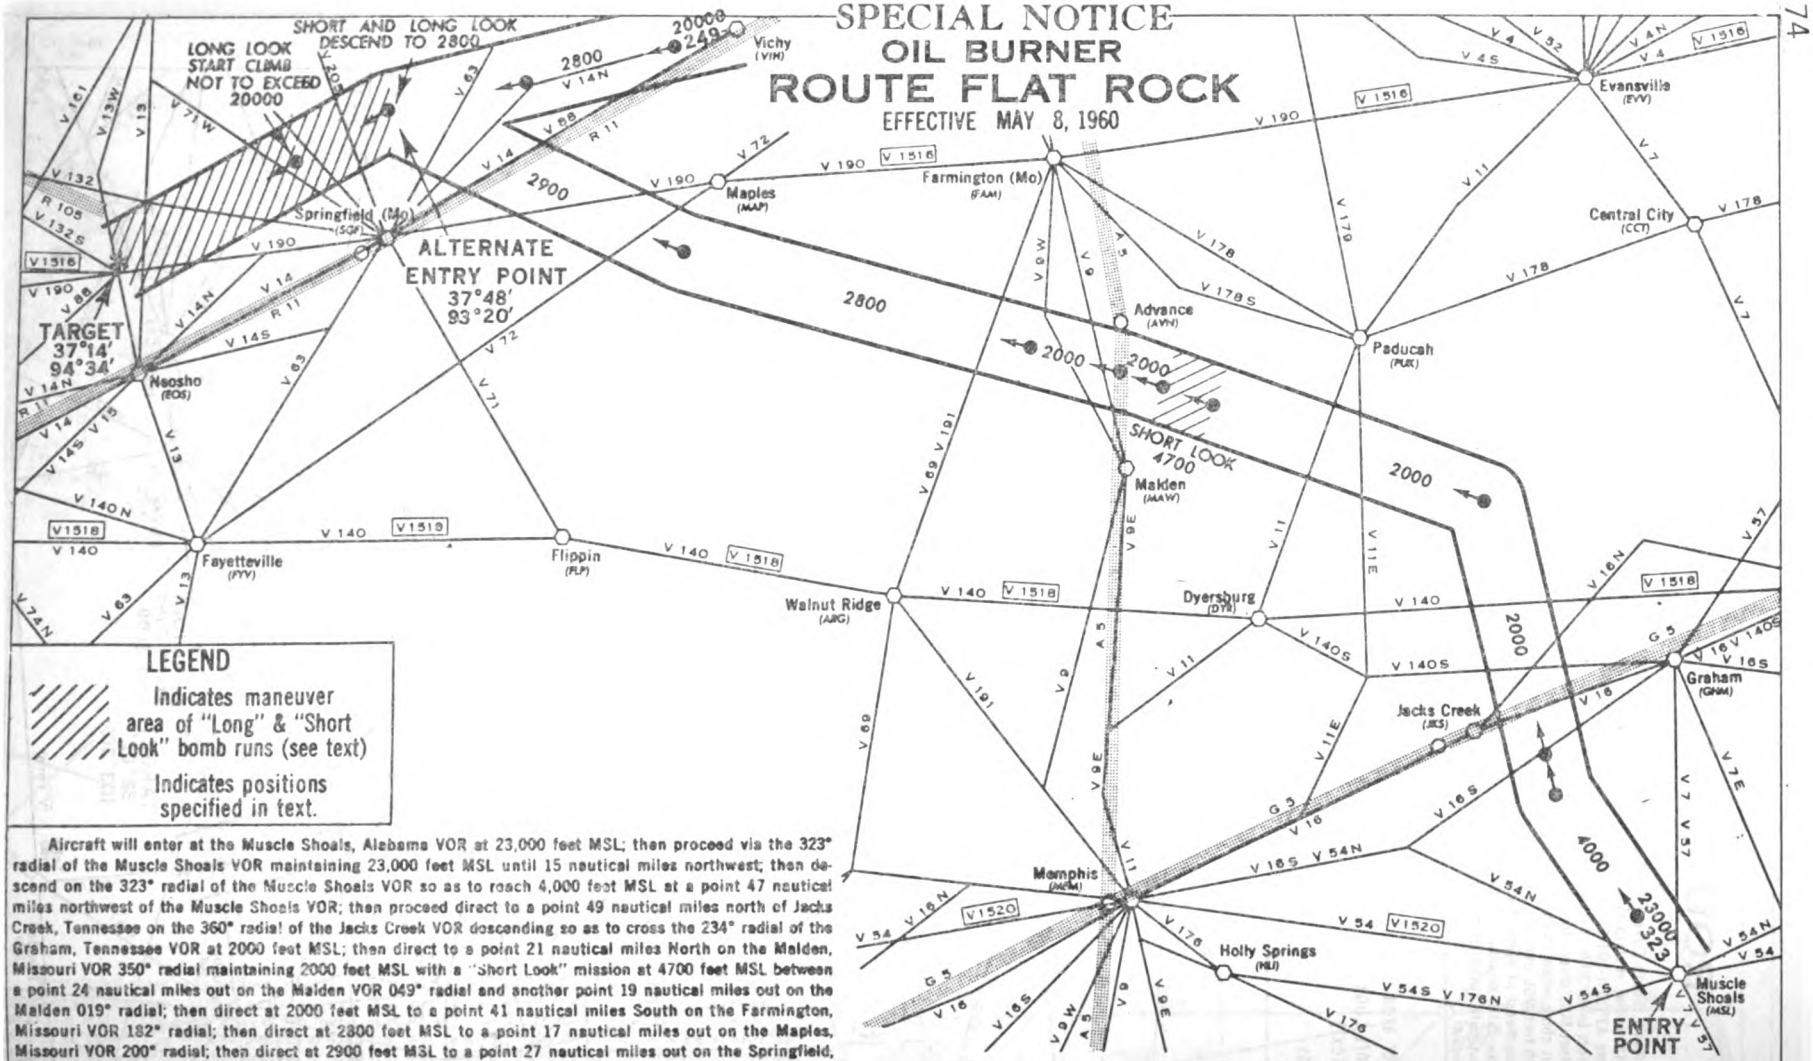
Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey



(2 August 1960)

SPECIAL NOTICE

OIL BURNER
ROUTE ROUGH WOOD
EFFECTIVE JUNE 19, 1960



Aircraft will enter at Philip, South Dakota, VOR at assigned altitude/flight level (between 20,000 feet MSL and flight level 250), then proceed via the Philip VOR 145° radial, maintaining assigned altitude until 10 nautical miles southeast of the Philip VOR where descent will start to 5,000 feet MSL, crossing 43°26'N 101°20'W at or below 13,000 feet MSL, proceeding direct to low level entry point at 43°10'N 101°10'W, then at 5,000 feet MSL direct to 41°30'N 101°30'W, then at 5,000 feet MSL direct to 40°40'N 102°20'W, then at 5,600 feet MSL direct to 39°19'N-102°29'W, then at 6,200 feet MSL direct to 38°52'N 103°13'W, then at 6,000 feet MSL direct to the La Junta, Colorado, RBS site at 38°02'N-103°30'W, aircraft will start climb when crossing the Lamar, Colorado VOR 252° radial and reach 8,000 feet MSL when crossing the Lamar VOR 247° radial, maintain 8,000 feet MSL over the La Junta, Colorado RBS Site, turn left to a direct course to Walsh, Colorado, maintain 8,000 feet until five nautical miles southeast of Victor Airway 169, then climb on a direct course to Walsh, Colorado so as to reach 23,000 feet MSL five miles north of Victor Airway 1516, maintain 23,000 feet MSL direct to Dalhart, Texas, VOR.

"Short Look" missions only authorized over this route. Hours of operation are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

SPECIAL NOTICE
OIL BURNER
ROUTE FLAT ROCK
EFFECTIVE MAY 8, 1960

Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 49 nautical miles north of Jacks Creek, Tennessee on the 360° radial of the Jacks Creek VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°14′N-94°34′W, maintaining 2800 feet MSL to a point 38 nautical miles out on the Neosho, Missouri VOR 013° radial, then climb so as to reach 3500 feet MSL by a point 32 nautical miles out on the Neosho, Missouri VOR 004° radial, to start a climb to 4700 feet MSL three miles north of the Joplin, Missouri low frequency beacon (Waco intersection) and cross the target at 4700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48′30″N-93°20′W thence continue on Flat Rock route.

(2 August 1960)

LEGEND
SPECIAL NOTICE

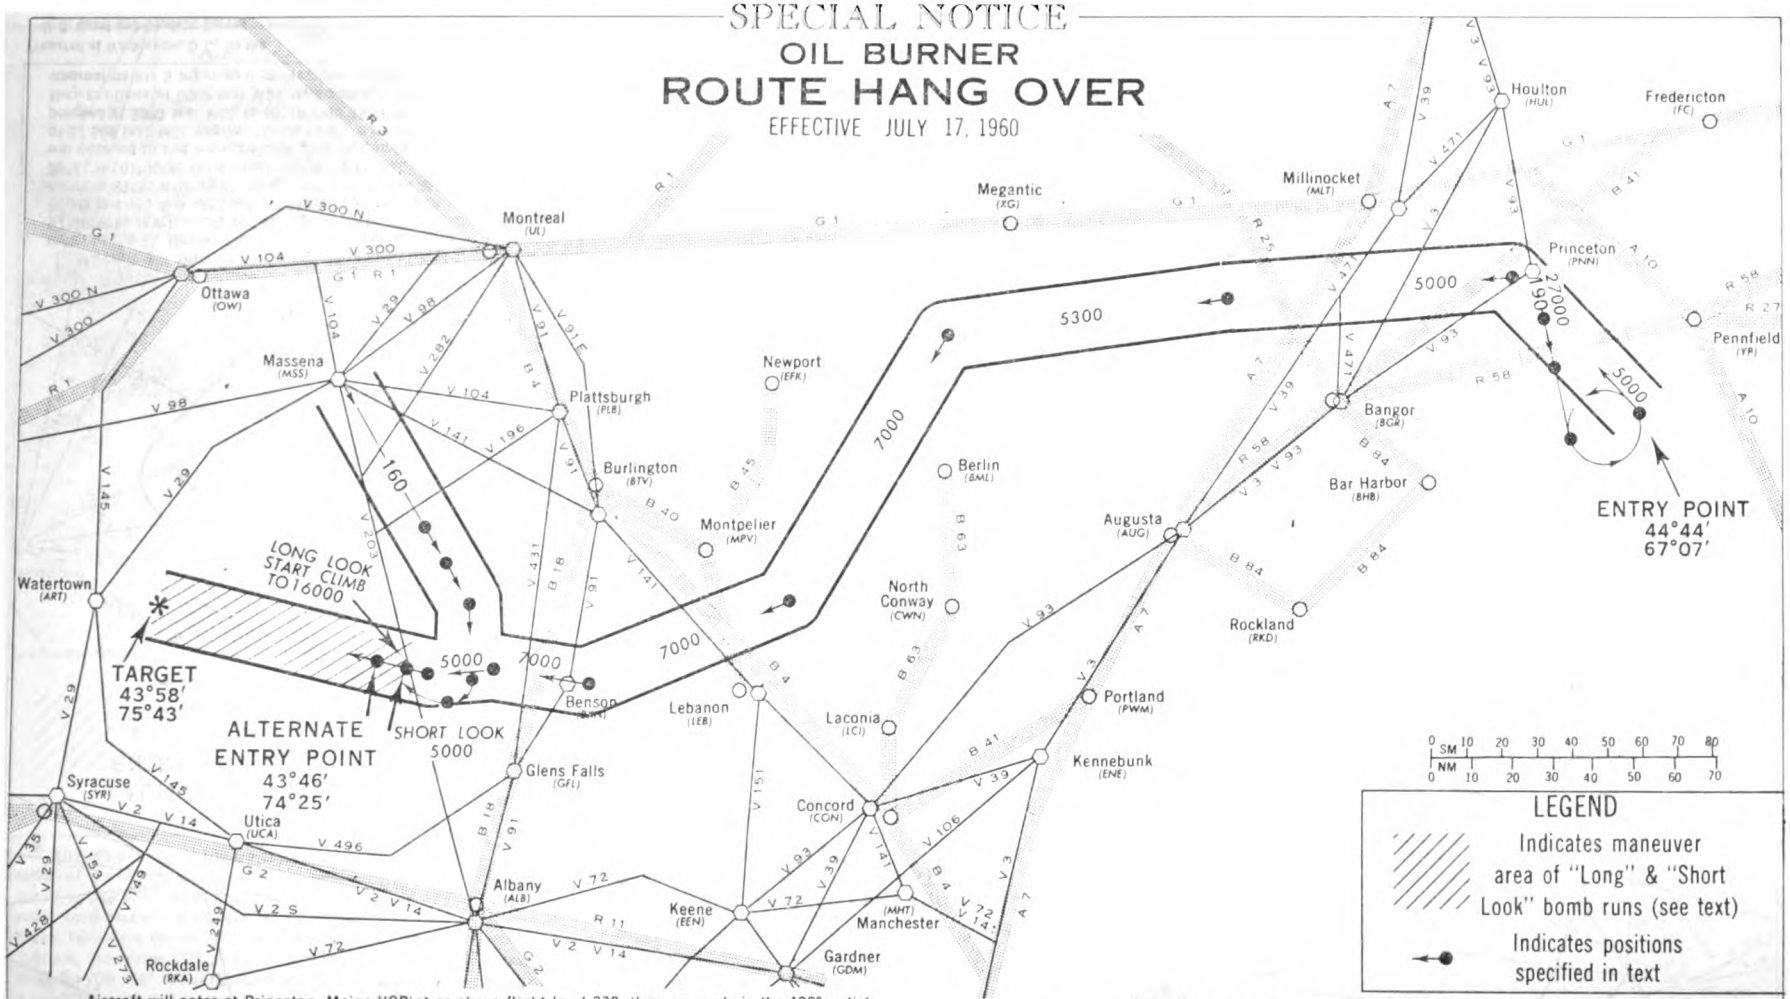
SPECIAL NOTICE

OIL BURNER
ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.



Prepared at Washington, D.C., by the
U.S. Coast and Geodetic Survey

(2 August 1960)

SPECIAL NOTICE

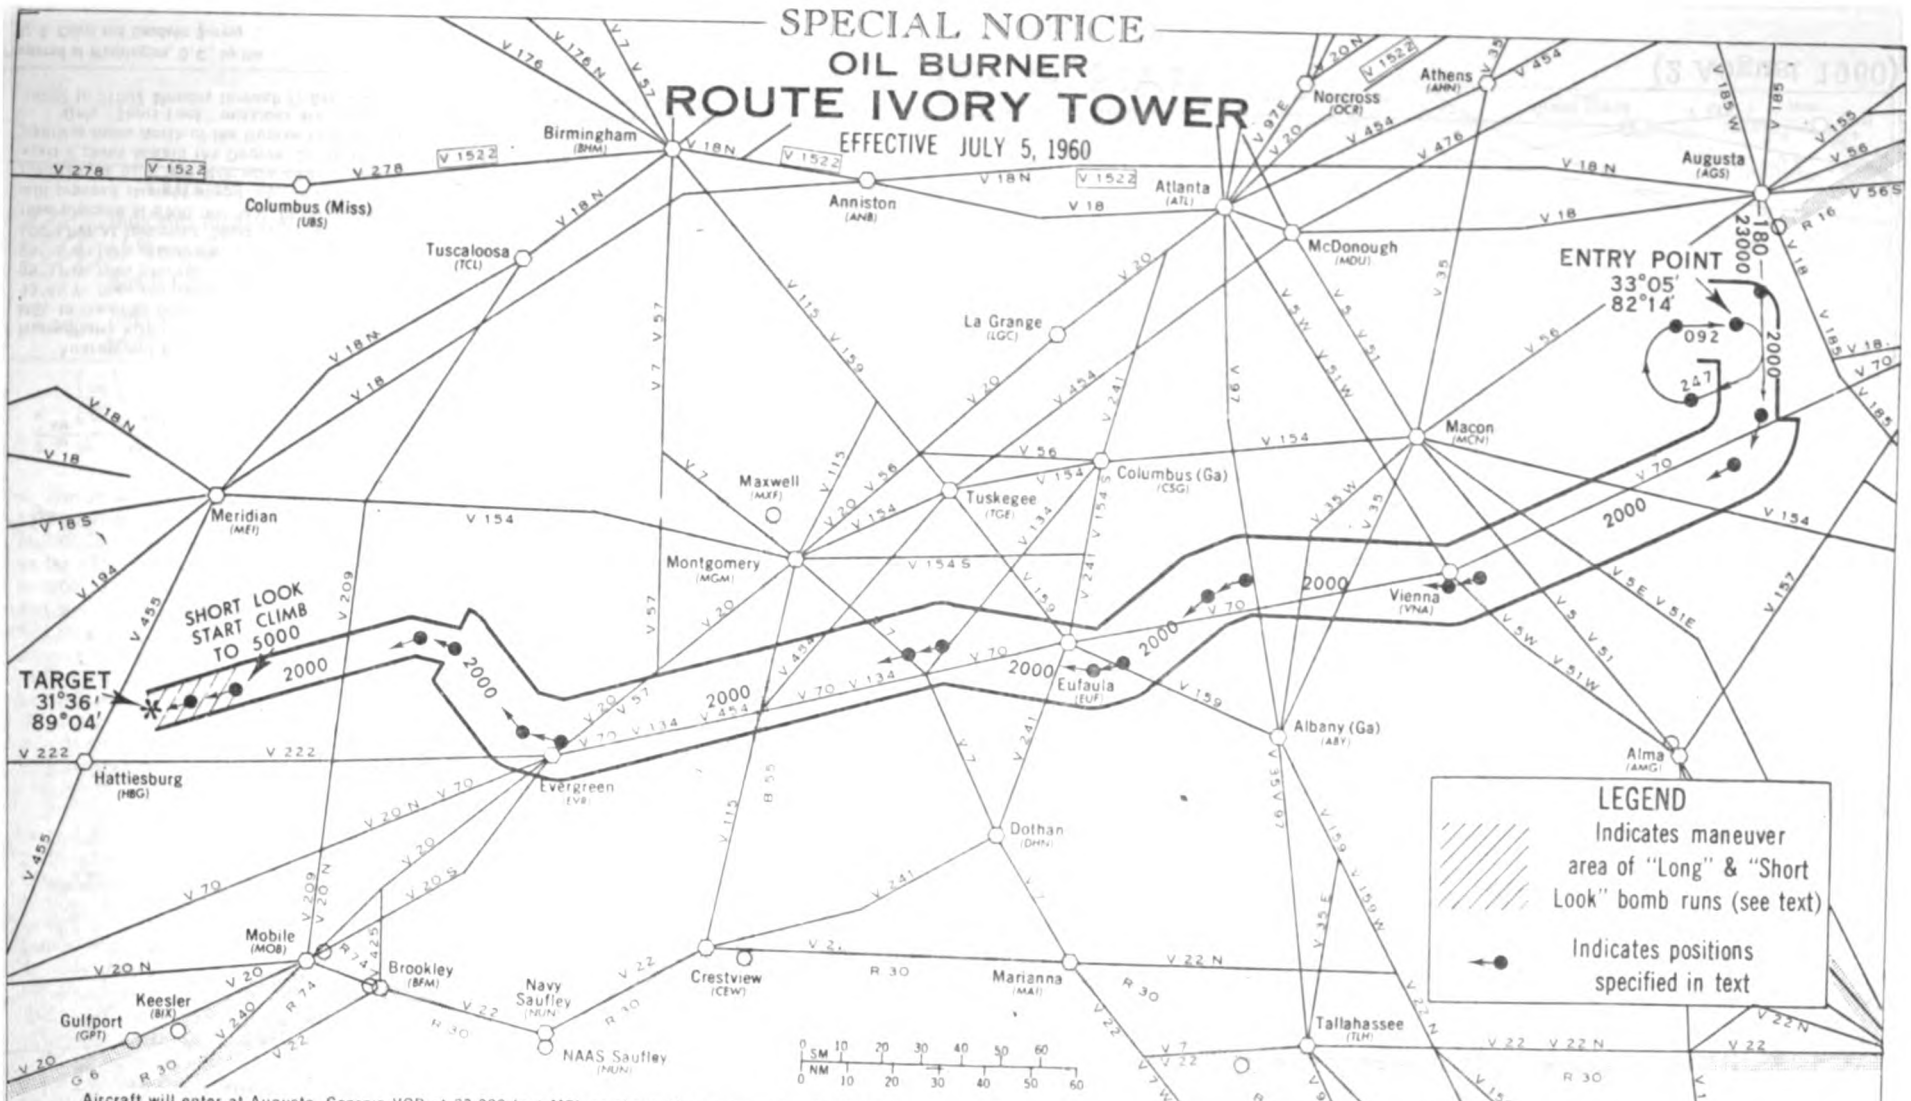
OIL BURNER
ROUTE HANG OVER

EFFECTIVE JULY 17, 1960

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Alternate entry to "Hang Over" route – Aircraft will enter at Massena, N.Y. VOR at flight level 290, then proceed via the 160° radial of the Massena VOR maintaining flight level 290, after crossing the 280° radial of the Burlington, Vermont VOR descent will be started to 5,000 feet MSL; continue on the 160° radial of the Massena VOR and cross the Burlington VOR 267° radial at 23,500 feet MSL, cross the Burlington VOR 250° radial at 14,500 feet MSL; at this point turn right to intercept the 010° radial of the Albany, New York VOR; continue descent on the Albany VOR 010° radial to its intersection with the Benson, Vermont VOR 287° radial; at this point make a standard right turn to intercept the "Oil Burner" "Hang Over" route at 43°46′N-74°25′W. Aircraft will be at 5,000 feet MSL prior to crossing the 74°W longitude. Remainder of flight via the "Hang Over" route.

Prepared at Washington, D.C., by the U. S. Coast and Geodetic Survey



(2 August 1960)

SPECIAL NOTICE

OIL BURNER

ROUTE IVORY TOWER

EFFECTIVE JULY 5, 1960

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South; then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL; turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W, then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W, then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday.

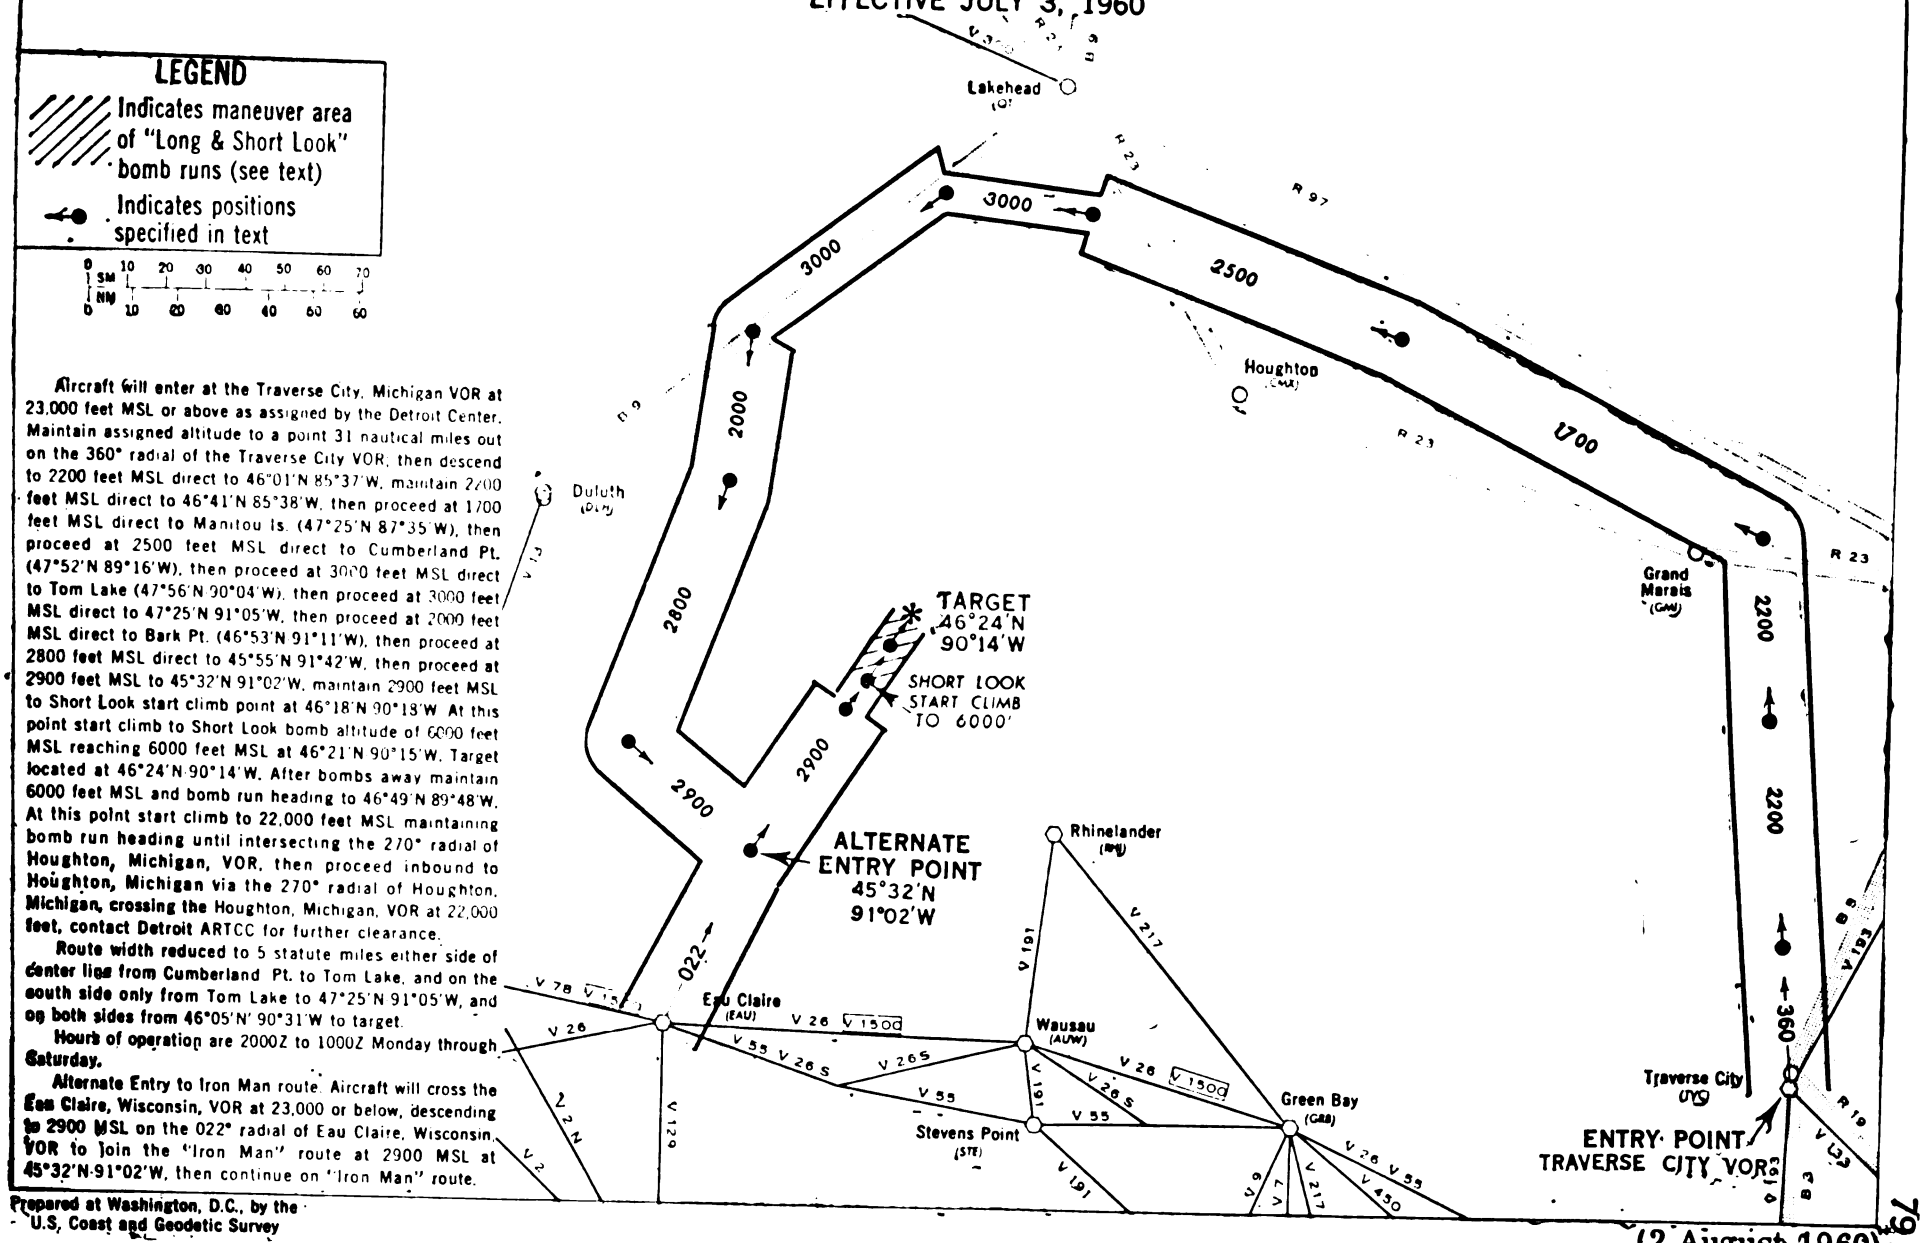
OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE JULY 5, 1960

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North; then descend to 4500 feet MSL to the entry point of the low level route at 42°11'N-99°35'W; then proceed at 4500 feet MSL to 43°44'N-99°45'W; then proceed at 4500 feet MSL to 44°38'N-99°05'W; then proceed at 3500 feet MSL to 45°18'N-99°51'W; then proceed at 3500 feet MSL to 46°30'N-99°18'W; then proceed at 3500 feet MSL to 46°56'N-99°18'W; then proceed at 3500 feet MSL to 47°03'N-99°30'W; then proceed at 3500 feet MSL to 46°59'N-100°17'W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57'N-100°31'W; then proceed at 6100 feet MSL to the target at 46°56'N-100°39'W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR; maintain flight level 260.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday and 0200Z to 0900Z Tuesday through Saturday



Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(2 August 1960)

SPECIAL NOTICE
OIL BURNER

SPECIAL NOTICE

OIL BURNER
ROUTE IRON MAN
EFFECTIVE JULY 3, 1960

Aircraft will enter at the Traverse City, Michigan VOR at 23,000 feet MSL or above as assigned by the Detroit Center. Maintain assigned altitude to a point 31 nautical miles out on the 360° radial of the Traverse City VOR, then descend to 2200 feet MSL direct to 46°01'N 85°37'W, maintain 2200 feet MSL direct to 46°41'N 85°38'W, then proceed at 1700 feet MSL direct to Manitou Is. (47°25'N 87°35'W), then proceed at 2500 feet MSL direct to Cumberland Pt. (47°52'N 89°16'W), then proceed at 3000 feet MSL direct to Tom Lake (47°56'N 90°04'W), then proceed at 3000 feet MSL direct to 47°25'N 91°05'W, then proceed at 2000 feet MSL direct to Bark Pt. (46°53'N 91°11'W), then proceed at 2800 feet MSL direct to 45°55'N 91°42'W, then proceed at 2900 feet MSL to 45°32'N 91°02'W, maintain 2900 feet MSL to Short Look start climb point at 46°18'N 90°18'W At this point start climb to Short Look bomb altitude of 6000 feet MSL reaching 6000 feet MSL at 46°21'N 90°15'W. Target located at 46°24'N 90°14'W. After bombs away maintain 6000 feet MSL and bomb run heading to 46°49'N 89°48'W. At this point start climb to 22,000 feet MSL maintaining bomb run heading until intersecting the 270° radial of Houghton, Michigan, VOR, then proceed inbound to Houghton, Michigan via the 270° radial of Houghton, Michigan, crossing the Houghton, Michigan, VOR at 22,000 feet, contact Detroit ARTCC for further clearance.

Route width reduced to 5 statute miles either side of center line from Cumberland Pt. to Tom Lake, and on the south side only from Tom Lake to 47°25'N 91°05'W, and on both sides from 46°05'N 90°31'W to target.

Hours of operation are 2000Z to 1000Z Monday through Saturday.

Alternate Entry to Iron Man route. Aircraft will cross the Eau Claire, Wisconsin, VOR at 23,000 or below, descending to 2900 MSL on the 022° radial of Eau Claire, Wisconsin, VOR to join the "Iron Man" route at 2900 MSL at 45°32'N 91°02'W, then continue on "Iron Man" route.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(2 August 1960)

AIRCRAFT MANEUVERS WITHIN CONTROL ZONES: To reduce the potential for in-flight conflict between aircraft operated in the vicinity of controlled airports in VFR weather conditions, FAA airport traffic control specialists will approve only those maneuvers considered necessary for the safe and expeditious movement of air traffic within the associated control zones. For this purpose, maneuvers such as operation of aircraft at speeds in excess of the minimum speed consistent with safe operational limitations of an aircraft, formation fly-bys, and unnecessary low passes, will be considered as unusual and will not be approved.

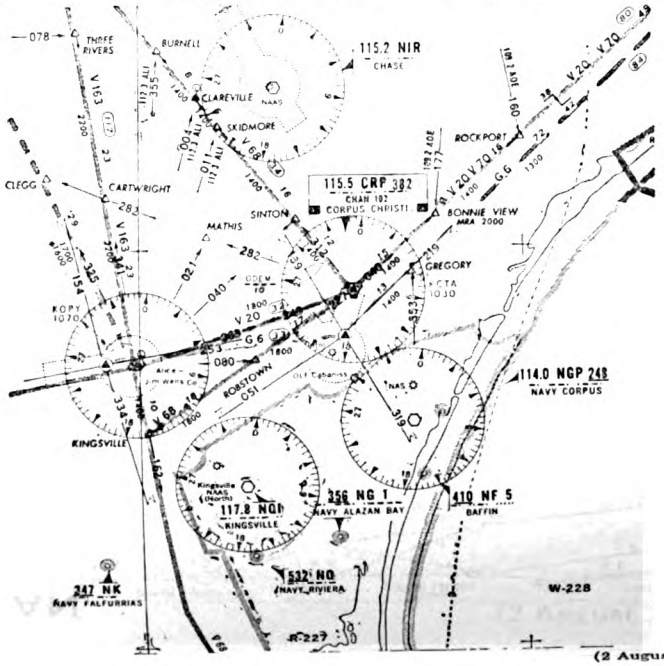
Maneuvers which will be approved, on a traffic permitting basis, include:

1. Normal take-offs and landings including 360° overhead approaches and those conducted in formation.
2. Practice instrument approaches including those conducted with a chase plane.
3. Touch-and-go landings.
4. Flight check activities such as short field take-offs and landings, engine out operations, checking of navigational aids, etc.
5. Simulated forced landing patterns including practice flame-out maneuvers.
6. Low passes for prearranged aircraft test or calibration purposes and visual equipment checks, such as gear checks, provided the flights are not conducted at an excessive speed.
7. Jettisoning of fuel tanks or other external stores.

RADAR WEATHER ADVISORY SERVICE(STAR GAZER) - On page 31 of the Flight Information Manual Volume 13 dated December 1959, Radar Weather Advisory Service(Star Gazer) will be discontinued on August 1, 1960, in the geographical area bounded by the following coordinates: 40-00N, 120-47W; NW to 41-25N, 121-50W; N to 45-50N, 121-50W; NE to 46-30N, 121-00W; N to a point on the U.S.-Canadian Border at 121-00W; thence E along the U.S.-Canadian Border to a point 113-25W; S to 42-00N, 113-25W; W to 42-00N, 119-25W; SW to the point of beginning.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.



GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

The Pilot's Automatic Telephone Weather Answering Service (PATWAS) is a transcribed service and is in addition to those already being carried in the Flight Information Manual. Hours of operation are Local Standard Time. PATWAS is in operation at the following Weather Bureau Airport Stations:

Station	Number	Hours of Operation (LST)

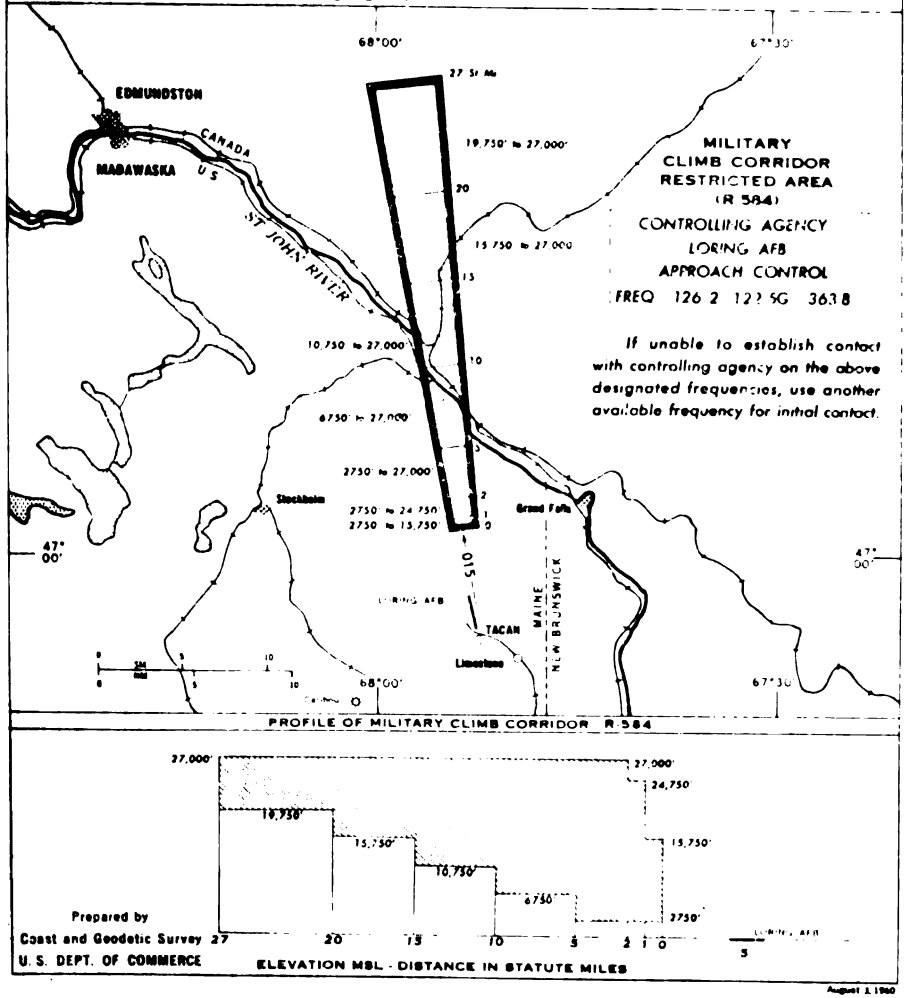
REVISION NOTICE

Effective August 8, 1960 all aircraft operations presently conducted at Cliff Maus Airport are to be moved to the new Corpus Christi, Texas International Airport and the Corpus Christi control zone redesignated.

(2 August 1960)

SPECIAL NOTICE



MAINE

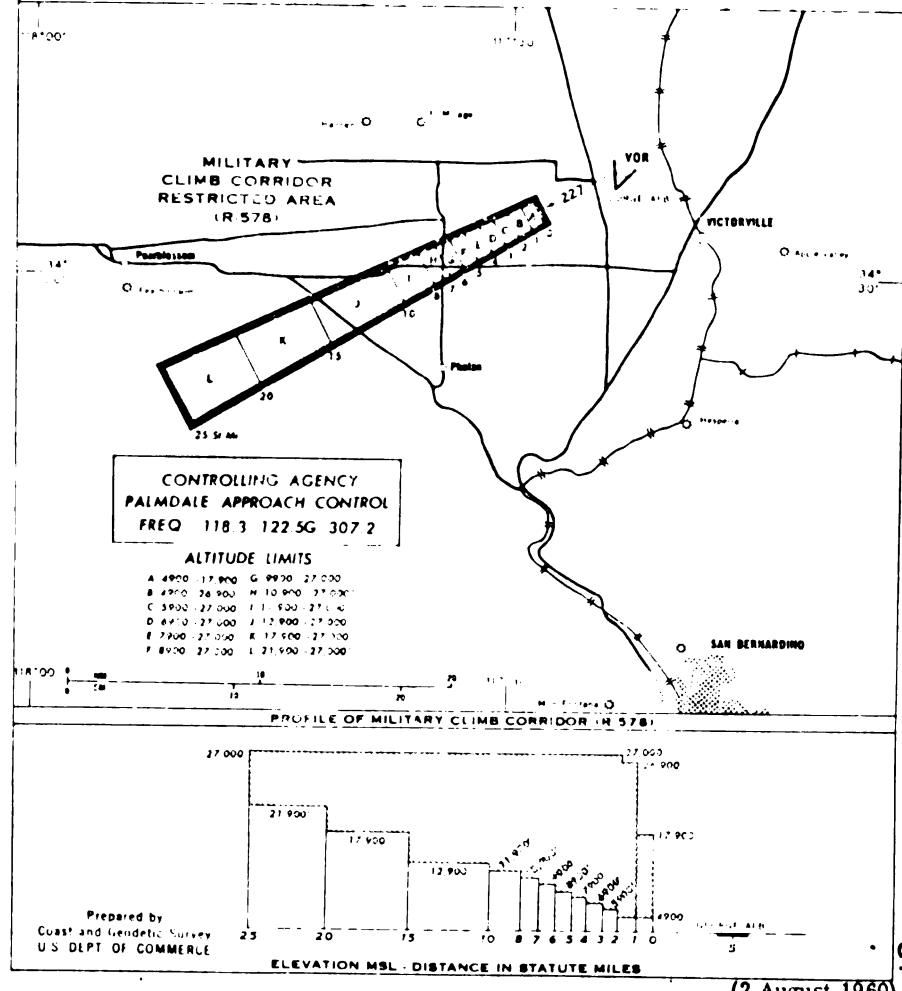
LIMESTONE (LORING AFB) MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E.S.T. AUGUST 25, 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense, the FAA and the Canadian authorities, have agreed to establish a restricted corridor to segregate such operations from other air traffic. ALL FLIGHTS through these areas must obtain prior approval from the Controlling Agency.

SPECIAL NOTICE



CALIFORNIA

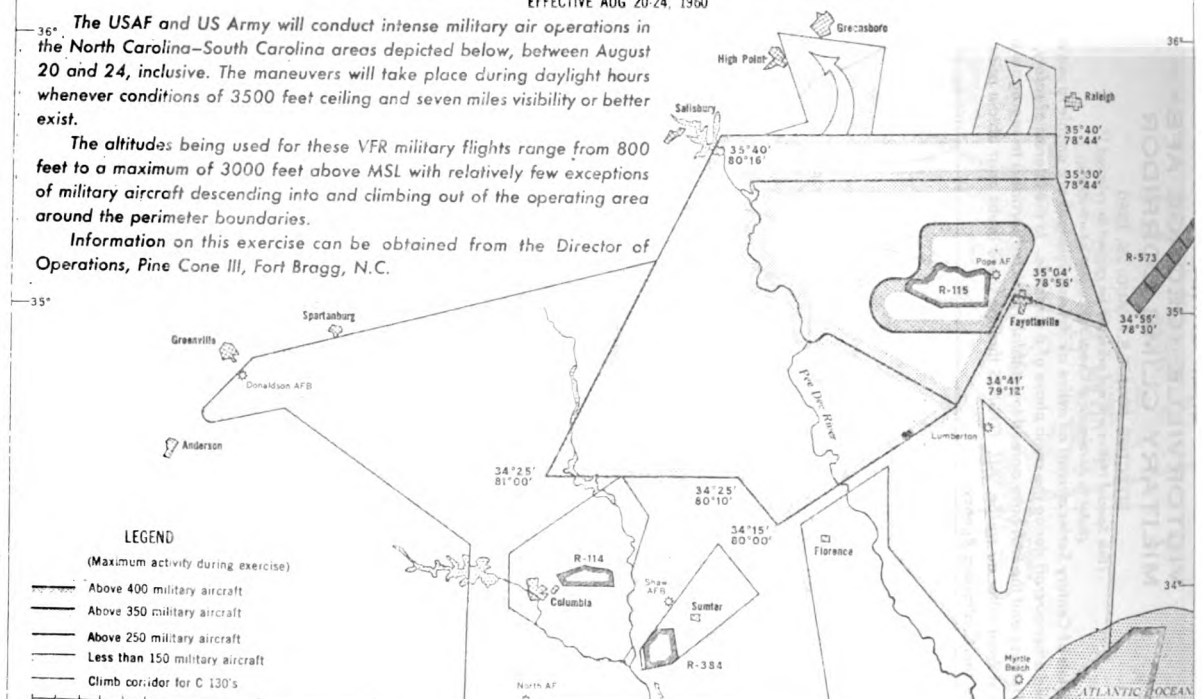
VICTORVILLE (GEORGE AFB) MILITARY CLIMB CORRIDOR

EFFECTIVE 0001 E S T AUG 25, 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense and the FAA have agreed to establish restricted corridors to segregate such operations from other air traffic. ALL FLIGHTS through these areas must obtain prior approval from the Controlling Agency.

SPECIAL NOTICE



NORTH CAROLINA-SOUTH CAROLINA
PINE CONE III MILITARY EXERCISE

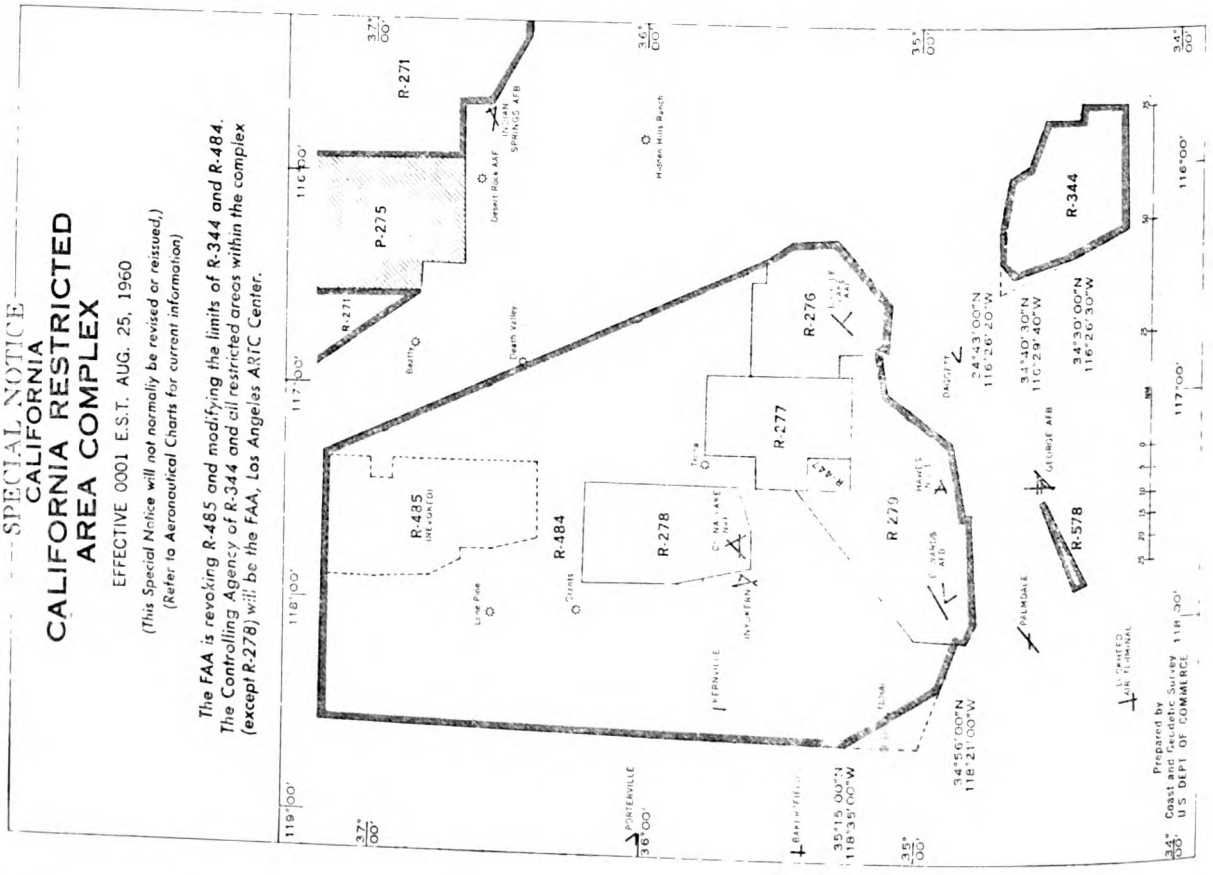
EFFECTIVE AUG 20-24, 1960

The USAF and US Army will conduct intense military air operations in the North Carolina–South Carolina areas depicted below, between August 20 and 24, inclusive. The maneuvers will take place during daylight hours whenever conditions of 3500 feet ceiling and seven miles visibility or better exist.

The altitudes being used for these VFR military flights range from 800 feet to a maximum of 3000 feet above MSL with relatively few exceptions of military aircraft descending into and climbing out of the operating area around the perimeter boundaries.

Information on this exercise can be obtained from the Director of Operations, Pine Cone III, Fort Bragg, N.C.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey



SPECIAL NOTICE

CALIFORNIA RESTRICTED AREA COMPLEX

EFFECTIVE 0001 E.S.T. AUG. 25, 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

The FAA is revoking R-485 and modifying the limits of R-344 and R-484. The Controlling Agency of R-344 and all restricted areas within the complex (except R-278) will be the FAA, Los Angeles ARTC Center.

AIRMAN'S GUIDE CORRECTION: Correct Airman's Guide Vol. 15, No. 10 July 15, 1960 page 54 first column under On Request Reporting Points-Established: delete items 10 and 11- Animas, N. Mexico and Winslow Ariz. Ints. respectively.

1/ LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

Maneuvers, including air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact Oceanside, San Diego, Thermal, Long Beach, Ontario and Los Angeles FSS for information pertaining to air activity during daylight hours on the maneuver dates

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
					Two Engine or Less		
From	To	Course and Distance	Minimum Altitude	Condition	65 Knots or Less	More Than 65 Knots	More Than Two Engine More Than 65 Knots
ADM VOR	ADM RBn	005°-5.5	2200	T-dn	300-1	300-1	200-½

NOTAMS page 3

Special Notices page 30

FEDERAL AVIATION AGENCY

OHIO STATE UNIVERSITY
AUG 29 1960
LIBRARY

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

OAKLAND ARTCC: See page 36 for freq chgs efctv about Aug 15. VHF/DF coverage 40 nmi at MEA excp 020°-050°, 5000'. (1-17) About Sept 10, ARSR svc & IFF bcn will be shut down until aprx Oct 10 - modernization. (8-15)

OAKLAND SPECIAL NOTICE: Pilots proposing transbay flt should ascertain that VFR wea exists within both San Francisco and Oakland ctl zones, or should obtain ATC clearance for flt within a ctl zone when wea is less than VFR, since ceiling and visibility mid-bay is frequently less than at the two trmls. Rotg beam ceilometer in opern. Hereafter, ceiling observations of less than 1500' will usually pertain to the MM lctdn. Tfc operg in VFR wea should avoid vcnty of Alameda NAS. Extsv tfc including jets oper in tfc patn up to 2000'; within 1.7 nmi radius of fld. Exercise extreme caution in these areas. (10-27) To avoid excessive delays, pilots operg in VFR conditions are reqd to file IFR flt plans with the appropriate cntr or comm stn prior to entering the Oakland area when wea is less than VFR. (11-17) All VFR flts exercise extreme caution when operg in vcnty of Hayward Arpt. Extsv simulated and actual IFR apchs on all apch navigational aids to Oakland Int'l Arpt passing in the proximity of Hayward Arpt. (4-26)

**OAKLAND, METROPOLITAN-OAKLAND INTL ARPT: Due non visibility, twr unable to determine if the following area of the arpt is clear of obstns and or acft; main txwy btn rnwy 15 & the cantilever hangar W of ctl twr. All use of this area is at pilot's discretion. (8-1) Rnwy 11-29 clsd constr. Pilots practicing apch use extreme caution, unlgtd and unmrkd conveyor belt 50' on apch end of rnwy 29. (8-10)

★OAKLAND, METROPOLITAN-OAKLAND INTL ARPT TOWER: VHF/DF coverage 40 nmi at MEA excp 340°-030°, 6500'; 030°-040°, 7000'. UHF/DF coverage 350°-040°, 7000' at MEA. (5-30) About Oct 1, freq 121.7 mc will be chgd to 121.9 mc. (6-14) Freqs 125.3, 323.2 mc comsnd. Freq 121.1 mc comsnd; twr transmits on VOR freq 116.8 mc. (8-5)

CALIFORNIA: **OAKLAND RADIO SPECIAL NOTICE: Military acft planning to use VHF communications and proposing IFR flt into Oakland, Alameda NAS or Hayward should contact Oakland Apch Ctl on 118.1 mc, or proposing IFR flt into San Francisco should contact San Francisco Apch Ctl on 118.5 mc. Communications durg IFR flt should not be conducted Oakland Apch Ctl or San Francisco Apch Ctl utilizing 126.18 mc unless 118.1 mc or 118.5 mc is not avbl. Due to extreme congestion, 126.18 mc is not considered a suitable communications channel for IFR flt into Oakland, Alameda NAS, Hayward or San Francisco.**

OAKLAND RADIO: No auto changeover eqpmt provided for TACAN. (6-15) July 6, TACAN shut down until aprx Aug 19-reconstr. (8-12)

Multi-eng and jet acft use rnwy 13-31. Multi-eng acft tfc patn W of arpt, 1500'. Jet acft tfc patn W of arpt, 2500'. Be on look out and use caution for multi eng and jet transports arriving and departing nearby Seattle-Tacoma Intl Arpt and Renton Arpt. Due non-visibility twr unable to ctl tfc on parking apron No. 4 and W of blast fence in front of Boeing Flt Cntr. No turning off acft on asphaltic concrete area btn txwy A-3 and A-4 rnwy 13-31. (5-14) Req first 500' rnwy 13 and 31 not to be used for tkof, due to extreme soil erosion and dust problem caused by prop wash and jet blasts. (7-17)

**SEATTLE-TACOMA INTL ARPT: All acft preparing to tkof rnwy 16 rqrd to conduct run-up at least 1000' S of northerly runup apron whenever practical and compatible with safe opern. (12-28) Apch lgts inop until aprx Oct 15, due rnwy extsn. (7-5) Due non-visibility twr unable to determine if following areas are clear of obstns and/or acft: N runup area and all trml gates. All use of these areas is at pilot's discretion. (8-4)

SEATTLE-TACOMA INTL ARPT TOWER: July 5, ILS lclzr and glide slope shut down until aprx Aug 16 - installation blast fence. (7-29)

SEATTLE RADIO: LF rng NW course has splits and multiples beyond 20 mi. (10-26)

SPOKANE, FELTS FLD: Men, eqpmt on fld days. (6-29) 904'(4549'MSL) lgtd twr being erected 7 nmi SSE(167°T) at lat 47-34-52, long. 117-17-47. (7 5)

WASHINGTON: SPOKANE-INTL ARPT: SW txwy btn rnwy 3 & 7 clsd. Apch lgt system shut down until about Oct 1, for modernization of apch lgt system and sequence flasher lights. SPOKANE RADIO: Rcvr 3023.5 kc intermittently inop due severe lcl interference. (3-20) About Aug 16, LF rng N course will be realigned to 185° M inbound twd stn. A & N quadrants identifications will be reversed as follows: 1 A 58 N 185 A 255 N. (7-25)

★TACOMA, GRAY AAF RADIO: Army H facil class chgd to MH. (8-10)

TACOMA, McCHORD AFB SPECIAL NOTICE: Caution-hvy jet tfc in vcnty, from surface to 25,000'. (9-18)

★TOLEDO RADIO: Aug 11, freq 272.7 mc comsnd.

WALLA WALLA, CITY-COUNTY ARPT: Const work in progress on two new txwys btn apron and rnwys 2-20; rnwys 2-20 clsd, mrkd with crosses only when eqpmt using rnwys; use caution when rnwys 2-20 are open as eqpmt may be working on edges. Flags & flares on work area during non-working hrs. (7-1)

WEST VIRGINIA: BECKLEY RADIO: Voice reception at Charleston FSS unreliable below 7500' MSL, 40 nmi Beckley VOR from 30° clockwise to 180°. Reception satisfactory with acft over VOR at MEA. (4-12)

CHARLESTON, HILLTOP ARPT: Closed. (6-27)

CHARLESTON, KANAWHA CO ARPT SPECIAL NOTICE: Effective 7/9/60, ADF Procedure No. 2, Amdt-Orig., change missed apch to read: "within 0.0 mi, make left turn and climb to 3000' direct to the Charleston LOM." (7-11)

CHARLESTON, KANWAHA CO ARPT: Narrow beam taxiway B mrkd by metal pipe and flags, clsd to airline acft from SE end of rnwy 32 to E side county ramp. Apch lgtg consists of 5 left-hand red neon bars at 100' intervals starting 170' from end of rnwy 23. ANG facils & svcg avbl only 1300-2100Z Tue thru Sat, clsd Sun & Mon; no tie down or over night parking. Rotg beam ceilometer installed on ridge aprx 4500' from apch end rnwy 23. (8-9)

★CHARLESTON, KANAWHA CO ARPT TOWER: ILS glide slope unusable from MM to touchdown. (6-17) Aug 6, freq 120.30 mc replaced 118.50 mc.

CHARLESTON RADIO: LF rng usable only as H facil, with voice. (11-23)

**CLARKSBURG, BENEDUM ARPT: Rnwy 16-34 open all lgt acft, including Twin Beechcraft; clsd all other acft. (6-29)

**ELKINS MUN-RANDOLPH CO ARPT: (Formerly Elkins Mun Arpt) Rnwy 4-22 clsd ngts, rnwy lgts inop; use rnwy 13-31 with caution, lgts poor. (6-29)

MARTINSBURG MUN ARPT: 3-inch lip on concrete threshold lgt bases, both ends rnwys 17-35. (6-1)

MARTINSBURG RADIO: VOR has occasional rapid course deflections of short duration.

PARKERSBURG, WOOD COUNTY ARPT: Caution, constr N end of apch to rnwy 21,area mrkd, flagged days, red lgts ngt. (3-1)

PARKERSBURG RADIO: DMET operg on test basis; channel 89. (6-9)

WHEELING, OHIO COUNTY ARPT TOWER: About Sept 20, ILS lclzr and glide slope will be shut down until aprx Oct 4-freq chgd to lclzr 109.7 mc; glide slope 330.2 mc. (8-11)

WISCONSIN: BOULDER JUNCTION RADIO: May 1 thru Nov 1, MH facil operg. Freq: 206 kc. Ident: BDJ. Lctd on arpt. Hrs: dalgt hrs. (7-19)

CAMP MCCOY SPECIAL NOTICE: Standard rotating bcn lctd 1-1/2 mi on brg of 060° out of opern until further notice. (7-29)

**GREEN BAY, AUSTIN-STRAUBEL ARPT: Apch lgts on req only. (6-29)

GREEN BAY RADIO: June 23, TACAN shut down until aprx Aug 17 - modernization. (7-27)

JANESVILLE RADIO: About Sept 12, VOR will be shut down until aprx Sept 26-freq chgd to 113.4 mc and class chgd to M-BVOR. (8-12)

LA CROSSE MUN ARPT: 176'(849'MSL) lgtd twr being erected 4.5 nmi SSE(168°T) at lat 43-48-13, long. 91-14-31. (7-25)

LA CROSSE RADIO: Multiples all courses LF rng usable, excp rgt side separation. (3-25) VOR has courses out of tolerance at MEA due roughness. Usable distance lmtd 30° clockwise thru 60° and 120°-145° 20 mi, all other azimuths 25 mi. (5-16)

LONE ROCK, TRI COUNTY ARPT: Haystack across road adjt N end of N-S rnwy. (7-11)

LONE ROCK RADIO: DMET operg test basis; channel 83.

MADISON, TRUAX FLD: Constr of arresting barriers in overrun areas of rnwys 18 and 36 during dalgt hrs, flares at ngt; apch lgtg being installed S end of rnwy 18-36, men, eqpmt on fld dalgt hrs; rnwy 18-36 clsd for resurfacing Aug 29- Sept 8. (8-11)

MADISON, TRUAX FLD TOWER: ILS momentary erratic lclzr course indications may be observed prior intercepting front course on transitions from E. Tsmtr & rcvr 305.4 mc tmpry decmsnd; apch ctl freq 323.8 mc implemented. (7-24)

MARSHFIELD MUN ARPT: Caution, men, eqpmt on fld, constr. (6-29)

WISCONSIN: MILWAUKEE, GENERAL MITCHELL FLD: Rnwys 13-31 and 7L-25R clsd to jet acft. 4150' rnwy 7L-25R open days only, SW 650' unusable, mrkd. Neon apch lgts inop. Obstn unlgtd p-line 2400' S of rnwy 1-19 extends 60' above rnwy level. New centerline txwy open from trml ramp to E end of fld. S 400' rnwy 1-19 clsd lndgs. Threshold lgts moved 400' N of S end of rnwy 1-19. Glide path touchdown point 2000' N of threshold lgts on rnwy 1. 1420' excavated area S of rnwy 1-19 day mrkd. (6-27)

MILWAUKEE, GENERAL MITCHELL FLD TOWER: VHF/DF coverage 3500' at 40 nmi all azimuths. ILS MM/LMM shut down-relctn. (9-11) About Aug 30, freq 285.4 mc will be chgd to 307.0 mc. (8-11)

OSHKOSH RADIO: VOR unusable at Pine Grove Int above 15,000' MSL & at Nero Int above 14,000' MSL due interference. (1-20)

PRAIRIE DU CHIEN ARPT SPECIAL NOTICE: Flt Test Area described as follows: Area is bordered on W by Mississippi Rvr, on N by Wisconsin Rvr, on E by Highway 132, S to Mounthope, Wis., paved roads J to A and A thru Bloomington, Wis., W to Mississippi Rvr. Hours: dalgt under VFR conditions. Altitudes: not to exceed 5000'. User: Lloyd Eddings. Expires 12 October 1960. (8-13)

**SOLON SPRINGS SPECIAL NOTICE: Hi tension line exists between an island and shoreline on Lake Minnisuing N of Solon Springs.(7-19)

WAUKEAHA COUNTY ARPT: NE/SW rnwy clsd; sod removal in progress for leveling rnwy. Constr on W end E/W rnwy & txwy; to be extended 600';men, eqpmt off W end of rnwy & txwy.

WOODRUFF, LAKELAND MUN ARPT: Caution, men eqpmt installing rnwy lgts. (6-29)

WYOMING: CAMP GUERNSEY AREA SPECIAL NOTICE: Controlled firing area from June 12 thru Aug 20, 1960 between 0700 and 2200 MST to 330' MSL within the following boundaries: bgng at lat 42-30-00, 104-54-30; thence to 42-30-00, 104-40-00; 42-23-00, 104-40-00; 42-19-00, 104-45-00; 42-16-00, 104-45-00; 42-16-00, 104-49-00; 42-22-00, 104-54-30; thence to pt of bgng. (6-10)

**CASPER SPECIAL NOTICE: Civil jet trng being conducted periodically seven days/wk durg dalgt hrs within the unctld airspace bounded on the N by V-26 btn Ross Int and RAP V-89 btn RAP and CDR, V-182 btn CDR and DGW, V-247 btn DGW and the Ross Int at alts 10,000' to 23,000' MSL inclusive. All acft contemplating VFR flt thru this area are advised to monitor one of the following FSS: Casper, Wyo; Chadron, Nebr; Rapid City, S. D. Durg trng periods, these stns will include an advisory message at the end of each weather broadcast. (10-26)

CASPER AIR TERMINAL TOWER: ILS glide slope has moderate to severe path roughness above 7300' and beyond 6 nmi. Not to be used for auto pilot apchs. (12-5) Aug 1, ILS lclzr and glide slope shut down until aprx Aug 20-reconstr. (8-2)

**CHEYENNE MUN ARPT: Due non visibility twr unable to determine if the following areas of the arpt are clear of obstns and/or acft; military ramp area on the N side of arpt, ramp area within 100' radius of the twr structure. All use of these areas is at pilot's discretion. Twr controlled jet arresting barrier installed at the end of rnwys 8 and 26.

CODY MUN ARPT: Rnwy 9-27 closed. (7-1)

DOUGLAS RADIO: DMET operg on test basis; channel 23. (3-18)

DUNOIR RADIO: DMET operg on test basis; channel 81. (4-17) Soon, VOR voice ctl will be provided from Worland FSS. (6-17)

EVANSTON ARPT: New arpt reported 5 mi NNW, elev 6600' one dirt strip N/S 2800' in length, soft when wet. (3-2)

ROCK SPRINGS MUN ARPT: Rnwy 3-21, 200' SW end clsd, flagged, unlgtd; rnwy 7-25, 800' W end from threshold lgts and 500' from W end of hard surface clsd, unflagged, due to 6' lgtd FAA detector obstn 50' inside of threshold lgts on W end of rnwy 7-25, to permit 40 to 1 safety glide margin; full length avbl for tkof. (5-16) Present usable length rnwy 3-21 is 5013' and rnwy 7-25, 6188'. (6-3)

SHERIDAN COUNTY ARPT: Caution, grass cutting in progress summer months. (6-29)

SHERIDAN RADIO: Aug 8, VOR shut down until aprx Aug 27-reconstr. Durg this period, following route structure & MEAs in efct: Unusable Awys: V1500 DNW-DPR; V19E BIL-SHR and SHR-CZI. Usable Awys (Tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated): V19 CZI-BIL via CZI R317° and BIL R114°, MEA 10,000'. (8-11)

THERMOPOLIS MUN ARPT: 50' of entire length of rnwy 36-18 W of cntrline clsd, E side will remain open, but use with caution. (8-8)

PUERTO RICO: PONCE, MERCEDITA ARPT: About Sept., establishment of antenna farm consisting of 76 twrs will be erected 3.5 nmi E at lat 18-00-45.30, long. 66-30-30. Tallest twrs 131' (181'MSL). Only 5 twrs will be obstn lgtd. (8-8)

SAN JUAN, ISLE GRANDE ARPT: Tmpry twr lctd on NW corner of old

[redacted]: **SAN JUAN, ISLE GRANDE ARPT: Tmpry twr lctd on NW corner of old trml bldg. 174' metal bldg lctd aprx 1000' SE of threshold rnwy 27, lgtd ngts by two steady red lgts. (6-9) Due non-visibility twr unable to determine if following areas are clear of obstns and/or acft: Extreme S portion CG/Navy ramp; ramp area E of CG hangar; extreme E end rnwy 9; and ramp on N side J. Mack Aero hangar. All use of these areas is at pilots discretion. Due non-visibility twr unable to observe tfc and provide tfc info apch area for lndg rnwy 27. (8-10)

SAN JUAN-ISLA GRANDE ARPT TOWER: May 13, twr tmpryly relctd on NW corner of old trml bldg- renovation of twr structure. Soon, following freqs will be in use: 255 kc vice 369 kc; 233.8 mc vice 257.8 mc; and 250.2 mc. (7-29)

SAN JUAN, PUERTO RICO INTL ARPT: Access txwy to ANG parking apron lgtd; ditch at W side of ANG access txwy; use extreme caution while taxiing day and ngt. Transient facils avbl 1130-2000Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high, 20' long erected 10' W of W side of txwy to ANG ramp. Hi-intensity rnwy end identifier lgts lctd aprx 30' each side of apch end rnwy 7 comsnd. Men, eqpmt working vcnty of apch end rnwy 25; 20' derricks erected, area obstn lgts. (1-7) Due to extsn of eastern end rnwy & txwy, 39' lgtd dredge eqpmt operg 600' from end of rnwy, top of dredge 32.5' above rnwy at mean highwater. Caution adhere to cntrline of txwy while maneuvering on extreme W end of E/W txwy; due to erosion gnd level drops aprx 18 inches from concrete and follows outside radius. (8-8)

SAN JUAN-RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvr 3023.5 kc will be decmsnd. (8-10)

[redacted] ISLANDS: ST. CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making rgt hand turn after tkofs to E. Men, eqpmt on E end of rnwy where 1200' extsn under constr; rnwy lgts E end tmpry lctd with exposed electric cables across E end on surface of rnwy. No runoff area avbl on E end.

ST. CROIX RADIO: No coverage to N and W on all UHF and VHF voice air/gnd channels.

ST. THOMAS, CHARLOTTE AMALIE, TRUMAN ARPT: Rnwy 9-27 slippery when wet braking action very poor caution advised durg and following rain showers. (8-2)

ST. THOMAS, CHARLOTTE AMALIE, TRUMAN RADIO: No coverage possible from N & E quads all VHF and UHF voice air/ground channels - due terrain. (3-10)

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

MILITARY CLIMB CORRIDORS: ALL FLIGHTS desiring to traverse these areas must obtain prior approval from the Controlling Agency and maintain continuous listening watch on the appropriate frequency while traversing the corridor. The list of corridors, controlling agencies and frequencies follows:

Corridors	Controlling Agency	Frequencies
Alexandria (England AFB), Louisiana	England AFB	363.8;118.2;122.5G
Anchorage (Elmendorf AFB), Alaska	Anchorage Apch Ctl	122.5G; 119.1; 118.1; 270.6; 363.8
Burlington (Ethan Allen AFB), Vermont	Burlington Apch Ctl	118.3;122.5G;363.8
Camp Springs (Andrews AFB), Maryland	Andrews Apch Ctl	120.0;122.5G; 363.8

G - Guards

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, Item 9 and page 73 - Position Reporting, in the Flight Information Manual. Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

WASHINGTON, D. C. AREA SPECIAL NOTICE - Aircraft operating VFR be alert for all types of lighter-than-air craft in Washington-NAS Area. Including APG, Aberdeen NAS, Andrews AFB,

IN INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT

WASHINGTON, D. C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D. C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U. S. Route 29 until past Falls Church. Departures proceed well right of U. S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D. C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570. 49 - No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York FSS controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: FS-1). This does not apply to portable recorders and dictating machines which meet Military Specifications MIL-I-16910 or other comparable military specifications nor to hearing aids.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meterological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc
Chicago, (Joliet), Ill.	350 kc, 257 kc
Cincinnati, Ohio	335 kc
Cleveland, Ohio	344 kc

SMUGGLING IS THREAT TO SECURITY: The smuggling of instruments of war, including atomic devices and biological agents, and the illegal entry of aliens, are a serious threat to the security of the U. S. The Bureau of Customs and the Immigration and Naturalization Service are your first line of defense.

Customs offers generous rewards for original information leading to the apprehension and conviction of any person or persons smuggling or attempting to smuggle into this country any of the articles or devices mentioned herein. Payment in cash will be made immediately following seizure and conviction of violators. The identity of the payee will be kept secret and fully protected at all times.

To qualify for a reward, information must be original and in sufficient detail to make possible the seizure of the article being smuggled and the arrest of the person or persons involved. If you have such information, use the quickest means available to report it to the nearest Customs, Immigration or FAA officer who will see to it that when seizure is made and violators convicted you will receive the award. The Bureau of Customs will also make cash payment for information leading to seizure and forfeiture of any article or device covered by this notice even though no arrest is made.

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas

a. No additional operational restriction, control or communications requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operating within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Unless advised otherwise by ATC, transponders shall be adjusted to reply as follows:'

(1) Basic Mark X equipped aircraft - Mode 3 .
(2) Civil turbojet air carrier aircraft - Mode A Code 40 .
(3) Civil aircraft (other than turbojet air carrier) and military SIF equipped aircraft operating at an assigned level- Mode A (military Mode 3) Code 02.
(4) Civil aircraft (other than turbojet air carrier) and military SIF equipped aircraft operating VFR or VFR-on-top - Mode A (military Mode 3) Code 62.
(5) NORAD interceptor aircraft on air defense duties - Mode 3 Code 00
(6) Flights operating on a mode other than Mode 3 will adjust transponder to reply on Mode 3 and the assigned mode simultaneously.

Aircraft operating within restricted, warning or prohibited airspace are encouraged to operate transponders as outlined above when in proximity to radar advisory areas but such operation is not a requirement except when leaving those areas to enter radar advisory areas.

b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.

c. In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.

2. Nonradar Advisory Areas

The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.

a. Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.

b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route #1 (Los Angeles, Calif., to Seattle, Washington)
2. VOR/VORTAC Jet Route #2 (San Antonio, Texas to Tallahassee, Florida.)
3. VOR/VORTAC Jet Route #3 (Oakland, Calif., to Spokane, Wash.)
4. VOR/VORTAC Jet Route #4 (Los Angeles, Calif., to Phoenix, Ariz.
5. VOR/VORTAC Jet Route #8 (Tulsa, Okla., to New York, N.Y.)
6. VOR/VORTAC Jet Route #12 (Baltimore, Md., to Pittsburgh, Pa.)
8. VOR/VORTAC Jet Route #16 (Portland, Ore., to Pullman, Mich.; Buffalo, N.Y., to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont. to Int. of J16V with Category "A" radar flight advisory area of J90V SW of Billings, Mont.
9. VOR/VORTAC Jet Route #19(Omaha, Nebr., to Int. J19V with J64V).
10. VOR/VORTAC Jet Route #21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
11. VOR/VORTAC Jet Route #22 (Lake Charles, La., to intersection with J55V).
12. VOR/VORTAC Jet Route #24 (Phoenix, Ariz., to Albuquerque, N.M.)(Indianapolis, Ind. to its Int with J-43-V near Cincinnati, Ohio.)
13. VOR/VORTAC Jet Route #25 (Dallas, Tex., to Tulsa, Okla.)
14. VOR/VORTAC Jet Route #26 (Amarillo, Tex., to Appleton, Ohio.)
15. VOR/VORTAC Jet Route #29 (Houston. Tex.. to Cleveland, Ohio).
16. VOR/VORTAC Jet Route #31 (Dallas, Tex., to Chicago, Ill.)
17. VOR/VORTAC Jet Route #33(Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
18. VOR/VORTAC Jet Route #34 (Cleveland, Ohio to Pittsburgh, Pa.)
19. VOR/VORTAC Jet Route #35 (New Orleans, La., to St. Louis, Mo.)
20. VOR/VORTAC Jet Route #37 (New Orleans, La., to Spartanburg, S.C.)
21. VOR/VORTAC Jet Route #41 (Miami, Fla. VOR to St. Petersburg, Fla. VOR.)
22. VOR/VORTAC Jet Route #41 (Kansas City, Mo., to Omaha, Nebr.)
23. VOR/VORTAC Jet Route #42 (Dallas, Tex.. to New York. N. Y.
24. VOR/VORTAC Jet Route #43 (St. Petersburg, Fla. to the Int of J43V with J84V.)
25. VOR/VORTAC Jet Route #45 (Alma, Ga., to St. Louis, Mo.)
26. VOR/VORTAC Jet Route #49 (Alma, Ga., to Spartanburg, S. C.)
27. VOR/VORTAC Jet Route #52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala,, extension to J52V.
28. VOR/VORTAC Jet Route #53 (Miami, Fla., to the Int. of J53V and J81V; Spartanburg, S.C., to Pittsburgh, Pa.)
29. VOR/VORTAC Jet Route #55 (From the intersection with J22V to Kenton, Del.)
30. VOR/VORTAC Jet Route #56 (Salt Lake City, Utah to Denver, Colo.) Nonradar advisory area from 163 nmi E of Salt Lake City to 19 nmi W of Kremmling, Colo.
31. VOR/VORTAC Jet Route #58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 170 nmi E of Tonopah, Nev. to 20 nmi SE of Bryce Canyon, Utah. Effective 25 August 1960.
32. VOR/VORTAC Jet Route #60 (Los Angeles, Calif., to New York, N.Y.) Nonradar

(18 August 1960)

advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb., VOR.

33. VOR/VORTAC Jet Route #62 (Idlewild, N.Y., to Nantucket VOR.)
34. VOR/VORTAC Jet Route #64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
35. VOR/VORTAC Jet Route #67 (Idlewild, N.Y., to U.S.-Canadian Border.)
36. VOR/VORTAC Jet Route #69 (Spartanburg, S.C., to Gordonsville, Va.)
37. VOR/VORTAC Jet Route #70 (Seattle, Wash. to Idlewild, N.Y.)
38. VOR/VORTAC Jet Route #71 (Appleton, Ohio to Front Royal, Va.)
39. VOR VORTAC Jet Route #73 (Miami, Fla., to U.S.-Canadian Border)
40. VOR/VORTAC Jet Route #77 (Miami, Fla., to U.S. Canadian Border)
41. VOR/VORTAC Jet Route #78 (Los Angeles, Calif., to New York, N.Y.)
42. VOR/VORTAC Jet Route #79 (Miami, Fla., to Idlewild, N.Y.)
43. VOR/VORTAC Jet Route #80 (Oakland, Calif. to New York) Nonradar advisory areas from 145 nmi E of Tonopah, Nev. to 70 nmi WSW of Denver, Colo; from 120 nmi ESE of Denver, Colo. to 25 nmi W of Hill City, Kans.
44. VOR/VORTAC Jet Route #81 (The intersection of J81V and J53V to Barracuda Int.)
45. VOR/VORTAC Jet Route #82 (Chicago, Ill., to Boston, Mass.)
46. VOR VORTAC Jet Route #84 (Oakland, Calif., to the U.S. Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr.
Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
47. VOR/VORTAC Jet Route #85 (Miami, Fla., to the U.S.-Canadian Border.)
48. VOR VORTAC Jet Route #87 (Houston, Tex., to Northbrook, Ill.)
49. VOR/VORTAC Jet Route #89 (Northbrook, Ill., to Miami, Fla.)
50. VOR/VORTAC Jet Route #90 (Seattle, Wash., to Chicago, Ill.)
51. VOR/VORTAC Jet Route #95 (Idlewild, N.Y., to U.S.-Canadian Border.)
52. VOR/VORTAC Jet Route #97 (Boston, Mass. to the U.S. Canadian Border.)
53. VOR/VORTAC Jet Route #103 (St. Petersburg, Fla. to Orlando, Fla.)
54. Control 1150 (West Palm Beach, Fla., to Wilmington, N.C.)

AREAS

1. That area 20 n mi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.
2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial(direct route between Duluth & Lakehead, Canada.)
3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)
4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif., 208° M radials; thence via the Long Beach, Calif 208° M radial(Control Area Extension 1177) for a distance of 180 n mi.
5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 n mi.
6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 n mi.
7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 n mi.
8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial(Control Area Extension 1173 over Francis Intersection) for a distance of 150 n mi.
9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 n mi.
10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 n mi.
11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 n mi.
12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 n mi.
13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 n mi.
14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 n mi.
15. Honolulu, Hawaii VOR: thence via the Honolulu, Hawaii 168° M radial for a distance of 99 n mi.
16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Port Allen rbn.
17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.
18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 n mi (boundary of the Miami Oceanic Control Area)
19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct. radial to the Victoria (Patricia Bay), B.C., Canada RR.
20. Wolbach, Nebraska VOR; direct to Pawnee City, Nebraska VOR.
21. Boston, Mass., Terminal Area-- That area within 20 nmi to either side of J-16-V between Albany, N.Y., & Boston, Mass.
22. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y., VOR to Albany, N.Y., VOR.
b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.
23. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR
Baltimore, Md., Terminal Area--
a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.
24. St. Louis, Mo., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Int. of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.
25. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 264° M radial; to Int. of Palmdale, Calif., 264° M radial and J-1-V.
d. Los Angeles, Calif., VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.
26. Oakland, Calif., Terminal Area -- That area within 20 nmi. to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
C2
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.

27. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.

28. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
b. Spartanburg, S. C., VOR via V-20-N to Norcross, Ga., VOR.
c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S. C., VOR

29. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

30. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. - Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

31. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028° M radial to a point 68 nmi NE of Thurman VOR.
c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

32. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi--bndry of the Havana, Cuba Ctl Area.

33. Houston, Tex., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR (V20S).
c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

34. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

35. New Orleans, La., Terminal Area-- That area within 20 nmi to either side of a direct course from the:
a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N.)
b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR. (Overlies V-9-E).
c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans, La., VOR 030° M radials. (Overlies V-20-N.).
f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114).
g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
h. New Orleans, La VOR via the Int of the New Orleans, La VOR 220° and the Lafayette, La VOR 102° M radials; to the Lafayette, La VOR (overlies Victor Airway 20 South).
i. From the New Orleans, La VOR via the Int of the New Orleans, La VOR 094° and the Picayune, Miss VOR 155° M radials; to the int of the Picayune, Miss VOR 155° M radial with Control Area Extension 1226.
j. From the Int of the Picayune, Miss VOR 155° and the New Orleans, La. VOR 116° M radials to the Int of the New Orleans, La VOR 116° M radial with Control Area Extension 1226.

36. Tampa, Fla., Terminal Area - That area within 20 nmi to either side of a direct course from the:
1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152).
2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
4. Ft. Myers, Fla VOR via direct St. Petersburg, Fla. VOR; to the Int of the St. Petersburg, Fla VOR 349° and the Ocala, Fla 233° M radials(overlies Victor Airways 35).
5. From the Ocala, Fla VOR 233° M radial to its int with the Cross City, Fla VOR 183° radial.
6. From the St. Petersburg, Fla VOR via the Int of St. Petersburg, Fla VOR 288° and the Cross City, Fla VOR 183° M radials; to the Int of the Cross City, Fla VOR 183° and the Ocala, Fla VOR 233° M radials.

37. From the St. Petersburg, Fla., VOR to the Int. of the St. Petersburg, Fla., VOR 274° M radial with Control Area Extension 1226.

38. From the Egmont Key, Fla., NDB via Control Area Extension 1226 to the Grand Isle, La, NDB.

39. From the Grand Isle, La., NDB via direct to the New Orleans, La., VOR.

40. From the Int. of J85-V and J41-V direct to the Egmont Key, Fla, NDB.

41. Green Federal Airway #1(From the Int. of G1 with U.S.-Canadian Border W of Millinocket. Me., to Int. of G1 with U.S.-Canadian Border NE of Millinocket, Me.)

42. Within 100 nmi radius of Guam rdo rng and 20 nmi either side of a rhumb line route as indicated below:
1. Honolulu/Guam
2. Guam/Wake
3. Guam/Manila

43. Pullman, Mich, VOR via direct Peck, Mich VOR; thence via the Peck, Mich VOR 078° M radial to the U.S./Canadian Border.

44. Cleveland Terminal Area - That area 20 nmi either side of the Cleveland 027° radial between Cleveland, Ohio, VORTAC and the U.S./Canadian Border.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Air Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections." Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

(16 August 1960)

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by

Route 15-D-3: Start direct at Hudsonth VOR, Texas to start low level point at 31-08N

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 40-14N, 93-36W (Entry - call Lamoni VOR); 40-25N, 92-07W; 42-21N, 90-54W; 43-28N, 91-00W; end nav leg 43-25N, 92-50W; to target 43-22-30N, 94-04W. Note: For a bomb run only, entry reporting will be 43-28N, 91-00W (Call Lone Rock VOR); remainder of route is identical as above.

Route 2-M-1: Start at 31-45N, 91-49W (entry-call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N, 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg). 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 8-J: Cross Florence VOR at flt alt (entry point - call Jacksonville ARTCC) descend to start low level 34-22N, 79-05W; 33-21N, 80-05W; 32-08N, 82-11W; 31-20N, 81-54W; 30-32N, 82-51W; 30-21N, 83-00W; 29-47N, 83-30W; 28-46N, 82-42W. Start climb to target Tampa/St. Petersburg.

Route 8-J Alternate: Cross Tallahassee L/F at flt alt (entry point - call Jacksonville ARTCC) descend to start low level 29-31N, 83-24W; 28-46N, 82-42W. Start climb to target Tampa/St. Petersburg.

Route 8-K: Cross Niagara Falls TACAN/TVOR at flt alt (entry point - call Cleveland ARTCC) descend to start low level 42-49N, 77-18W; 42-14N, 79-21W; 42-07N, 79-30W; 40-55N, 79-28W; 40-50N, 78-57W; 42-28N, 76-55W; 42-46N, 76-16W; 42-47N, 76-08W; 42-28N, 73-55W. Start climb to target Springfield. NOTE: This route is used by jet fighter aircraft on Sats and Suns.

Route 8-K Alternate: Cross Syracuse VOR at flt alt (entry point - call Boston ARTCC) descend to 42-28N, 73-55W. Start climb to target Springfield.

Route 8-M: Cross Columbia VOR at flt alt (entry point - call Columbia Radio) descend to 34-23N, 80-25W. Start climb to target Charlotte.

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 8-S: Cross Nantucket VOR at flt alt (entry point - call Boston ARTCC) descend to start low level at 41-23N, 70-03W; 41-12N, 67-25W; 42-30N, 66-40W; 43-00N, 68-30W; 43-38N, 68-44W; 43-53N, 68-17W. Start climb to target at 44-46N, 67-50W.

Route 8-S Alternate: Cross Brunswick TVOR at flt alt (entry point - call Boston ARTCC) descend to start low level at 43-53N, 68-18W. Start climb to target 44-46N, 67-50W.

Route 8-T: Cross St. Petersburg VOR at flt alt (entry point - call Tampa Approach Control) descend to start low level at 27-33N, 83-16W; 27-30N, 84-43W; 27-24N, 84-51W; 26-10N, 85-00W; 26-00N, 84-51W; 25-51N, 81-41W; 25-56N, 81-32W; 26-57N, 81-03W; 27-01N, 81-03W. Start climb to target at 27-39N, 81-16W.

Route 8-T Alternate: Cross Ft. Myers VOR flt alt (entry point - call Miami ARTCC) descend to start low level at 25-51N, 81-41W; 25-56N, 81-32W; 26-57N, 81-03W. Start climb to target at 27-39N, 81-16W.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15 - A - 3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descent 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point) - (Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-25W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-53N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

RADAR WEATHER ADVISORY SERVICE(STAR GAZER) - On page 31 of the Flight Information Manual Volume 13 dated December 1959, Radar Weather Advisory Service(Star Gazer) will be discontinued on August 1, 1960, in the geographical area bounded by the following coordinates: 40-00N, 120-47W; NW to 41-25N, 121-50W; N to 45-50N, 121-50W; NE to 46-30N, 121-00W; N to a point on the U.S.-Canadian Border at 121-00W; thence E along the U.S.-Canadian Border to a point 113-25W; S to 42-00N, 113-25W; W to 42-00N, 119-25W; SW to the point of beginning.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

RADAR WEATHER ADVISORY SERVICE- On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.

GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

AIR ROUTE TRAFFIC CONTROL CENTERS FREQUENCY CHANGES: On or about 15 Aug. 1960, the following ARTCC will accomplish frequency changes as follows:

Location	Freq. Mc. New	Old	Function
ALBUQUERQUE CENTER:			
Albuquerque, N. M.	128.10	125.30	I
" "	126.90	120.30/132.20	I

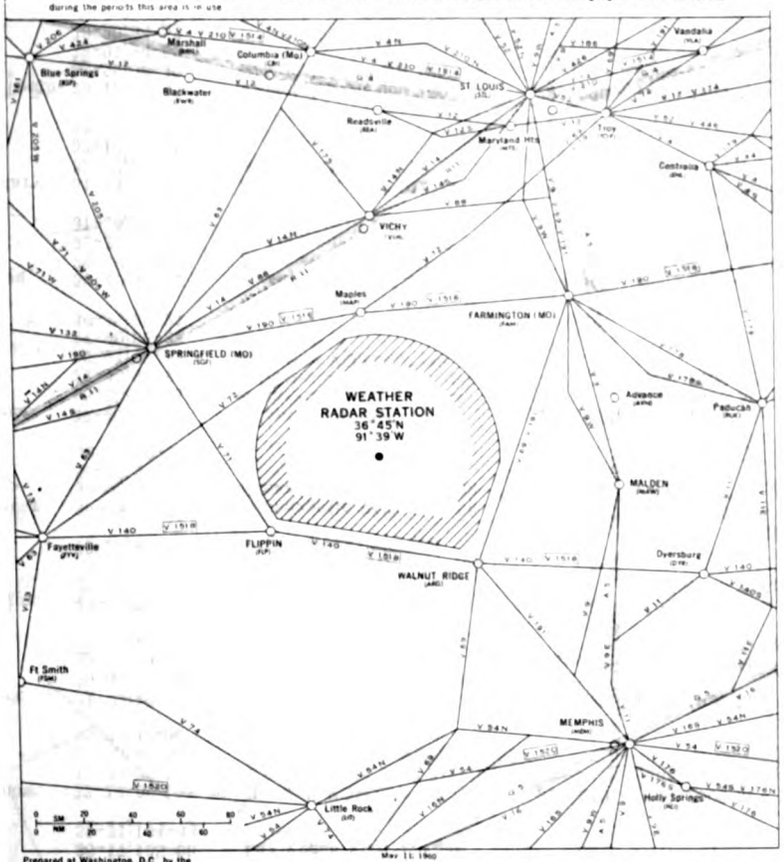
H - High Altitude
I - Intermediate Altitude

SPECIAL NOTICE

CUMULUS CLOUD RESEARCH PROJECT

EFFECTIVE MAY 15 THROUGH AUGUST 31 ANNUALLY

Beginning May 15 and ending August 31 annually a cumulus cloud research operation will be conducted within a 50 statute mile radius of a weather radar station located 13 statute miles east of West Plains Missouri at 36°45' N - 91°39' W, excluding airways.



All flight operations will be conducted outside of controlled airspace. Hours of operation will be from 1400Z to 0300Z. Three Cessna 172 aircraft will operate VFR in the western portion of the area at selected altitudes between the surface and 11,500 feet MSL. One Beechcraft D18 will operate VFR or IFR throughout the area between the surface and 21,000 feet MSL as the weather and selected flight profiles dictate.

Flight operations will be conducted on days selected at random during the three and one half month period each year. Specific information concerning the operations will be issued by NAFAC each day the flights will operate.

Other aircraft proposing flight within the designated area may obtain current information concerning these operations from the following FAA facilities:

St Louis, Mo FSS — Springfield, Mo CS/T — Malden, Mo FSS — Walnut Ridge, Ark FSS — Memphis, Tenn ARTCC
Vichy, Mo FSS — Farmington, Mo FSS — Flippin, Ark FSS — St Louis, Mo ARTC

The flight service stations listed above will broadcast appropriate information concerning the operation following regular weather broadcasts during the periods this area is in use.

Prepared at Washington, D.C. by the U.S. Coast and Geodetic Survey

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC/TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is August 28, 1960:

No.	Nickname	Area Boundary Coordinates	Ingress/Egress Reporting Points Bear. & Dist. (n mi.)	Utilization Flight Levels	Times (Greenwich), Days

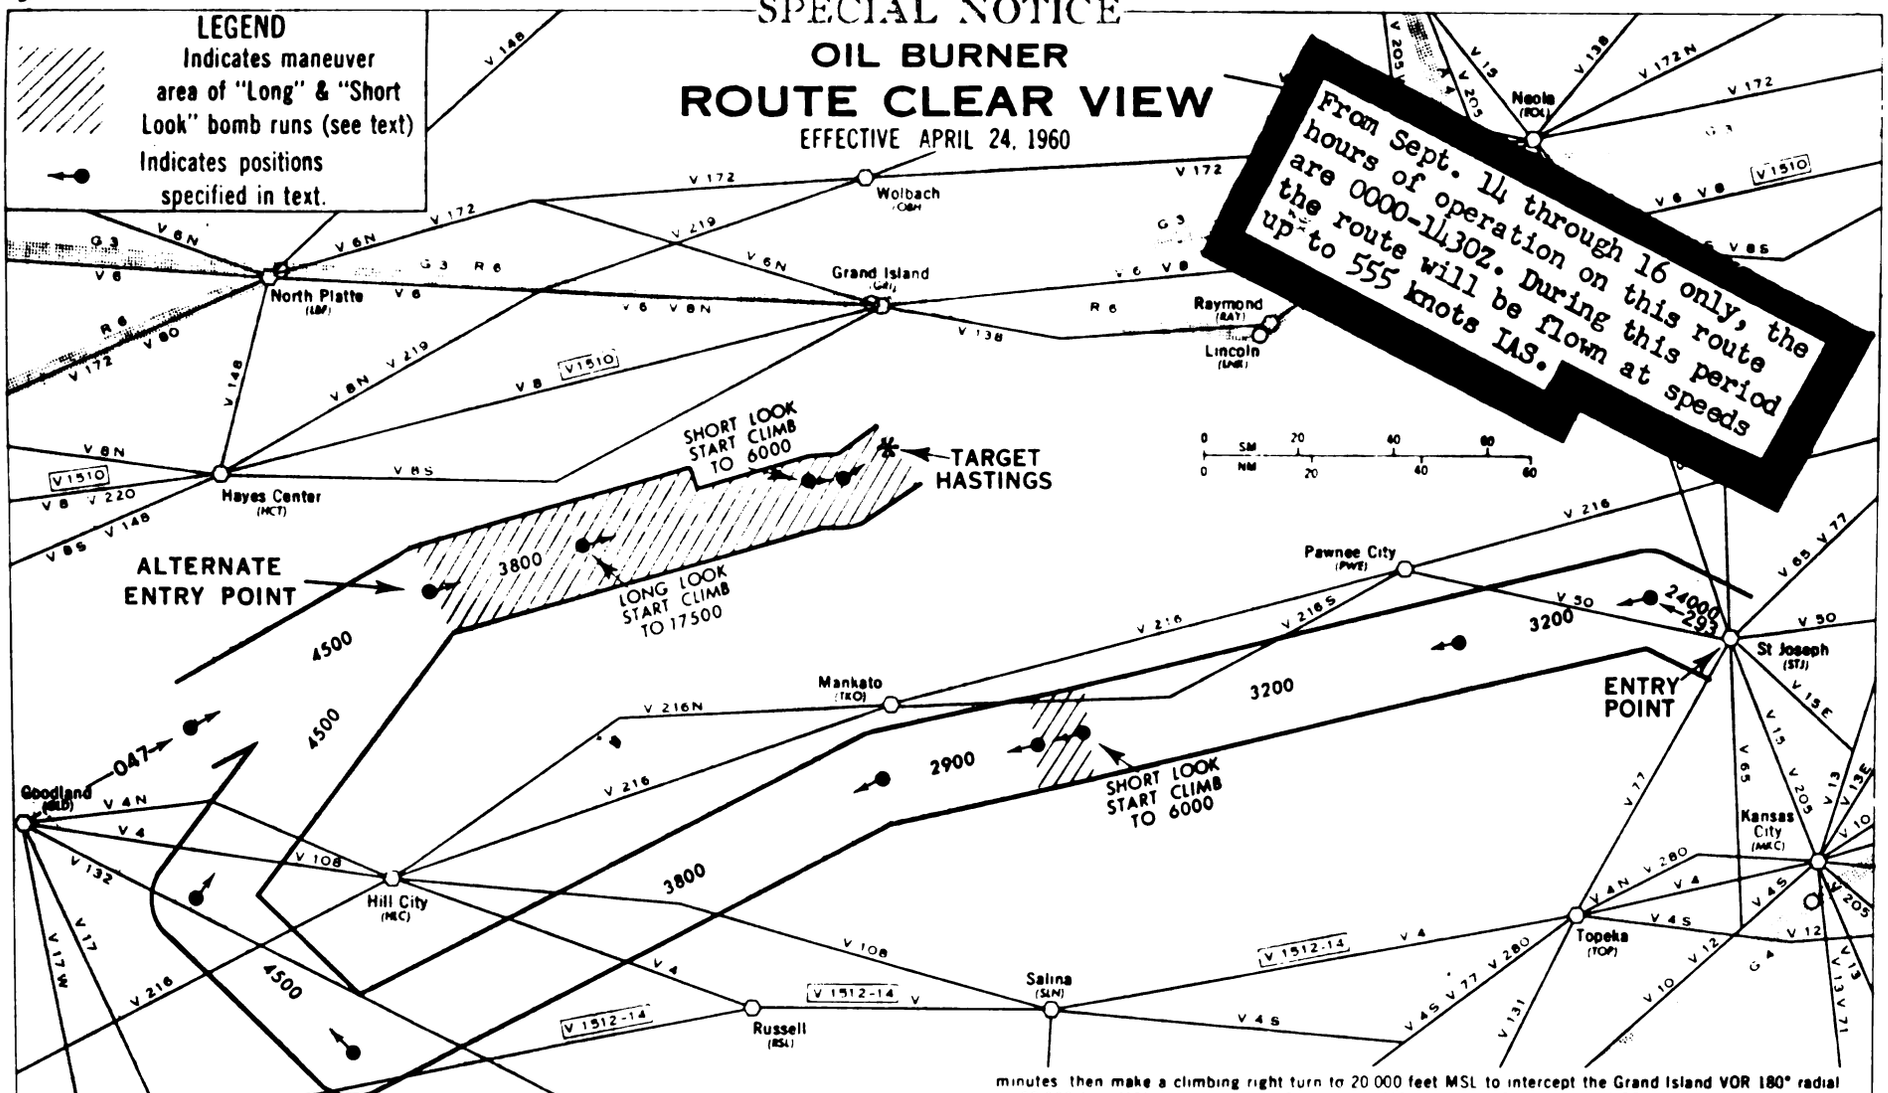
SECOND ANNUAL GENERAL AVIATION FLY-IN: All pilots are invited to attend the second annual general aviation "fly in" to be held October 1, 1960 at the Federal Aviation Agency's National Aviation Facilities Experimental Center at Atlantic City, New Jersey."

SKY SHIELD EXERCISE: Effective September 10, 1960 between 0600Z and 1200Z a large scale air defense exercise to be known as SKY SHIELD will be conducted regardless of weather. The exercise will encompass the entire North American Continent North of the Mexican Border. The Administrator of FAA has determined that in the interest of safety, non-participating aircraft should not operate in the continental U.S. and Alaska during the exercise period. Pilots must plan their flights so as to be on the ground or outside the exercise area by 0600Z giving consideration to possible delay factors such as weather, departure delays, etc. During the early phase of the exercise, participating aircraft will be operating at all altitudes out to approximately 600 nmi from the coastline. Aircraft bound for the continental U.S. including Alaska will not be issued an Air Traffic Control clearance to approach closer than 150 miles to the Coast prior to 1200Z since flight in the offshore area will be hazardous during the entire exercise period.

NAVIGATIONAL WARNING-USAF OPERATION "OIL BURNER". USAF (Strategic Air Command) is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during times specified for each route.



(16 August 1960)

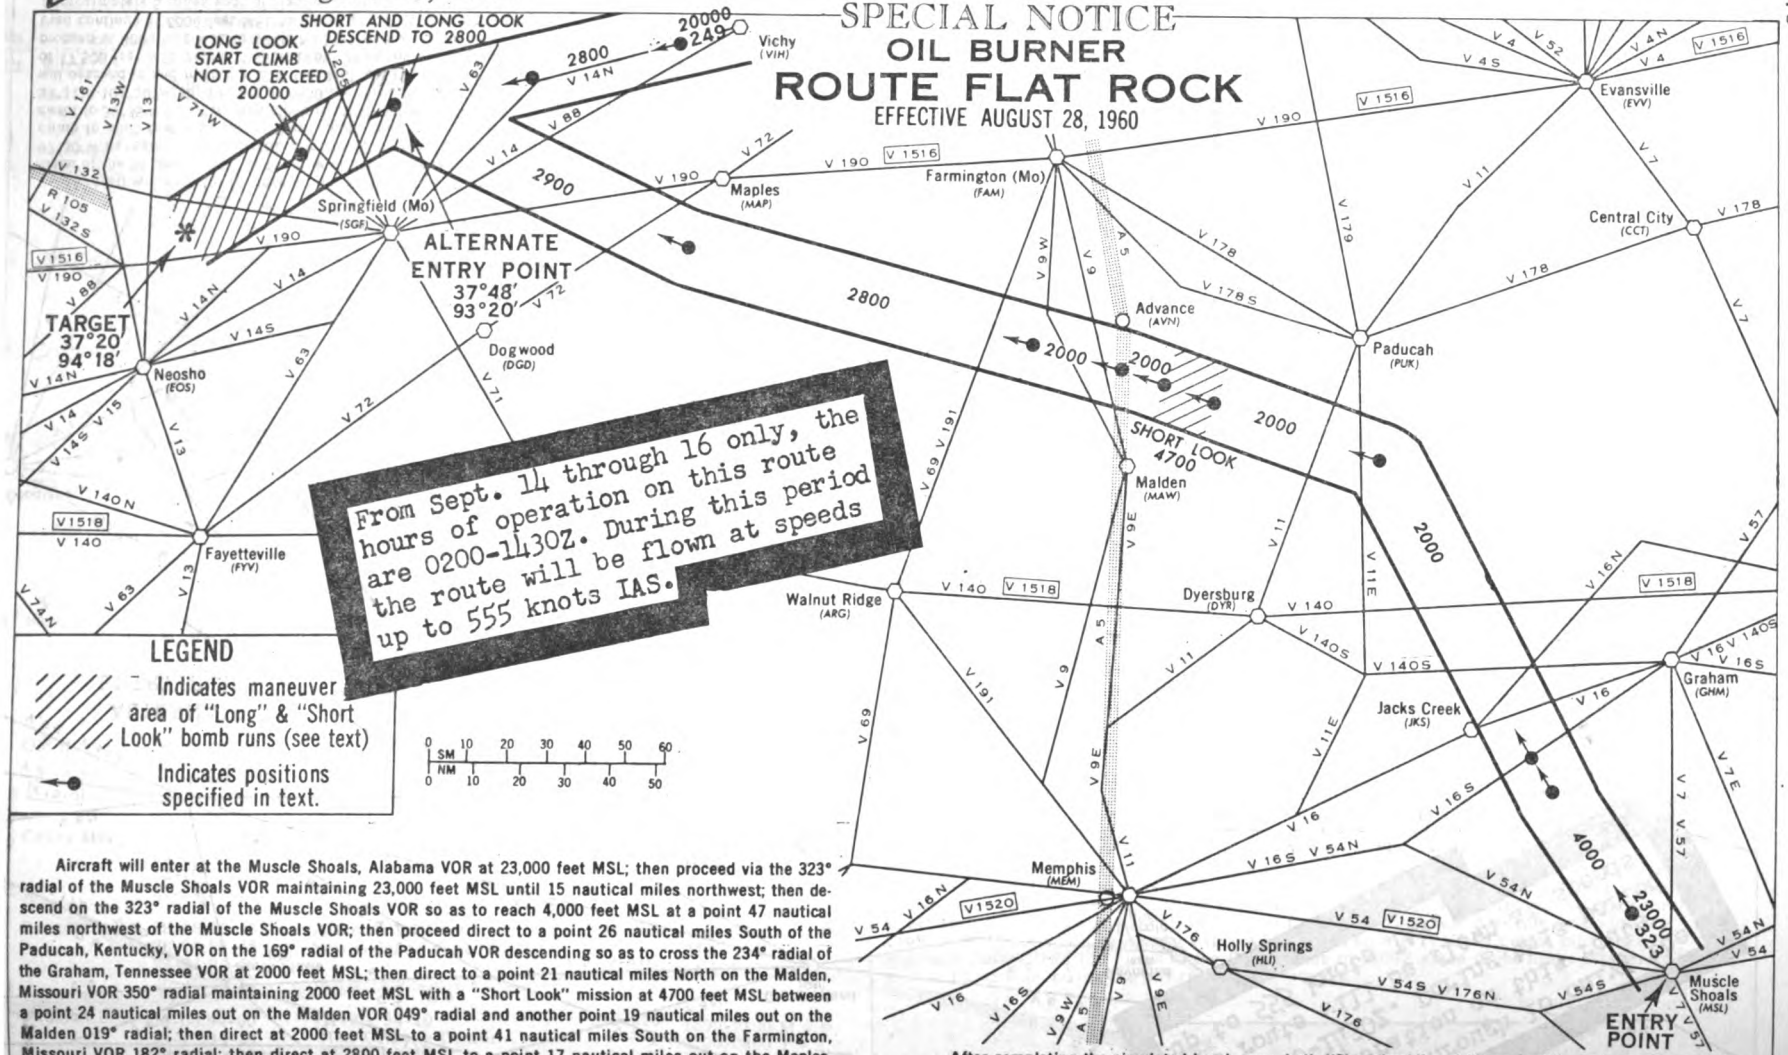
OIL BURNER

ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above, then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W, then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL then maintain 20,000 feet MSL direct to Grand Island VOR, then direct to Wolbach, Nebraska VOR. "Short Look" missions after passing the RBS site will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial, then proceed direct to Grand Island VOR then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.

Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route.



The route width from 99°00'W to the target is five statute miles on the north side of the route centerline and ten statute miles on the south side of the route centerline.

Prepared at Washington, D.C., by the U. S. Coast and Geodetic Survey

Effective August 28, 1960

SPECIAL NOTICE
OIL BURNER
ROUTE FLAT ROCK
EFFECTIVE AUGUST 28, 1960

Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 26 nautical miles South of the Paducah, Kentucky, VOR on the 169° radial of the Paducah VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°20′N-94°18′W maintaining 2,800 feet MSL to a point 33 nautical miles out on the Neosho, Missouri VOR 009° radial; then climb so as to cross the target at 4,700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point-Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48′30″N-93°20′W thence continue on Flat Rock route.

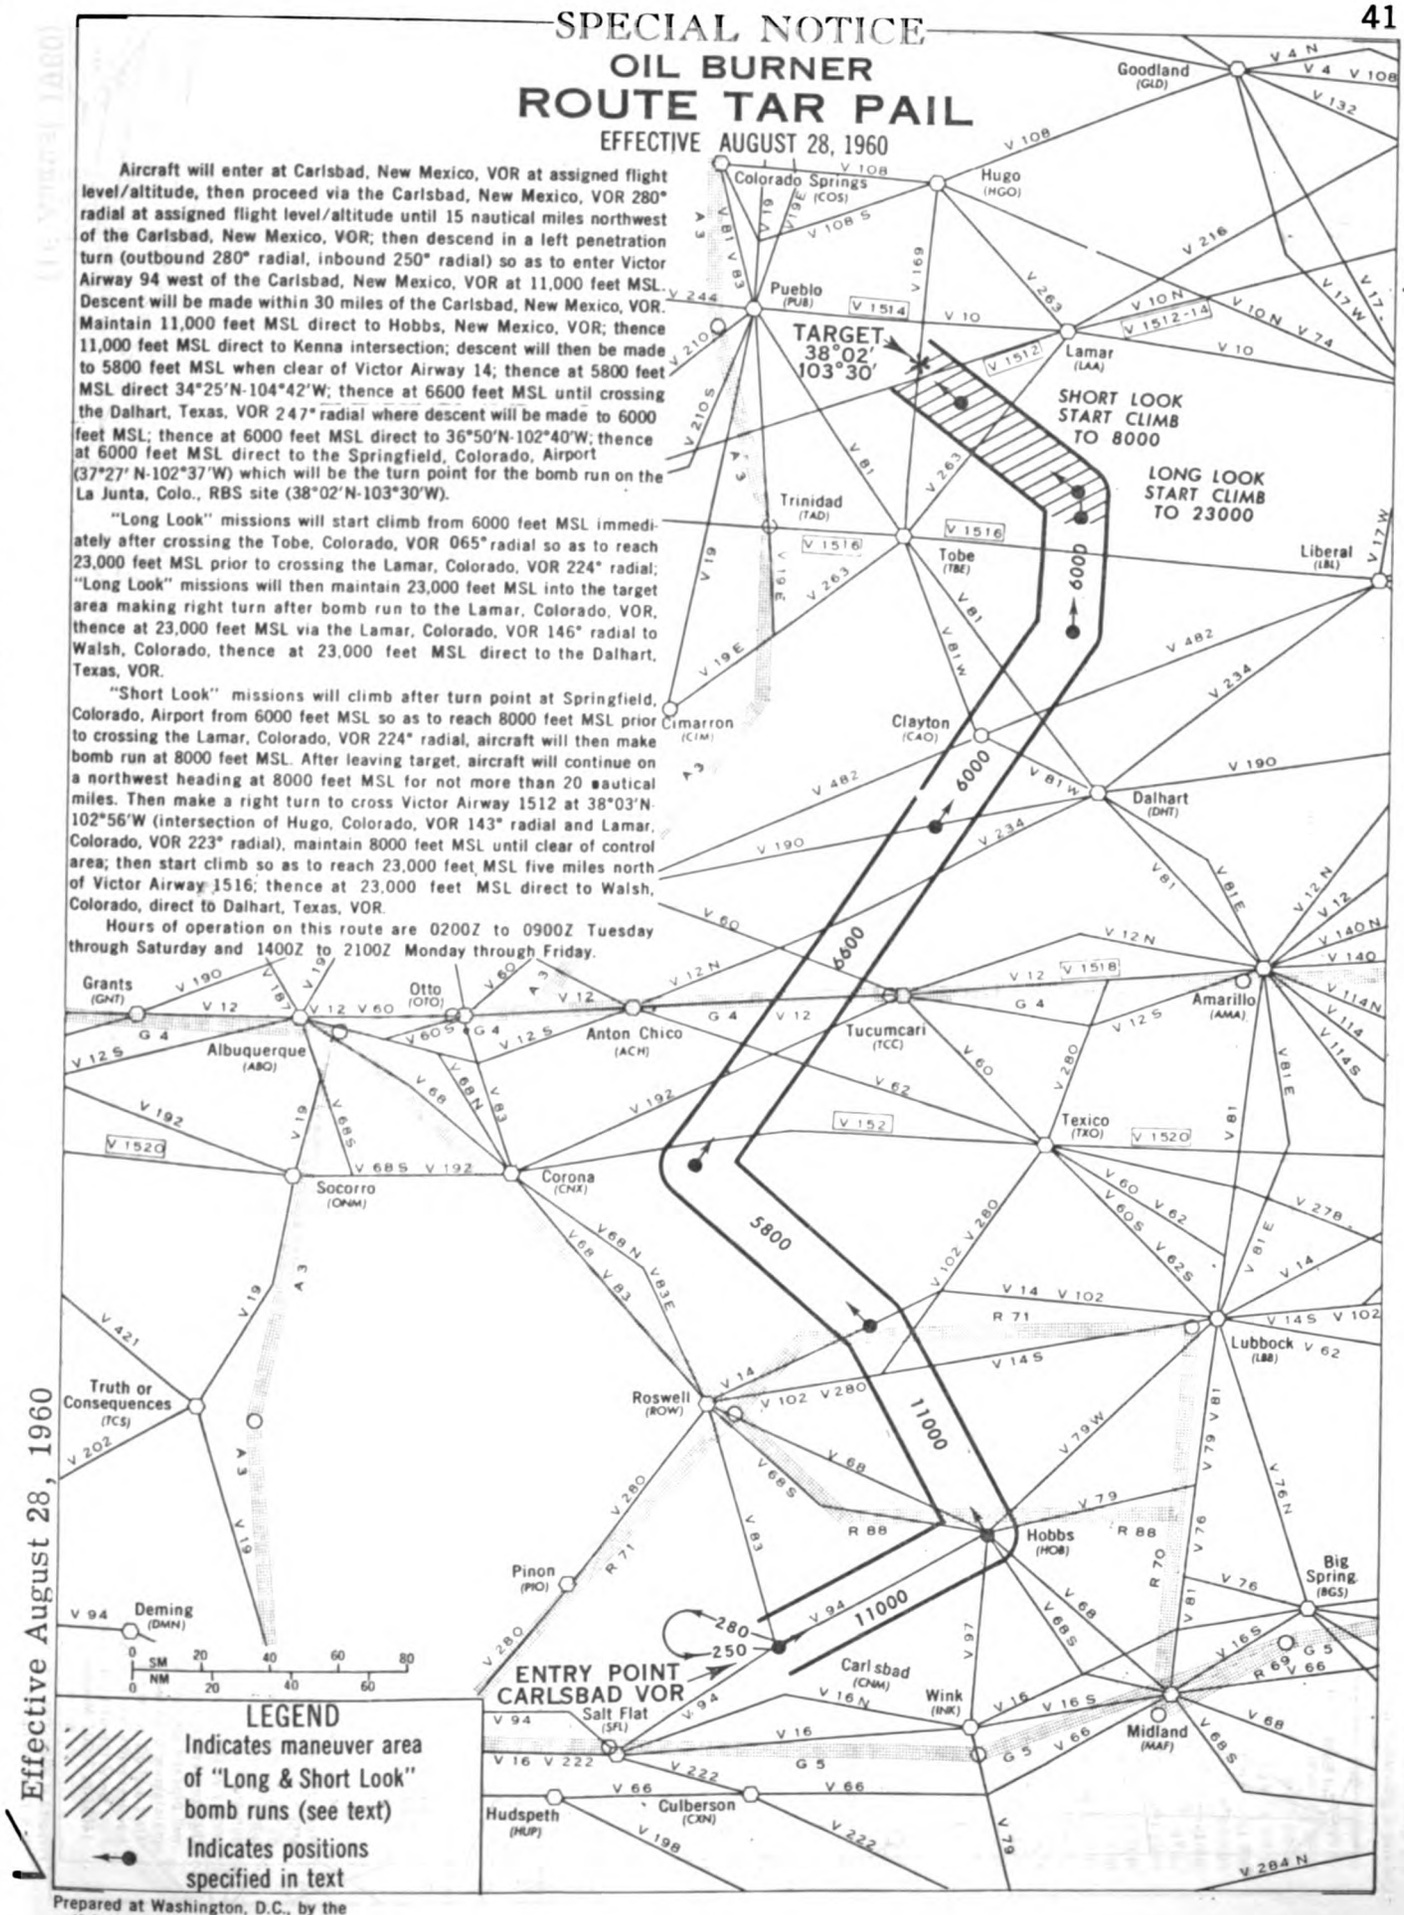
OIL BURNER
ROUTE TAR PAIL

EFFECTIVE AUGUST 28, 1960



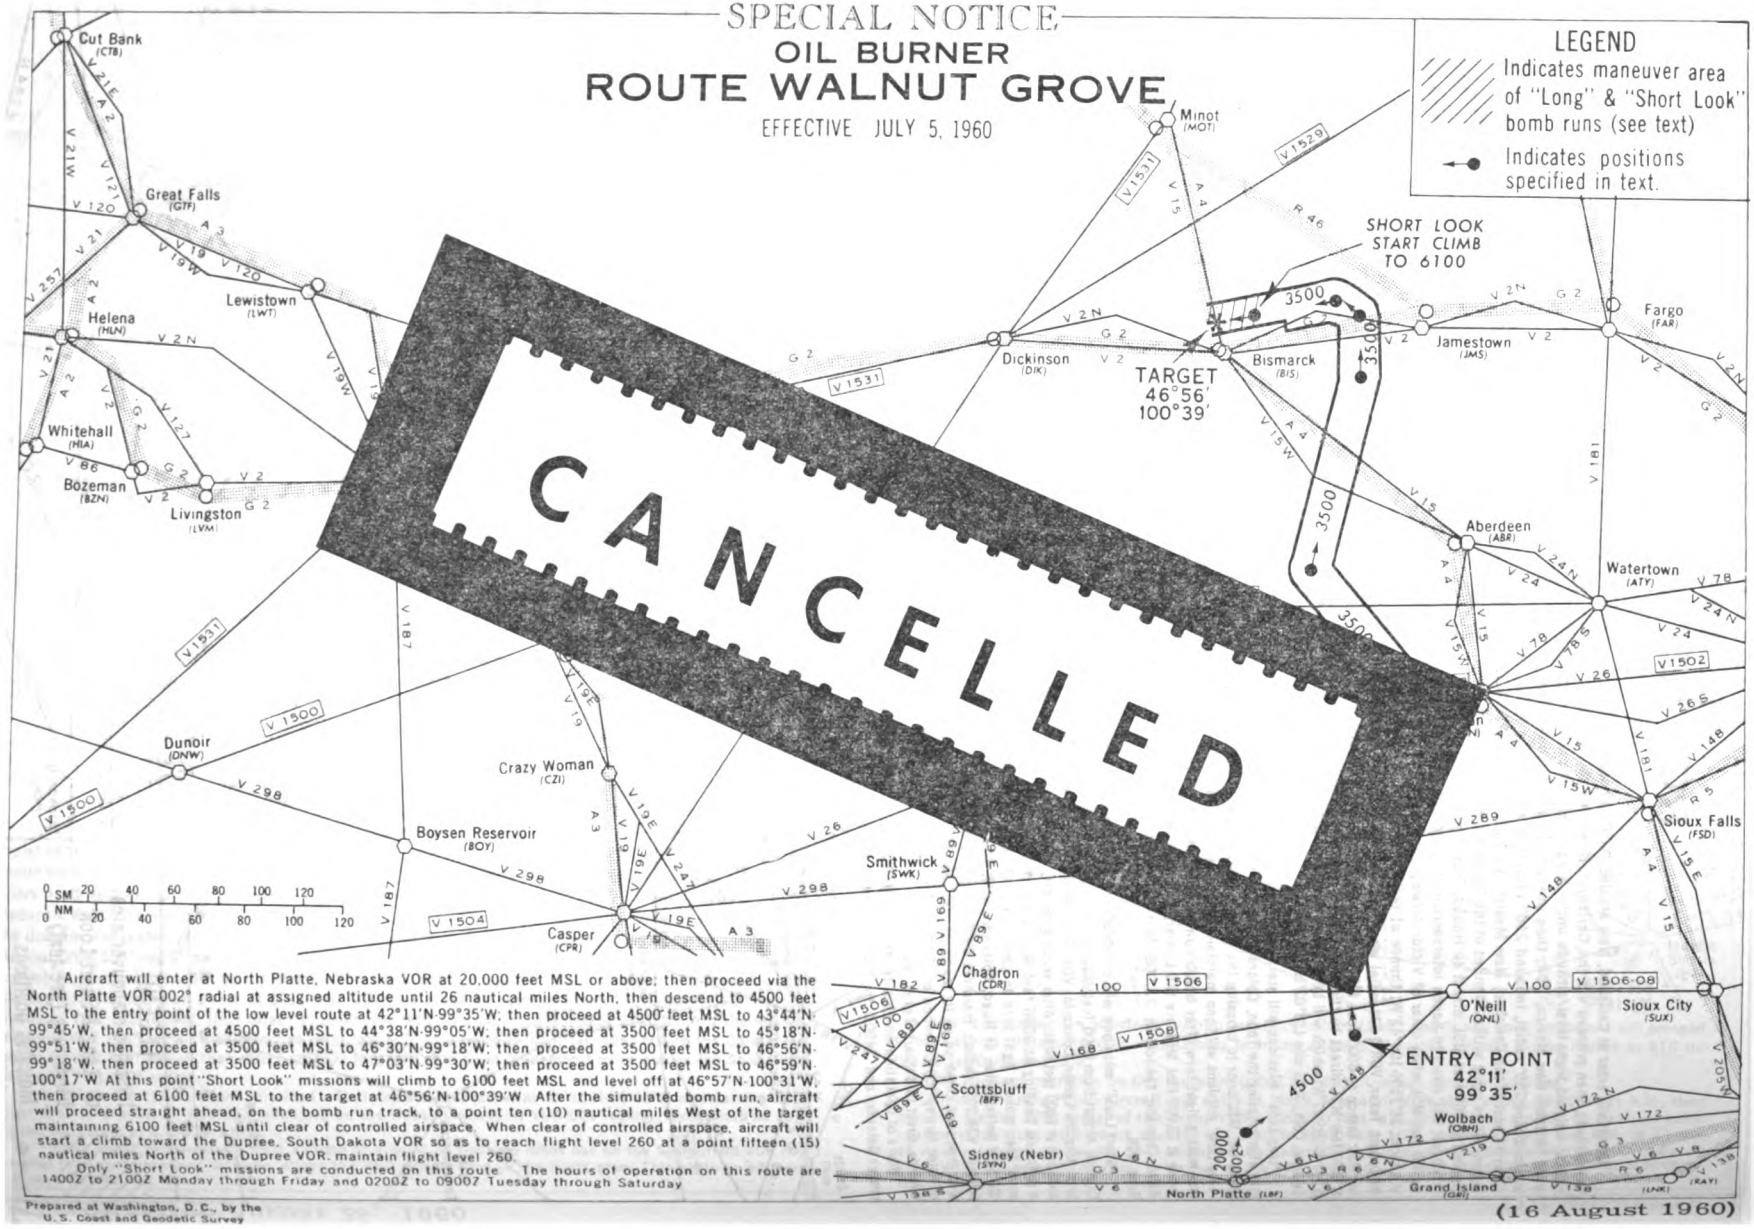
(16 August 1960)

Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to enter Victor Airway 94 west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Dalhart, Texas, VOR 247° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W; thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27'N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 065° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial; "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N-102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.



Effective August 28, 1960

OIL BURNER
ROUTE WALNUT GROVE

EFFECTIVE JULY 5, 1960

Aircraft will enter at North Platte, Nebraska VOR at 20,000 feet MSL or above; then proceed via the North Platte VOR 002° radial at assigned altitude until 26 nautical miles North, then descend to 4500 feet MSL to the entry point of the low level route at 42°11'N-99°35'W; then proceed at 4500 feet MSL to 43°44'N-99°45'W, then proceed at 4500 feet MSL to 44°38'N-99°05'W; then proceed at 3500 feet MSL to 45°18'N-99°51'W, then proceed at 3500 feet MSL to 46°30'N-99°18'W; then proceed at 3500 feet MSL to 46°56'N-99°18'W, then proceed at 3500 feet MSL to 47°03'N-99°30'W; then proceed at 3500 feet MSL to 46°59'N-100°17'W. At this point "Short Look" missions will climb to 6100 feet MSL and level off at 46°57'N-100°31'W, then proceed at 6100 feet MSL to the target at 46°56'N-100°39'W. After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, to a point ten (10) nautical miles West of the target maintaining 6100 feet MSL until clear of controlled airspace. When clear of controlled airspace, aircraft will start a climb toward the Dupree, South Dakota VOR so as to reach flight level 260 at a point fifteen (15) nautical miles North of the Dupree VOR, maintain flight level 260.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 14002 to 21002 Monday through Friday and 02002 to 09002 Tuesday through Saturday.

ROUTE GOLF TEE

EFFECTIVE AUGUST 14, 1960

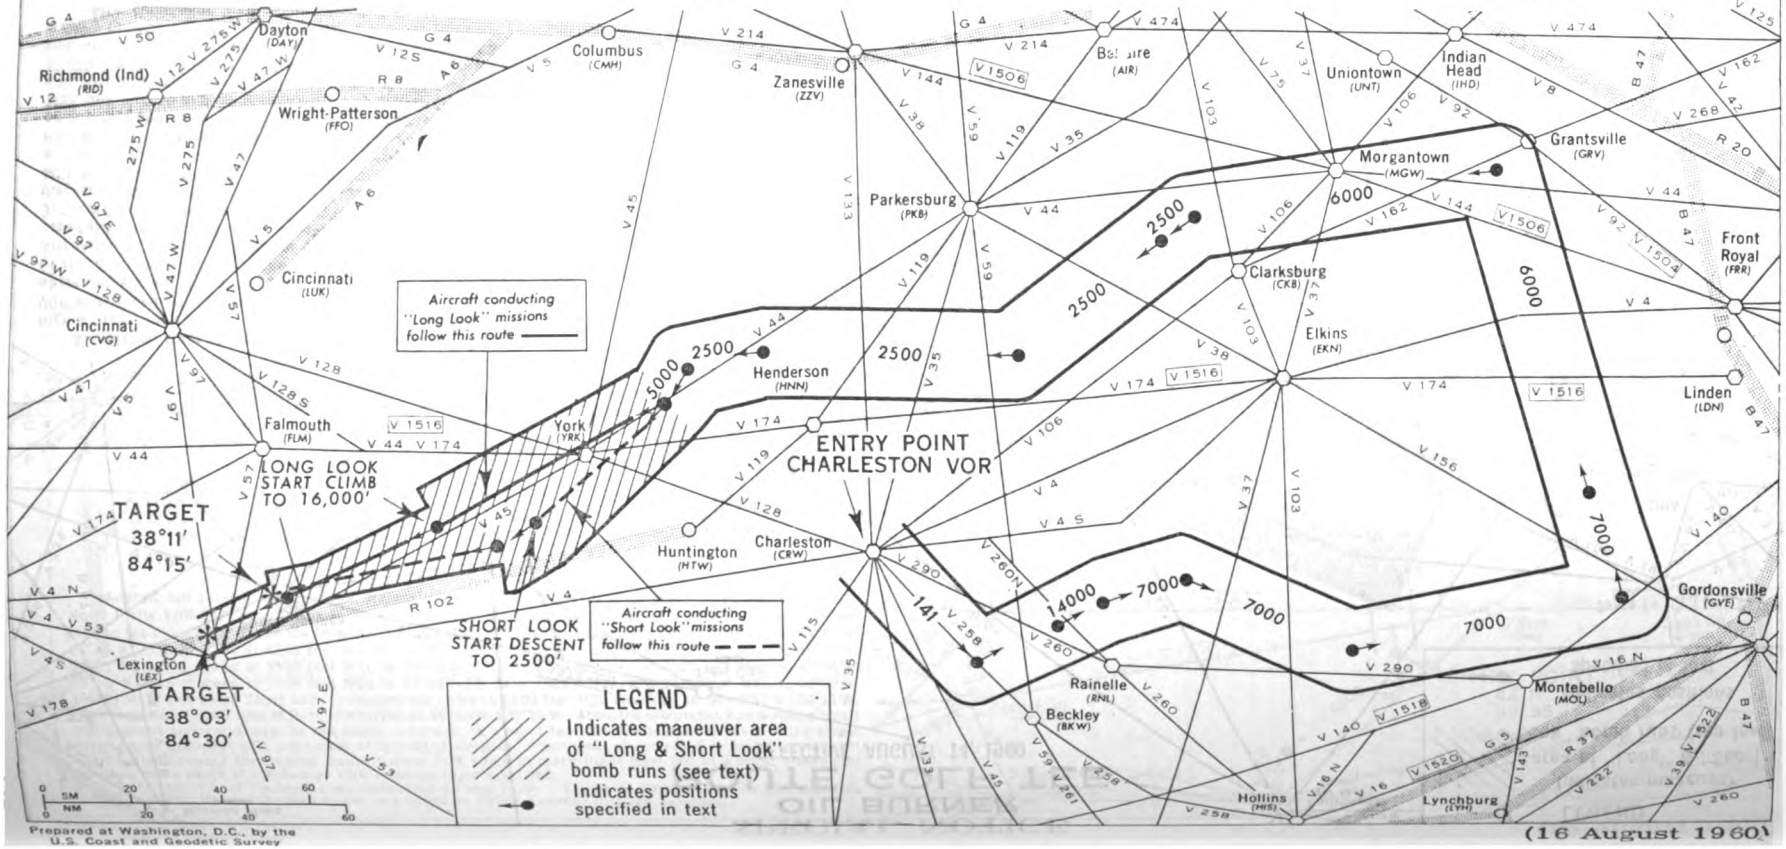
Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Cochise, Arizona VOR, continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W, then at 12,400 feet MSL to 34°05'N-107°39'W, then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs, all aircraft will proceed direct to 35°24'N-110°44'W at either 9,500 feet MSL or 16,000 feet MSL. At this point north, east, or southbound flights will climb to Flight Level 250 on a direct course to 36°11'N-109°35'W. Westbound flights will climb to Flight Level 250 on a direct course to Needles VOR. Northwestbound "Short Look" flights will climb on a direct course to Tuba City VOR, direct Bryce Canyon VOR, climbing so as to reach 16,000 feet MSL five miles south of Victor 210; maintain 16,000 feet MSL until five miles north of Victor 210; then climb so as to reach Flight Level 250 twenty miles south of Bryce Canyon VOR. Northwestbound "Long Look" flights will proceed on a direct course to Tuba City VOR, direct Bryce Canyon VOR, maintaining 16,000 feet MSL until five miles north of Victor 210, then climb so as to reach Flight Level 250 twenty miles south of Bryce Canyon VOR. The hours of operation on this route are 0600Z-1300Z Tues through Sat, "Long Look" and "Short Look" missions. From 1700Z-2400Z Mon through Fri, "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude, then start a right descending turn to reach 13,000 feet MSL at 34°10'N 109°25'W, then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W. Balance of flight will be the standard Golf Tee route.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

SPECIAL NOTICE

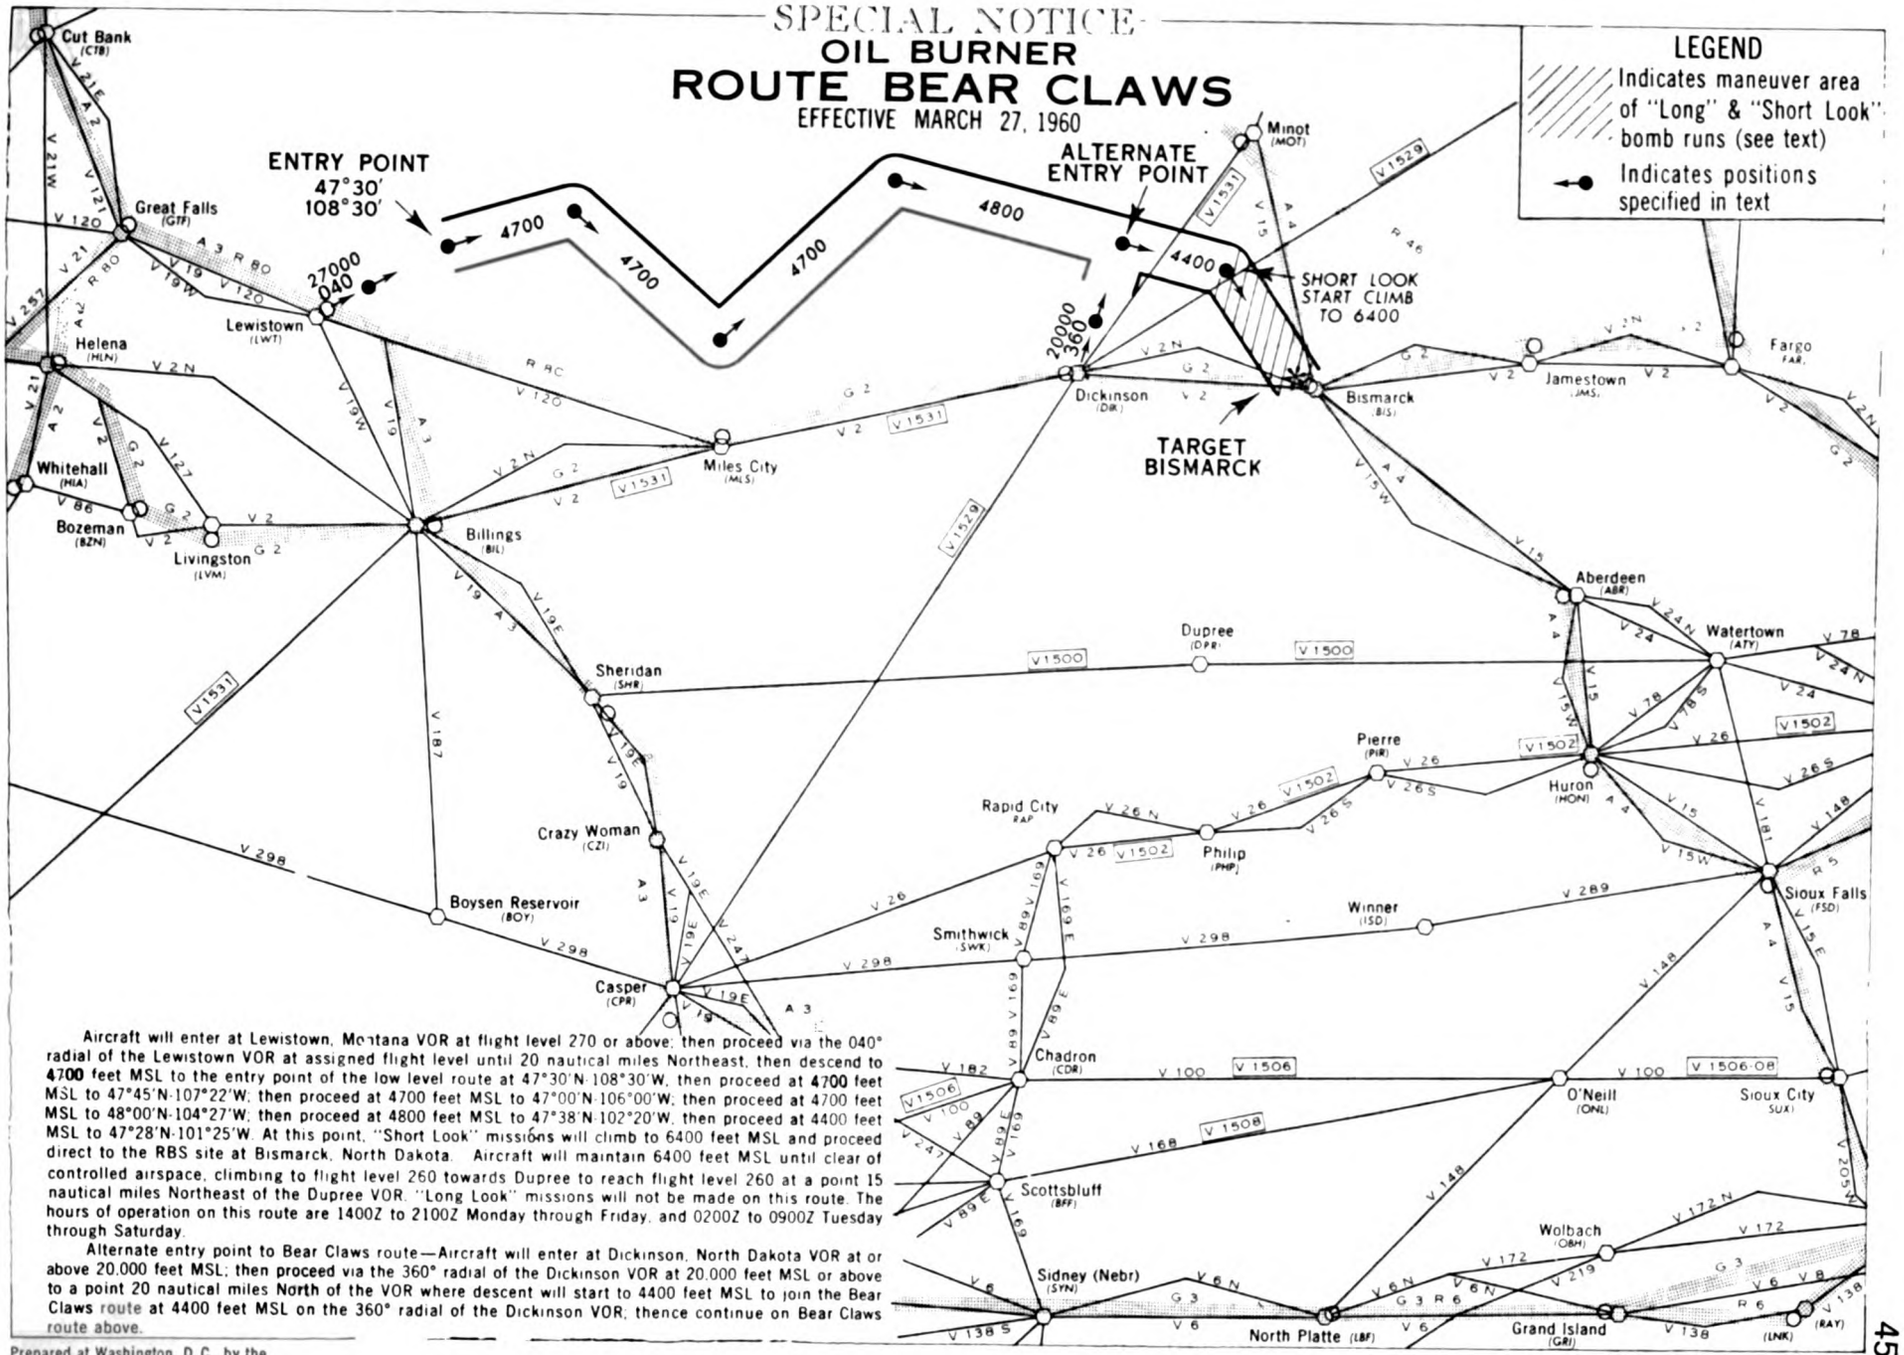


OIL BURNER
ROUTE GREEN VALLEY
EFFECTIVE July 31, 1960

Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240; and proceed via the 141° radial of the Charleston VOR to 37°59'N-81°22'W, maintaining assigned flight level to this point. Then proceed to 38°08'N-81°00'W descending to cross this point at 19,000' MSL or above. Aircraft will then continue descent to cross 38°12'30"N-80°49'W at 14,000' MSL; and to cross 38°16'N-80°30'W at 7,000' MSL, then proceeding to 38°01'N-79°49'W at 7,000' MSL; then to 38°11'N-78°41'30"W at 7,000' MSL; then to 38°32'N-78°49'W at 7,000 MSL; descend to 6,000' MSL immediately after passing 38°32'N-78°49'W; then at 6,000 feet MSL to 39°33'N-79°10'W; then 39°25'N-80°27'W at 6,000' MSL; then descending to cross 39°21'N-80°34'W at 2,500' MSL; then to 38°59'N-81°11'W at 2,500' MSL; then to 38°59'N-82°14'W at 2,500' MSL; then to 38°51'N-82°33'W at 2,500' MSL; then climbing to cross 38°49'N-82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N-82°38'W to 38°26'N-83°09'W; then descend to cross 38°22'N-83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N-84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL; then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL; cross Louisville VOR 050° radial at 17,000' MSL, maintaining this altitude until after crossing Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 280.

"Long Look" Missions will proceed from 38°49'N-82°38'W; maintaining 5,000' to 38°25'N-83°34'W; then climb to cross 38°10'N-84°11'W at 16,000' MSL; then to the target at 38°03'N-84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 322° radial, still at 16,000' MSL; then climb on the Lexington VOR 322° radial so as to cross Louisville VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL; maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310. At end of navigation points (Short Look 38°22'N-83°18'W, and Long Look 38°25'N-83°34'W) route widths reduced from 20 statute miles to 10 statute miles to target.



The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday.

SPECIAL NOTICE

OIL BURNER
ROUTE BEAR CLAWS

EFFECTIVE MARCH 27, 1960

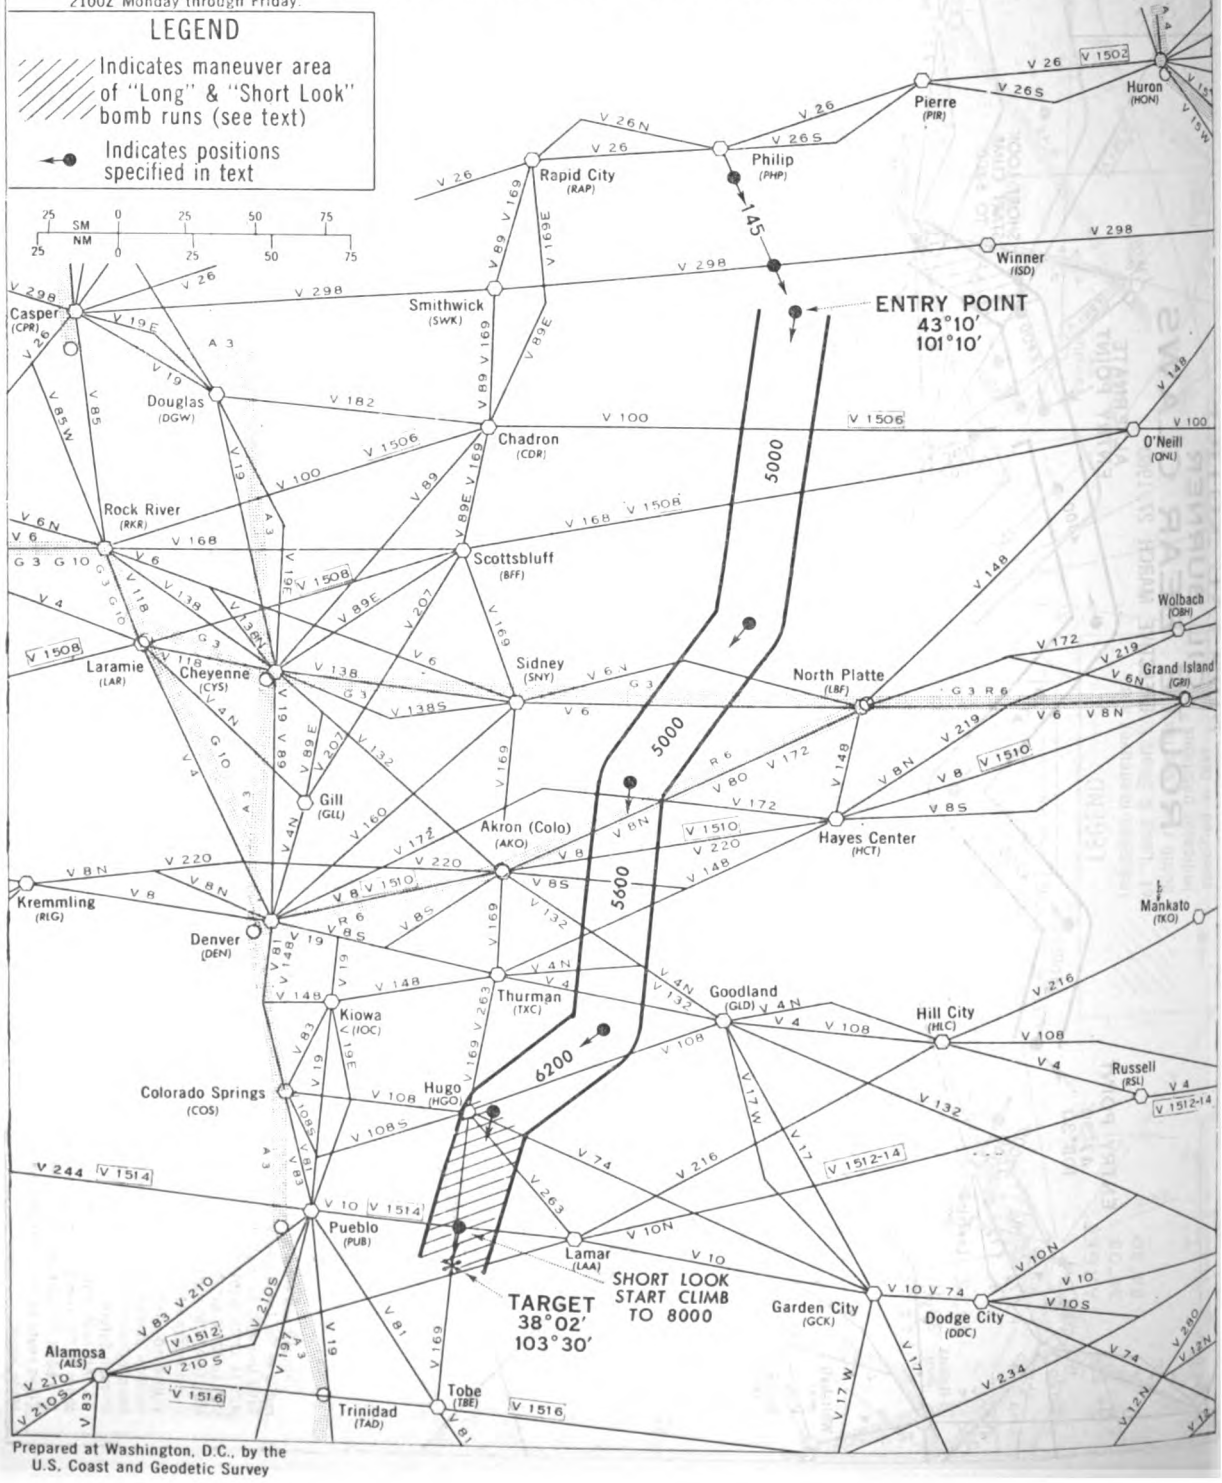
Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast, then descend to 4700 feet MSL to the entry point of the low level route at 47°30′N-108°30′W, then proceed at 4700 feet MSL to 47°45′N-107°22′W; then proceed at 4700 feet MSL to 47°00′N-106°00′W; then proceed at 4700 feet MSL to 48°00′N-104°27′W; then proceed at 4800 feet MSL to 47°38′N-102°20′W, then proceed at 4400 feet MSL to 47°28′N-101°25′W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL; then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above.

Prepared at Washington, D.C., by the
U. S. Coast and Geodetic Survey

(16 August 1960)

SPECIAL NOTICE



OIL BURNER

ROUTE ROUGH WOOD

EFFECTIVE JUNE 19, 1960

Aircraft will enter at Philip, South Dakota, VOR at assigned altitude/flight level (between 20,000 feet MSL and flight level 250); then proceed via the Philip VOR 145° radial, maintaining assigned altitude until 10 nautical miles southeast of the Philip VOR where descent will start to 5,000 feet MSL, crossing 43°26'N-101°20'W at or below 13,000 feet MSL, proceeding direct to low-level entry point at 43°10'N-101°10'W; then at 5,000 feet MSL direct to 41°30'N-101°30'W; then at 5,000 feet MSL direct to 40°40'N-102°20'W; then at 5,600 feet MSL direct to 39°19'N-102°29'W; then at 6,200 feet MSL direct to 38°52'N-103°13'W; then at 6,000 feet MSL direct to the La Junta, Colorado RBS site at 38°02'N-103°30'W; aircraft will start climb when crossing the Lamar, Colorado VOR 252° radial and reach 8,000 feet MSL when crossing the Lamar VOR 247° radial; maintain 8,000 feet MSL over the La Junta, Colorado RBS Site; turn left to a direct course to Walsh, Colorado, maintain 8,000 feet until five nautical miles southeast of Victor Airway 169; then climb on a direct course to Walsh, Colorado so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; maintain 23,000 feet MSL direct to Dalhart, Texas, VOR.

"Short Look" missions only authorized over this route. Hours of operation are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

SPECIAL NOTICE

SPECIAL NOTICE

OIL BURNER

ROUTE HANG OVER

EFFECTIVE JULY 17, 1960

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Alternate entry to "Hang Over" route - Aircraft will enter at Massena, N.Y. VOR at flight level 290, then proceed via the 160° radial of the Massena VOR maintaining flight level 290, after crossing the 280° radial of the Burlington, Vermont VOR descent will be started to 5,000 feet MSL; continue on the 160° radial of the Massena VOR and cross the Burlington VOR 267° radial at 23,500 feet MSL, cross the Burlington VOR 250° radial at 14,500 feet MSL; at this point turn right to intercept the 010° radial of the Albany, New York VOR; continue descent on the Albany VOR 010° radial to its intersection with the Benson, Vermont VOR 287° radial; at this point make a standard right turn to intercept the "Oil Burner" "Hang Over" route at 43°46′N-74°25′W. Aircraft will be at 5,000 feet MSL prior to crossing the 74°W longitude. Remainder of flight via the "Hang Over" route.

U. S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER

ROUTE IVORY TOWER

EFFECTIVE JULY 5, 1960

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday.

SPECIAL NOTICE

OIL BURNER

ROUTE IRON MAN

EFFECTIVE JULY 3, 1960

Aircraft will enter at the Traverse City, Michigan VOR at 23,000 feet MSL or above as assigned by the Detroit Center. Maintain assigned altitude to a point 31 nautical miles out on the 360° radial of the Traverse City VOR; then descend to 2200 feet MSL direct to 46°01'N-85°37'W, maintain 2200 feet MSL direct to 46°41'N-85°38'W, then proceed at 1700 feet MSL direct to Manitou Is. (47°25'N-87°35'W), then proceed at 2500 feet MSL direct to Cumberland Pt. (47°52'N-89°16'W), then proceed at 3000 feet MSL direct to Tom Lake (47°56'N-90°04'W), then proceed at 3000 feet MSL direct to 47°25'N-91°05'W, then proceed at 2000 feet MSL direct to Bark Pt. (46°53'N-91°11'W), then proceed at 2800 feet MSL direct to 45°55'N-91°42'W, then proceed at 2900 feet MSL to 45°32'N-91°02'W, maintain 2900 feet MSL to Short Look start climb point at 46°18'N-90°18'W. At this point start climb to Short Look bomb altitude of 6000 feet MSL reaching 6000 feet MSL at 46°21'N-90°15'W. Target located at 46°24'N-90°14'W. After bombs away maintain 6000 feet MSL and bomb run heading to 46°49'N-89°48'W. At this point start climb to 22,000 feet MSL maintaining bomb run heading until intersecting the 270° radial of Houghton, Michigan, VOR, then proceed inbound to Houghton, Michigan via the 270° radial of Houghton, Michigan, crossing the Houghton, Michigan, VOR at 22,000 feet, contact Detroit ARTCC for further clearance.

Route width reduced to 5 statute miles either side of center line from Cumberland Pt. to Tom Lake, and on the south side only from Tom Lake to 47°25'N-91°05'W, and on both sides from 46°05'N-90°31'W to target.

Hours of operation are 2000Z to 1000Z Monday through Saturday.

Alternate Entry to Iron Man route. Aircraft will cross the Eau Claire, Wisconsin, VOR at 23,000 or below, descending to 2900 MSL on the 022° radial of Eau Claire, Wisconsin, VOR to join the "Iron Man" route at 2900 MSL at 45°32'N-91°02'W, then continue on "Iron Man" route.

✓ HOLDING PATTERNS: The following holding patterns have been established

✓ OKMULGEE VOR SHUT DOWN: During shutdown use the following:

HOLDING PATTERNS: The following holding patterns have been established, modified or cancelled effective 22 September 1960:

ESTABLISHED:

(1) BAKERSFIELD, CALIF LOM: direction of holding - SE on SE crs ILS; direction of turns- left; time - 1 min; MHA - 2000'.

(2) GARY, LA(VHF) INT: direction of holding - W on 269 M rad New Orleans, La. VOR; direction of turns-right; time - 1 min; MHA - 1200'.

(3) WAVE, LA(VHF) INT: direction of holding - N on 351 M rad New Orleans, La. VOR; direction of turns-right; time - 1 min; MHA - 1400'.

(4) LIZARD, LA(LF) INT: direction of holding - SW on 208 M brg from New Orleans, La. LFR; direction of turns-right; time - 1 min; MHA - 1000'.

(5) DOVE, TEX(VHF) INT: direction of holding - E on 080 M rad El Paso, Tex, VOR; direction of turns-left; time - 1 min; MHA - 8000'.

(6) LIZARD, LA(VHF) INT: direction of holding - SW on 208 M rad New Orleans, La. VOR; direction of turns-right; time - 2 mins; MHA - 2000'.

MODIFIED:

(1) RIDGELAND, S C(VHF) INT: direction of holding - N on 023 M rad Savannah, Ga. VOR; direction of turns-right; time - 1 min; MHA - 2000'.

(2) MANNING, S C(VHF) INT: direction of holding - N on 224 M rad Florence, S.C. VOR; direction of turns-right; time - 1 min; MHA - 1900'.

(3) ERNIES, S C(VHF) INT: direction of holding - SE on 152 M rad Columbia, S.C. VOR; direction of turns-right; time - 1 min; MHA - 1700'.

(4) STONE MTN, GA(VHF) INT: direction of holding - NE on 052 M rad Atlanta, Ga. VOR; direction of turns-right; time - 1 min; MHA - MEA.

(5) HELENA, ALA(VHF) INT: direction of holding - S on 177 M rad Birmingham, Ala. VOR; direction of turns-right; time - 1 min; MHA - MEA.

(6) CHELSEA, ALA(VHF) INT: direction of holding - SE on 135 M rad Birmingham, Ala. VOR; direction of turns-right; time - 1 min; MHA-MEA.

(7) RAYMOND, GA(VHF) INT: direction of holding - SW on 232 M rad Atlanta, Ga. VOR; direction of turns-right; time - 1 min; MHA - MEA.

(8) BANNING, CALIF(VHF) INT: direction of holding - E on 076 M rad Ontario, Calif. VOR; direction of turns-right; time - 1 min; MHA - 13, 000'.

(9) GRANT, N Y(VHF) INT: direction of holding - SE on 298 M rad Rochester, N.Y. VOR; direction of turns-right; time - 1 min; MHA - 2000'.

(10) GRINDELL, OHIO(VHF) INT: direction of holding - SE on 148 M rad Findlay, Ohio VOR; direction of turns-right; time - 1 min; MHA - 2500'.

(11) GRINDELL, OHIO(VHF) INT: direction of holding - NW on 148 M rad Findlay, Ohio VOR; direction of turns-right; time - 1 min; MHA - 2500'.

(12) PLATTSBURGH, MO(VHF) INT: Time - 1 min.

(13) TOPEKA, KANS VORTAC: 035 M rad. Time - 1 min.

(14) BLUE SPRINGS, MO VOR: Time - 1 min.

(15) WHITE WATER, KANS(VHF) INT: Time - 1 min.

(16) DE GRAFF, KANS(VHF) INT: Time - 1 min.

(17) GROVELAND, KANS(VHF) INT: Time - 1 min.

(18) STAFFORD, KANS(VHF) INT: Time - 1 min.

(19) LEMON GROVE, CALIF(VHF) INT: direction of holding - E on 075 M rad San Diego, Calif. VOR; direction of turns-right; time - 1 min; MHA - 4500'.

(20) JAMUL, CALIF(VHF) INT: direction of holding - E on 075 M rad San Diego, Calif. VOR; direction of turns-left; time - 1 min; MHA - 6000'.

(21) BARRETT LAKE(VHF) INT: direction of holding - E on 075 M rad San Diego, Calif. VOR; direction of turns-left; time - 1 min; MHA - 7000'.

(22) CAMPO, CALIF(VHF) INT: direction of holding - E on 256 M rad El Centro, Calif. VOR; direction of turns-left; time - 2 mins; MHA - 7000'.

(23) COLLINS, TEX(VHF) INT: direction of holding - SW on SW crs San Antonio, Tex. VOR; direction of turns-right; time - 1 min; MHA - 2100'.

(24) FRENCH, LA(VHF) INT: direction of holding - NW on 289 M rad New Orleans, La. VOR; direction of turns-left; time - 1 min; MHA - 2000'.

(25) MIDLAND, TEX VOR: direction of holding - N on 360 M rad; direction of turns-left; time - 1 min; MHA - 4100'.

(26) MONIAC, FLA(VHF) INT: direction of holding - W on 274 M rad Jacksonville, Fla. VOR; direction of turns-right; time - 2 mins; MHA - 2500'.

(27) MIDLAND, TEX ILS/ MM: direction of holding - NE on NE crs ILS lclzr; direction of turns-right; time - 2 mins; MHA - 4400'.

(28) MARSH, TEX(VHF) INT: direction of holding - NE on 051 M rad Sabine Pass, Tex. VOR; direction of turns-left; time - 1 min; MHA - 1100'.

CANCELLED:

(1) BAKERSFIELD, CALIF LMM: direction of holding - SE on SE crs. ILS; direction of turns-left; time - 1 min; MHA - 2000'.

(2) TOUHY, NEB(VHF) INT: (Delete holding only).

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial

FOREIGN EXCHANGE Location	Number	FSS Providing Service

INTERPHONES Location	FSS Providing Service

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

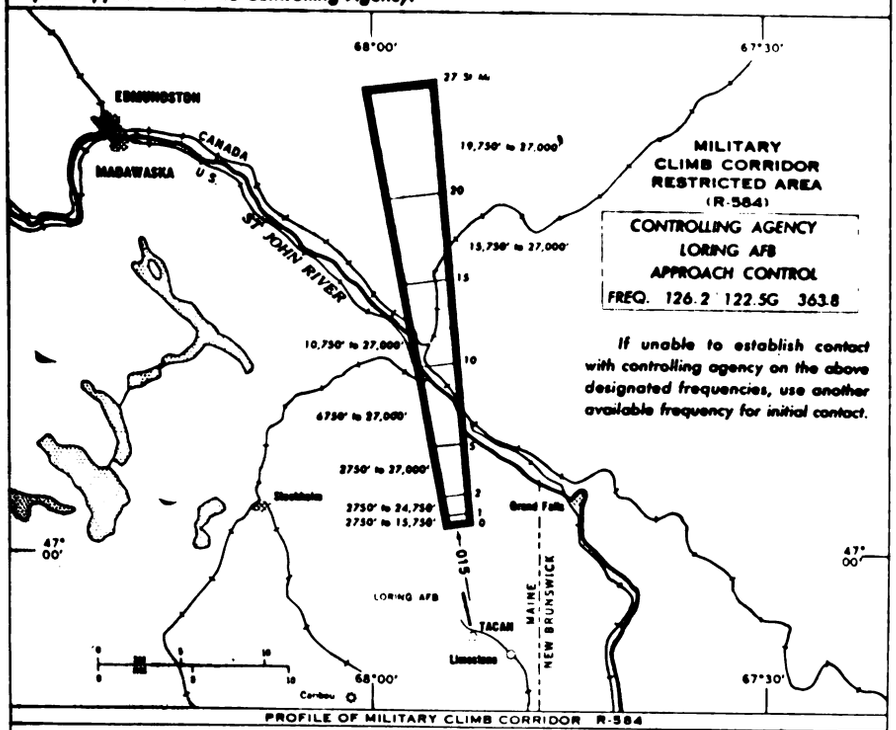
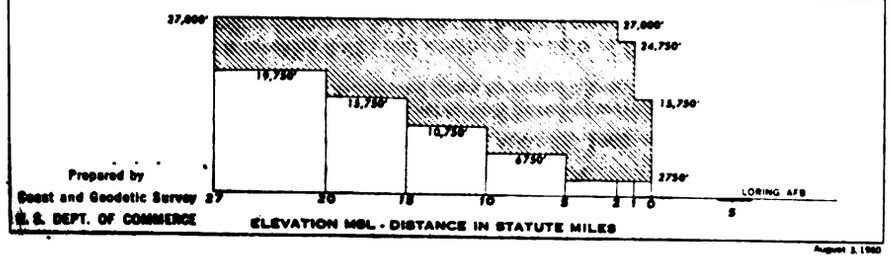
SPECIAL NOTICE



MAINE

LIMESTONE (LORING AFB) MILITARY CLIMB CORRIDOR



EFFECTIVE 0001 E.S.T. AUGUST 25, 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

Pilots of Century Series aircraft on active air defense missions are unable to see and safely avoid other aircraft during the climb phase of a scramble. In the interest of safety, the Dept. of Defense, the FAA and the Canadian authorities, have agreed to establish a restricted corridor to segregate such operations from other air traffic. ALL FLIGHTS through these areas must obtain prior approval from the Controlling Agency.

SPECIAL NOTICE

NORTH CAROLINA-SOUTH CAROLINA
PINE CONE III MILITARY EXERCISE

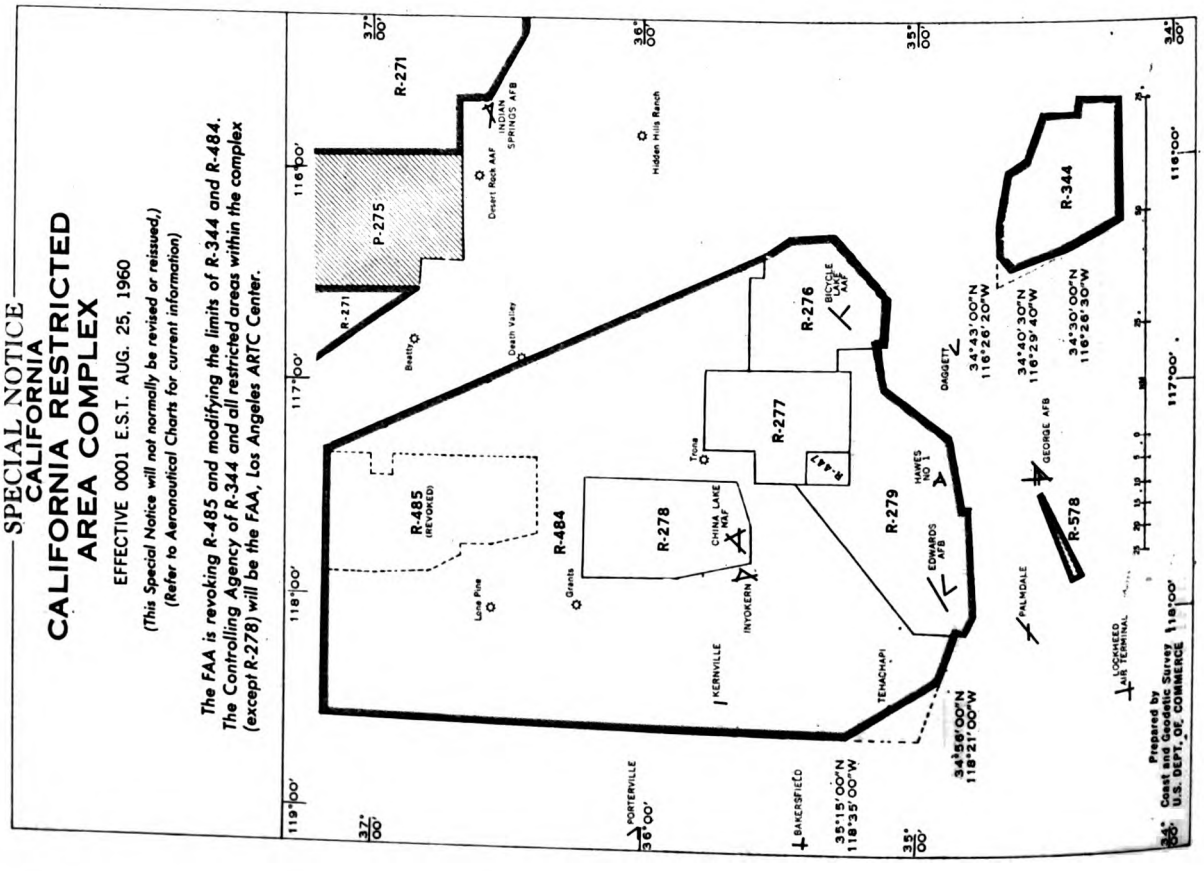
EFFECTIVE AUG 20-24, 1960

The USAF and US Army will conduct intense military air operations in the North Carolina–South Carolina areas depicted below, between August 20 and 24, inclusive. The maneuvers will take place during daylight hours whenever conditions of 3500 feet ceiling and seven miles visibility or better exist.

The altitudes being used for these VFR military flights range from 800 feet to a maximum of 3000 feet above MSL with relatively few exceptions of military aircraft descending into and climbing out of the operating area around the perimeter boundaries.

Information on this exercise can be obtained from the Director of Operations, Pine Cone III, Fort Bragg, N.C.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey



SPECIAL NOTICE

CALIFORNIA RESTRICTED AREA COMPLEX

EFFECTIVE 0001 E.S.T. AUG. 25, 1960

(This Special Notice will not normally be revised or reissued.)
(Refer to Aeronautical Charts for current information)

The FAA is revoking R-485 and modifying the limits of R-344 and R-484. The Controlling Agency of R-344 and all restricted areas within the complex (except R-278) will be the FAA, Los Angeles ARTC Center.

FORT WORTH-SAN ANTONIO CONTROL AND FLIGHT ADVISORY BOUNDARY:

Effective 0001C July 1, 1960, the Fort Worth-San Antonio Control and Flight Advisory Boundary is revised as follows: from the present boundary point of lat 31-34-00, long. 94-36-00 direct to 31-25-50, 96-30-00, direct to 31-14-00, 96-38-00, direct to 31-14-00, 96-49-00, thence NW along E edge V15 to a point 34 smi SE ACT VOR thence clockwise along an arc 34 smi from ACT VOR ASY presently described.

AIRMAN'S GUIDE CORRECTIONS:

(1) Correct Airman's Guide Volume 15, Number 10 dated 19 July 1960, as follows: Page 54 second column On-Request Reporting Points - Modified- item (30) correct state name New Raymer, Calif. to New Raymer, Colo. (2) Correct Airman's Guide Volume 15 Number 11 dated 2 August 1960 as follows: Page 84 under FIM Corrections FAA & WB telephone numbers item (6) Denver, Colo.- correct WB telephone number FL 5-6878 (not changed);the transcribed weather information number is DU 8-3653/4.

PREFERRED ROUTES CORRECTIONS:

Volume 15, Number 9 dated 5 July 1960:

(1) Page 126, Charlotte to New York (Idlewild) should read: New London V454 LVL V157 RIC R77 DOV/Rbn MIV/LFR V16 V1.

(2) Page 126, Charlotte to New York (La Guardia) should read: New London V454 V39 HRN BAL V123.

(3) Page 126, add - Charlotte to Washington: New London V454 LVL V157.

(4) Page 126, Atlanta to Cincinnati should read: OCR V267 TYS V97.

(5) Page 126, Atlanta to Newark should read: AHN V454 V39 HRN BAL V123.

(6) Page 126, Atlanta to New York (Idlewild) should read: AHN V454 LVL V157 RIC R77 DOV/Rbn MIV/LFR V16 V1.

(7) Page 126, Atlanta to New York (La Guardia) should read: AHN V454 V39 HRN BAL V123.

(8) Page 126 Atlanta to Tampa should read: ATL V97E ABY V159W CTY V7 V35E.

(9) Page 126, Atlanta to Washington should read: AHN V454 LVL V157.

(10) Page 127, Chicago (Midway) to Minneapolis should read: V218 RST V82 or V218 V172 V129 RWY V218 V82.

(11) Page 127, Chicago (O'Hare) to Minneapolis should read: V172 V218 RST V82 or V172 V129 RWY V218 V82.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

CORRECTIONS:

Correct listing of VOR Procedure for Corpus Christi, Texas on Transmittal Letter No. 60-27 to read:
Corpus Christi, Texas - International Airport, Procedure No. 1, Orig. Effective 27 Aug 60, or on cancellation of Amdt. 4, Cliff Maus Airport.
Also correct the C-dn minimum for "More than two engine, more than 65 knots" to read: "700-1 1/2" in lieu of "700-1" on this procedure.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE RADAR

If a radar instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach in accordance with a different procedure authorized for such airport by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the radar controller. From initial contact with radar to final authorized landing minimums, the instructions of the radar controller are mandatory except when (A) visual contact is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach. Except when the radar controller may direct otherwise prior to final approach, a missed approach shall be executed as provided below when (A) communication on final approach is lost for more than 5 seconds during a precision approach, or for more than 30 seconds during a surveillance approach; (B) directed by radar controller; (C) visual contact is not established upon descent to authorized landing minimums; or (D) if landing is not accomplished.

AIRMAN'S GUIDE

ISSUANCE: The Airman's Guide is issued every two weeks. Every issue contains a NOTAM section; every other issue additionally contains a Radar-Radio Listings section; and once every three months the Airport Directory appears in an issue containing both NOTAMS and the Radar-Radio Listings. See below for contents of these sections.

RETENTION: To enable users to know which issues should be retained, a suitable notice is carried on the front cover indicating which ones are still current.

CONTENTS: The contents (by section or other appropriate breakdown) of each issue are noted by tab and page number on the front cover. The first page of each section carries the Legend for interpreting codified information. Material usually included in each section is as follows:

(1) NOTAMS (including Special Notices): Under appropriate geographical headings (state and/or city, as applicable) there is given the current condition (if there has been a temporary or permanent change concerning which a NOTAM has been issued) of facilities and obstructions, plus any special data (including flight regulations or restrictions). Where NOTAMS cannot be associated with a specific geographical location or where the application is generalized, they are carried in a subdivision of NOTAMS entitled "Special Notices." The Special Notices section follows the NOTAMS and, like the NOTAMS, is separately listed by a tab and page number on the front cover. Important or unusual Special Notices are additionally indicated on the front cover in the box provided, giving the subject and page number where the data is to be found. Included as Special Notices are data and/or amendments concerning restricted areas, location identifiers, minimum en route altitudes, civil airways, airway structure during VOR shutdowns, control areas, control zones, reporting points, VOR check points, standard instrument approach procedures, control area/flight advisory area boundaries, civil air regulations, preferential routes, flight test areas, military maneuvers, aeronautical charts, etc. Also included are amendments and changes to the Flight Information Manual as well as to previously issued Airman's Guides.

(2) Radar-Radio Listings: Lists radar facilities, instrument landing systems, and aeronautical radio facilities with (as appropriate) their transmitting and guarded frequencies, identification, station class, range courses, other appropriate data, and remarks.

(3) Airport Directory: This codified directory provides the following data on airports: type, location (with reference to associated town or city), elevation, number of runways, length of longest runway (indicating surfacing), lighting, servicing, availability of weather reports and or Unicom, fuel octanes, and appropriate remarks.

PRICE: See information in box below.

REPORTING INFORMATION TO EDITORS: Data for inclusion in the Airman's Guide should be reported to the editors at the following address: Federal Aviation Agency, Washington 25, D. C., Attention: MS-120. Appropriate instructions for reporting data are contained in FAA's Manual ATM-2-B, entitled "Communications Procedures." However, since some airport data, unlike most other data, may not originate from official sources, the following explanatory information is provided.

The Airman's Guide covers primarily two broad fields of civil airport information: permanent data changes and temporary hazardous conditions. Permanent airport data refers to new airports or changes in field layout, servicing, lighting, restrictions or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions which make airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, thaws or construction; or merely a burned out obstruction light or a runway unusable or partially unusable because of construction.

Since the aeronautical public should be immediately advised of such hazardous conditions, reporters should utilize the FAA Flight Service Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest FAA service station for dissemination as a NOTAM and for further transmission to the editors of the Airman's Guide. If this is not feasible, the item should be reported directly to the Federal Aviation Agency, Washington 25, D. C., Attention: MS-120.

Permanent airport data changes should be reported to the appropriate FAA Regional Office for coordination before they are included in the Airman's Guide.

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities, including airports.

Abbreviations

The editors are now in the process of making changes in the contractions and abbreviations used in the Airman's Guide. We are doing this in order to conform to the new, standardized material contained in the FAA publication entitled CONTRACTIONS. This publication, which is dated July 1959 and issued in the ATM Manual series, is available from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., at 75 cents per copy.

Many of the abbreviations and contractions used in the Airman's Guide are already in conformity with the CONTRACTIONS publication. However, from among those which have changed, we have selected a few which we frequently use in the Airman's Guide. They appear in the list which follows.

adjt	adjacent	dptr	departure	jctn	junction

ALWAYS CHECK NOTICES TO AIRMEN SECTION

RADAR - RADIO LISTINGS

FSS = Flight Service Station (FAA) (Formerly ATCS)

VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES:
Category I = Course alignment and signal level are monitored continuously. Category II = (No longer in use; formerly applied to VAR). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VORs to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an FSS, and located too distant from FSS to be monitored with a VHF receiver will fall into Category III. NOTE: Category I, II, III shown by (1), (2), (3) before name in Location Column.

LEGEND

NOTE: The Federal Government disclaims responsibility for non-Federal air navigation facilities.

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(S) = State facility
(0700-2300) = Hours of operation local time
(3) = Monitoring category
→ = New or revised data
■ = Information deleted

RADIO CLASS DESIGNATIONS

Identification of VOR/VORTAC/TACAN Stations by Class: (Operational Limitations)

Class	Normally Anticipated Altitude Service	Normally Anticipated Interference-free Distance Service
H-VOR	75,000' MSL	180 smi (156.31 nmi)
M-VOR	30,000' MSL	90 smi (78.16 nmi)
L-VOR	15,000' MSL	45 smi (39.08 nmi)

AC . . . . . Approach Control Tower, FAA (transmits on voice channel or associated ranges and ILS in addition to frequencies listed
B . . . . . Scheduled Broadcast Station (broadcasts weather at 15 and 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . . . Control Tower, FAA
CI . . . . . Control Tower (City, County, Private, etc.)
CM . . . . . Control Tower (Military, listing only civil frequencies available)
CONSOLAN . . . LF/MF long range navigation aid; aircraft must have BFO oscillator
D . . . . Distantly controlled
DME . . . Distance Measuring Equipment
DMET . . . TACAN compatible DME
FM . . . . VHF fan marker (100 watts)
GCA . . . . Ground Controlled Approach System
H . . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH . . . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . . Instrument Landing System (voice on localizer channel)
J . . . . . LMF (200-415 kc) voice facility on other than range frequency
LFM . . . . VHF fan marker, low powered (5 watts)
LMM . . . . Compass locator station when installed at middle marker site
LOM . . . . Compass locator station when installed at outer marker site
MA . . . . Range (adcock, vertical radiators), power less than 50 watts
MH . . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . . Range (loop radiators), power less than 50 watts
MM . . . . VHF middle marker
MRA . . . Range (adcock, vertical radiators), power 50 watts or more, but less than 150 watts
MRL . . . Range (loop radiators), power 50 watts or more, but less than 150 watts
OM . . . . VHF outer marker
RA . . . . Range (adcock, vertical radiators), power 150 watts or more
RL . . . . Range (loop radiators), power 150 watts or more
S . . . . . Simultaneous range, homing signal and/or voice
T . . . . . Teletype
TACAN . . . UHF omni-directional bearing and distance type facility
TX . . . . . Principal teletype
V . . . . . Additional VHF voice feature on other than range frequency
VOR . . . . . VHF omni-directional range (omni-range)
VORTAC . . . . Combination of VOR and TACAN
W . . . . . Without voice facilities on range frequency
Z . . . . . VHF station location marker at a range station

NOTES

1. Range courses are magnetic in-bearings
2. All FAA MH facilities operate continuously unless cited as follows: (on req)
3. All FAA ranges operate continuously. Those which are not manned continuously are cite in the remarks column with hours of operation in parentheses, e.g., (0600-2400)
4. VHF/LMF ranges listed with the same identifier are controlled by the same FSS. Due space limitations the DTV and communication frequencies which are listed with the LF/LMF facility are not repeated with the VOR facility.

RADAR AVAILABLE

PAR = Precision Approach Radar. ASR = Airport Surveillance Radar.
ARSR = Air Route Surveillance Radar

FAA RADAR UNITS - Operate continuously at the locations listed below. Available to all pilots, civil and military. Contact associated FAA control tower on any frequency guarded for initial instructions, or in an emergency any FAA facility for information on nearest Radar Control. Weather minimums, associated runway and GCA procedures are listed in the Airman's Guide.

RADAR APPROACH CONTROL (RAPCON) - At certain USAF locations, approach control and the ASR portion of RAPCONS is operated by the FAA and service is available to all aircraft.

RADAR AIR TRAFFIC CONTROL CENTER (RATCC) - At certain US Navy locations, approach control and the ASR portion of the RATCCS is operated by the FAA and service is available to all aircraft.

RADAR BEACONS - Secondary radar beacon ground equipment is normally associated with a surveillance radar system and is used for target reinforcement and identification of aircraft equipped with a radar beacon transponder, either military or civil. One of two types of ground equipment is now available for operation at all FAA operated RAPCON facilities, some FAA air route traffic control centers, and at all ADC long range radar facilities.

AIR TRAFFIC CONTROL RADAR BEACON SYSTEM (ATCRBS) - ATCRBS is similar to and compatible with the military coded radar beacon equipment (Mark X (SIF)). Civil Mode A is identical to military Mode 3. Civil and Military transponders will be adjusted to reply in Mode A (military Mode 3) as follows:

1. Civil turbojet aircraft transponders - reply on Code 40 at all times while in flight, unless otherwise advised.
2. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 02 when operating on IFR flight plan unless otherwise advised by ground radar facilities.
3. Civil aircraft (other than turbojet powered) and military aircraft - reply on Code 62 while operating VFR or VFR-on-top unless advised otherwise by air traffic control (ATC). Code 62 will also be used by such aircraft when operating VFR or VFR-on-top within radar advisory areas between flight levels 240 and 390, inclusive. (See ACIC En Route - High Altitude charts for radar advisory areas and procedures relating thereto.)
4. Under no circumstances shall civil aircraft operate on Code 00.
5. Civil and military transponders will be operated in "STANDBY" while taxiing for take-off and after landing, or when requested by ATC. This action is necessary to eliminate undesirable interference and clutter on certain radar displays. Therefore, departing pilots should turn transponder to "ON" as late as practicable before commencing take-off, and landing pilots should turn transponder to "STANDBY" as soon as practicable after completing landing roll.
6. Civil and military pilots, when filing a domestic IFR flight plan, shall make known the fact that their aircraft are equipped with a functioning transponder by adding the word "transponder" immediately following the aircraft identification. An aircraft with a transponder not having coding capability (Basic Mark X) will be indicated by adding the words "no code" in the "Remarks" section of the flight plan.
7. Aircraft departing from within a United States domestic control area to points outside the United States will comply with 6 above. Transponder equipped aircraft entering a United States domestic control area from outside the United States will, when making the first radio report to the United States air traffic control center, advise of availability of such equipment by adding the word/s "transponder" or "no code transponder," as appropriate, to its identification.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground approaches - Precision and Surveillance.

PRECISION APPROACHES - Aircraft are guided to final approach to the designated instrument runway. The final approach glide path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway.

SURVEILLANCE or ASR APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide slope desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for a surveillance approach are usually higher than for a precision approach.

RADAR ARRIVAL AND DEPARTURE CONTROL - Radar is utilized by certain radar equipped facilities to control the flight paths of arriving or departing IFR aircraft for the purpose of expediting the flow of traffic. Aircraft operating on IFR flight plans will be afforded a minimum of three miles horizontal separation unless standard non-radar vertical, lateral or longitudinal separation exists. This should not be confused with GCA which is an instrument approach aid, NOTE: Radar arrival and departure control available all locations, unless otherwise cited.

FAA OPERATED RADAR UNITS

NOTE: Transmitting frequencies below 1180mc are not guarded; others listed plus 3023.5 kc are guarded unless otherwise shown under Remarks. Frequency 122.5 mc is guarded unless either 122.6 mc or 122.7 mc is shown. (Guarding frequencies not applicable to ARSR facilities) Emergency frequency 121.5 mc transmits and guards at all locations.

V = 122.2, 126.7, 135.9 mc transmitted. # = Guards same VHF and UHF freqs facility transmits except 122.2, 120.7 mc. (1) = 3023.5 kc guarded. (2) = 3023.5 kc; 122.5 mc. (3) = 3023.5 kc; 122.1, 126.7, 135.9 mc. e.g. (3)-135.9 guards every frequency in group (3) except 135.9 mc. (g) = Tower equipped with 121.9 mc or (g.7) = Tower equipped with 121.7 mc for control of ground traffic. EMERGENCY FREQUENCY (121.5 mc) transmits and guards at all ATCS, Towers (FAA and Military), Centers and DF Stations; this frequency is not tabulated in the list above. * = Automatic voice identification. NOTE: FIRST FREQUENCY LISTED IS THE NAVIGATIONAL AID CHANNEL; OTHERS ARE COMMUNICATIONS CHANNELS.

NOTAMS

LEGEND

(7-21) -- Month and day the information was reported.

** -- New or revised airport or miscellaneous data. Pilots should inscribe this information on charts and records.

✱ -- New or revised radio or radar data. Pilots should inscribe this information on charts and records.

NOTE: Because of space limitations, such "permanent" data will usually be cited only once. Temporary data, however, will be continuously cited until no longer in effect.

ALABAMA: BIRMINGHAM MUN ARPT: Due to comsng apch lgt system rnwy 5, ILS min day and ngt lowered to 200-1/2.
BIRMINGHAM RADIO: Caution - E course LF rng has severe multiples.
ELBA ARPT: New arpt reported. Lctn: 1.5 mi W; lat 31-25, long. 86-05; No. of rnwys: 2; Lngst rnwy and facils: h30-B*L4-; Rmks: Unattended. Trees E. (4-7)
FORT MORGAN ARPT: Clsd, constr of paved rnwy. (6-27)
**MOBILE, BATES FLD: 209'(459'MSL) lgtd twr being erected 22 nmi WNW(309°T) at lat 30-55-59, long. 88-36-14. (8-1) Sequence flashers serving rnwy 14, stns 10 thru 30 comsnd & flt checked. (6-22)
MOBILE, BROOKLEY AFB SPECIAL NOTICE: Due to concentrated opern of hi-performance jet acft, all tfc other than that for Brookley, should remain clear of the Brookley Ctl Zone during VFR flt below 2700', unless otherwise cleared by the Brookley Ctl Twr. (1-12)
MOBILE, BROOKLEY AFB RADIO: USAF VOR radials 212° thru 222° clockwise unusable-acct severe scalloping. (7-10)
MOBILE RADIO: VOR radials 018° clockwise thru 028° unusable. (6-29) DMET operg test basis; channel 80.
MONTGOMERY SPECIAL NOTICE: Due to extsv jet tfc, all acft are cautioned to maintain cont rdo ctc with appropriate ctl twr when operg in Danelly Fld or Maxwell AFB ctl zone.
MONTGOMERY, ALLENPORT ARPT: N/S rnwy clsd until further notice. (7-24)
**MONTGOMERY, DANNELLY FLD: Sequence flashers serving rnwy 9, operg on stns 1 thru 22 flt checked & comsnd.
MUSCLE SHOALS RADIO: DMET operg test basis; channel 112. (5-25)
ONEONTA ARPT: New arpt reported. Lat 33-58-00, long. 86-23-30; elev: 1123'; one sod strip 3500', no svcs, no fuel. (7-27)
OZARK, BLACKWELL FLD: Clsd, constr rnwy paving. (6-15)
ROANOKE MUN ARPT: Clsd, reconstr & paving. (6-14)
ST. ELMO ARPT: 250'(258'MSL) lgtd tmpry twr being erected 24 nmi ESE(132°T) at lat 30-13-54, long. 87-55-41. (4-18)
SELMA, SELFIELD ARPT: Rnwy 12-30 being extended to 5,300', extsn on NW end apch rnwy 12. (8-6)
TUSCALOOSA, VAN de GRAAFF ARPT: About Oct 26, 342.2'(762' MSL) lgtd twr will be erected 6.5 nmi E(107°T) at lat 33-11-52, long 87-29-05. (8-4)
TUSCALOOSA RADIO: DMET operg test basis; channel 82. (7-1)
TUSCUMBIA, TRI CITIES ARPT: 503' (962'MSL) lgtd stack being erected 6.5 nmi W (282°T) at lat 34-44-35, long 87-50-58. (12-10)
TUSKEGEE RADIO: DMET operg on test basis; channel 120. (11-5)
ARIZONA: BENSON SPECIAL NOTICE: Caution; avoid flying over or near Apache Powder Co., nitroglycerin plant aprx 4 mi SSW of St. David due to potential explosion hazard. (11-6)
CLIFTON, GREENLEE COUNTY ARPT: N/S rnwy useable with caution, weeds. (5-4)
COCHISE RADIO: DMET operg on test basis; channel 41. (10-11)
DOUGLAS, BISBEE-DOUGLAS INTL ARPT: Rnwy 17-35 clsd, reconstr; intersecting rnwys except rnwy 8-26 will be progressively clsd durg period of reconstr. (7-6)
DOUGLAS RADIO: Soon VOR will be shut down until aprx Sept. 1 - reconstr and freq chg to 110.0 mc. (6-8) Durg this period, following route structure and MEA in efct:

ARIZONA: Unusable Awys: V66, DUG Animas Ints. Unusable Reporting Points: Heath and Rinoon Ints. Usable Awys: (Tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated) V66 Mescal Int-Douglas Int via TUS R-108°, 12,000' MEA. Usable Reporting Points: Douglas Int: TUS R-108° & CIE R-158°; MRA 12,000'. Animas Int: CUS R-264° & SSO R-111°; MRA 10,000'.
GILA BEND ARPT: New arpt reported. Lctd 2.0 SE. 2 rnwys, longest rnwy & facils 40-S5. Fuel: F3.
GILA BEND-YUMA SPECIAL NOTICE: U.S. Army conducting hi-speed, jet powered, pilotless acft (DRONE) flts within Caution Area C-308 and on a line from Yuma, Ariz. to Fort Huachuca, Ariz. Flts will average three per month and will be conducted under VFR conditions only. Alts in use will be variable and speeds will be sub and supersonic. Actual flt info will be disseminated by Notam from Yuma, Ariz., 72 hrs prior to each flt. (6-13)
GILA BEND RADIO: DMET operg test basis; channel 113. (1-27)
**MARICOPA SPECIAL NOTICE: CAUTION- DO NOT MISTAKE FOR L NDG AREA. Space Surveillance Stn at lat 33-06-31, long 112-01-46, aprx 4 mi N. 1200' W and parallel to hwy. Site is strip 300' x 1800' with paved portion lengthwise thru cntr 100' in width and studded with 6' steel posts. This permanent hazard lctd 22 nmi S Phoenix-Sky Harbor Arpt
PHOENIX SPECIAL NOTICE: Hi Density Jet Tfc: Pilots on other than IFR clearance should either avoid or use extreme caution when traversing the following areas within which Luke AFB hi-density tfc is operg. Normal trng hrs are from 0600-1800 MST Mon thru Fri. Hi-density tfc will be operg VFR on R83, V94, V66 and R9 within a 10 mi radius of the Gila Bend VOR & btn the Gila Bend VOR & a point 52 nmi W on R9 and V66 at alts below 2000' and at 5000', 6000', 7000', 15,000', 16,000' and above 25,000' MSL. On R83 and V94 btn a point 10 nmi S of the Hassayampa VOR & the Gila Bend VOR at & below 4000' MSL & 25,000' and above. All provisions of Special Air Regulation #421 apply within the following area: G5 & V16 W of Phoenix btn 112° - 10'W and 112° - 35'W. (6-1)
PHOENIX, AIRHAVEN ARPT: Caution rnwy ruf, soft spots. (6-3) Clsd all acft over 6000 lbs gross wt. (6-9)
PHOENIX, DEER VALLEY ARPT: 5000' extsn E end E/W rnwy clsd. (5-5)
**PHOENIX, SKY HARBOR MUN ARPT: Due nonvisibility, twr unable to determine if the following areas of the arpt are clear of obstns and/or acft: Extreme E end txwy 4 including the runup area rnwy 26L; 100' of txwy 1 SW of ctl twr; and parking areas N and NW of bldg line on N and NW area of arpt. All use of these areas is at pilot's discretion. (8-2) Rnwy 3-21 perm clsd, used as txwy 17. Txwy 5 and txwy 1 btn txwy 4 & txwy 6 perm clsd. Txwy btn txwy 1 and the ramp open. (8-1) Acft barrier on rnwys 8R & 26L.
**PRESCOTT MUN ARPT: Taxi strips to rnwys 21 and 12 not to be used by acft with total gross load of 20,000 lbs or greater single wheel gear, 40,000 lbs or greater dual wheel gear, 60,000 lbs or greater dual tandem gear. Heavier acft taxi on rnwy.
SCOTTSDALE, THUNDERBIRD ACADEMY ARPT: N/S & NW/SE rnwys clsd. (4-7)
TUCSON SPECIAL NOTICE: Sahaurita Restricted Area R-310 being used for unlgtd moored balloon opern Aug 6-Oct 31, 1960. Hrs of opern - 0300-1300Z surface to 2000' above surface. Ctc Tucson FSS prior to penetrating R-310 durg aforementioned period & times. Hi-Density Jet Tfc: Pilots on other than IFR clearance should avoid or use extreme caution when traversing folg area at alt above 19,000' MSL. Hi-density jet tfc operg at & above 20,000' MSL within area from Douglas VOR to Cochise VOR to Cortaro Int. to Robles Int to Kinsley Int. to Douglas VOR; hrs of opern cont daily.
TUCSON ARPT SPECIAL NOTICE: Target towing by jet acft during dalgt hrs under VFR conditions on wk-ends and intermittently thru week on a direct route from Ajo, Ariz. descending from 20,000' so as to reach 5500' prior to joining ctl area vicinity San Pedro, Ariz thence direct to San Xavier mission, thence direct to Tucson arpt. Ctc Tucson rdo or ctl twr for info concerning towing activity. (2-10)
TUCSON, RYAN ARPT: E/W rnwy under constr, N/S rnwy avbl durg periods when E/W rnwy clsd. Extreme caution when using substitute rnwy. (6/17)
TUCSON RADIO: VORTAC unusable beyond 25 mi, 320° clockwise thru 080° at MOCA. (2-24)
YUMA-MCAAS/YUMA CO. ARPT: Rnwy 17-35 clsd, use as txwy only. Rnwy 3R-21L clsd. Hi-density jet tfc vcnty of arpt. Hvy constr in progress apch of rnwy 21R lctd int rnwys 21R and 17 - 35. 11,000' of rnwy 3L-21R usable. Caution on taxiways. Navy chain-type arresting gear located 9200' from apch end of rnwy 21R and 11,000' from approach end of 3 L. Tetrahedron uncontrollable not to be used as rnwy-in-use indicator. (6-1) Rnwy lgts installed rnwy 8-26. (7-2)

DOUGLAS RADIO: DMET operg on test basis; channel 23. (3-18)

DUNOIR RADIO: DMET operg on test basis; channel 81. (4-17) Soon, VOR voice ctl will be provided from Worland FSS. (6-17) About Aug 29, VOR will be shutdown until aprx Sept 18- reconstr. Durg this period, V1500 btn Irwin Int and SHR VOR unusable V298 usable with MEA 15,000' btn Lamont Int and BOY. (8-24)

**EVANSTON ARPT: New arpt, 5 mi NNW, elev: 6600' one dirt strip N/S 3400' in length, soft when wet. P-line E; 80 87 oct fuel avbl.

ROCK SPRINGS MUN ARPT: Rnwy 3-21, 200' SW end clsd, flagged, unlgtd; rnwy 7-25, 800' W end from threshold lgts and 500' from W end of hard surface clsd, unflagged, due to 6' lgtd FAA detector obstn 50' inside of threshold lgts on W end of rnwy 7-25, to permit 40 to 1 safety glide margin; full length avbl for tkof. (5-16) Present usable length rnwy 3-21 is 5013' and rnwy 7-25, 6188'. (6-3)

SHERIDAN COUNTY ARPT: Caution, grass cutting in progress summer months. (6-29)

SHERIDAN RADIO: Aug 8, VOR shut down until aprx Sept 1- reconstr. Durg this period, following route structure & MEAs in efct: Unusable Awys: V1500 DNW-DPR; V19E BIL-SHR and SHR-CZI. Usable Awys (Tmpry redesignated as follows with published MEAs and MCAs unless otherwise indicated) V19 CZI-BIL via CZI R317° and BIL R114°, MEA 10,000'. (8-11)

THERMOPOLIS MUN ARPT: 50' of entire length of rnwy 36-18 W of cntrline clsd, E side will remain open but use with caution. (8-8)

PUERTO RICO: PONCE, MERCEDITA ARPT: About Sept., establishment of antenna farm consisting of 76 twrs will be erected 3.5 nmi E at lat 18-00-45. 30, long. 66-30-30. Tallest twrs 131' (181'MSL). Only 5 twrs will be obstn lgtd. (8-8)

**SAN JUAN, ISLA GRANDE ARPT: Tmpry twr lctd on NW corner of old trml bldg. 174' metal bldg lctd aprx 1000' SE of threshold rnwy 27, lgtd nets by two steady red lgts. (8-9) Due nonvisibility, twr unable to determine if the following areas are clear of obstns and/or acft: Extreme S portion CG Navy ramp, ramp area E of CG hangar, extreme E end rnwy 9 and ramp on N side J. Mack Aero hangar. All use of these areas is at pilot's Discretion. Due nonvisibility, twr unable to observe tfc and provide tfc info apch area for bldg rnwy 27. (8-10)

SAN JUAN-ISLA GRANDE ARPT TOWER: May 13, twr tmpryly relctd on NW corner of old trml bldg- renovation of twr structure. Soon, following freqs will be in use: 255 kc vice 269 kc; 233.8 mc vice 257.8 mc ; and 250.2 mc. (7-29)

SAN JUAN, PUERTO RICO INTL ARPT: Access txwy to ANG parking apron lgtd; ditch at W side of ANG access txwy; use extreme caution while taxiing day and ngt. Transient facils avbl 1130-2300Z Mon-Fri but no parking space avbl. Caution, unlgtd perm jet blast fence 8' high, 20' long erected 10' W of W side of txwy to ANG ramp. Hi-intensity rnwy end identifier lgts lctd aprx 30' each side of apch end rnwy 7 comsnd. Men, eqpmt working vcnty of apch end rnwy 25; 20' derricks erected, area obstn lgtd. (1-7) Due to extsn of eastern end rnwy & txwy, 39' lgtd dredge eqpmt operg 800' from end of rnwy, top of dredge 32.5' above rnwy at mean high water. (5-25) Caution, adhere to cntrline of txwy while maneuvering on extreme W end of E-W txwy; due to erosion gnd level drops aprx 18 inches from concrete and follows outside radius.

SAN JUAN-RAMEY AFB RADIO: Soon, CM twr tsmtg freq 278 kc and rcvr 3023.5 kc will be decmsnd. (8-10)

VIRGIN ISLANDS: ST. CROIX, CHRISTIANSTED HAMILTON ARPT: Caution, acft making rgt hand turn after tkofs to E. Men, eqpmt on E end of rnwy where 1200' extsn under constr; rnwy lgts E end tmpry lctd with exposed electric cables across E end of surface of rnwy. No runoff area avbl on E end.

ST. CROIX RADIO: No coverage to N and W on all UHF and VHF voice air/gnd channel.

ST. THOMAS, CHARLOTTE AMALIE, TRUMAN ARPT: Rnwy 9-27 slippery when wet, braking action very poor, caution advised durg and following rain showers. (3-2)

ST. THOMAS, CHARLOTTE AMALIE, TRUMAN RADIO: No coverage possible from N and E quads all VHF and UHF voice air/gnd channels- due terrain. (3-10)

SPECIAL NOTICES

✓ Indicates new or revised Special Notices

MILITARY CLIMB CORRIDORS: ALL FLIGHTS desiring to traverse these areas must obtain prior approval from the Controlling Agency and maintain continuous listening watch on the appropriate frequency while traversing the corridor. The list of corridors, controlling agencies and frequencies follows:

Corridors	Controlling Agency	Frequencies
Alexandria (England AFB), La.	England AFB	363.8; 118.2; 122.5G
Anchorage(Elmendorf AFB), Alaska	Anchorage Apch Ctl	122.5G; 119.1; 118.1; 270.6; 363.8
Burlington (Ethan Allen AFB), Vermont	Burlington Apch Ctl	118.3; 122.5G; 363.8
Camp Springs(Andrews AFB), Md.	Andrews Apch Ctl	120.0; 122.5G; 363.8
Columbus(Lockbourne AFB), Ohio	Columbus Apch Ctl	123.7; 122.5G; 274.3
Duluth Mun. Arpt., Minnesota	Duluth Apch Ctl	118.3; 257.8; 122.5G
Falmouth (Otis AFB), Mass.	Otis RAPCON	124.7; 122.5G
Glasgow(Glasgow AFB), Mont.	VFR Glasgow AFB Twr IFR Great Falls ARTCC	126.2; 236.6; 122.5G 123.9; 301.4; 307.2
Goldsboro (Seymour Johnson AFB), North Carolina	Seymour Jonnson Apch Ctl	126.2; 122.5G
Grand Forks (Grand Forks AFB), North Dakota	VFR Grand Forks AFB Twr IFR Minneapolis ARTCC	126.2; 236.6 120.8; 283.7; 301.4
Klamath Falls(Kingsley Fld), Ore.	Klamath Falls Apch Ctl	118.5; 348.6
Limestone (Loring AFB), Me.	Loring AFB Apch Ctl	126.2; 122.5G; 363.8
Merced (Castle AFB), Calif.	Castle AFB Apch Ctl	118.9; 122.5G; 379.4

Wrightstown (McGuire AFB), N.J.	McGuire Apch Ctl	122.5G; 110.6T; 134.1; 126.2

G = Guards

CIVIL USE OF MILITARY FIELDS: U. S. Air Force and Navy Fields are open to civil fliers only in emergency or with prior permission; Army Air Fields are open to civil aircraft on authorization of the Air Field Commander.

In the case of Air Force Bases, pilots must have on file with Headquarters USAF a "HOLD HARMLESS" AF form 180 and in their possession a properly signed and executed AF form 181 permit. Application for these forms may be made to: Directorate of Operations DCS/O, Hqs USAF, Washington 25, D. C. This regulation will be strictly enforced.

For Naval Installations, prior permission should be requested from the Chief of Naval Operations (OP 532) via the Commanding Office of the field concerned, (who has the authority to approve landing rights for certain categories of civil aircraft). However, with minor exceptions, authority to use Navy field is granted only to aircraft on government business, or when no suitable civil airport is available in the vicinity.

When instrument approaches are conducted by civil aircraft at military airports, they shall be conducted in accordance with the procedures and minimums approved by the military agency having jurisdiction over the airport.

FILE FLIGHT PLANS BEFORE TAKE-OFF: Pilots are urged to file VFR flight plans in person or by telephone prior to departure. Radio should be used for filing plans only when it is impossible to file in person or by telephone. This procedure is necessary in order to avoid congestion on the already busy air-ground communs channels. These channels should be reserved for essential in-flight communs. All pilots will benefit by following this practice.

EN ROUTE OPERATIONS: Pilots are urged to follow IFR procedures even when operating VFR. See page 52, item 9 and page 73 - Position Reporting, in the Flight Information Manual. Volume 13, dated December 1959.
Check in regularly with FAA Flight Service Stations. The life that might be saved could be your own.

CLOSING OF VFR FLIGHT PLANS: Pilots are urged to file VFR arrival reports with a Flgt Serv Station whenever it is practical to do so. This procedure is necessary in order to reduce congestion on control tower communs channels. All pilots will benefit by following this practice.

Failure to close a flight plan may result in a civil penalty because it is a violation of the Civil Air Regulations. More important, needless expense and trouble involved in unnecessary search and rescue missions can be avoided by the proper closing of flight plans.

DVFR FLIGHT PLANS: When an IFR flight plan is cancelled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

RADIO INTERFERENCE(General): You can do your part toward reducing radio interference to aeronautical services from non-aeronautical sources which may be noted during flight if such is reported promptly to a FAA facility (preferably after landing) or to any FCC field office. Reports should state the frequency or channel affected, description of the interference, and the geographical area where the interference was observed. If known, reports should give the apparent cause of the interference such as radio stations, call letters when such can be identified, industrial plants, diathermy machines, power lines, television receivers, etc. Do not report interference caused by normal frequency congestion, i.e., signals from other aircraft using the frequency."

FLYING BENEATH AIRSHIPS: All airships operating in the Atlantic Ocean area have the capability of either towing sonar or picking up sea water as ballast. Either operation creates an invisible hazard to other aircraft in that a wire cable extends from the airship to the water in both cases. Therefore, other aircraft should remain well clear of all airships and should not, under any circumstances, fly beneath them when over water.

WASHINGTON, D. C. AREA-SPECIAL NOTICE: Aircraft operating VFR be alert for all types of tfc from Washington Nat'l Arpt, Bolling AFB, Anacostia NAS, Andrews AFB, Hyde Field and Washington - Virginia Airport. Suggested arrival and departure routes are issued as a guide for all acft operg VFR to maintain a safe, orderly flow of air tfc in the Washington, D.C. area. WASHINGTON NATIONAL ARPT: Northwest: Arrivals proceed well right of Potomac River until Cabin John. Departures proceed well right of Potomac River until past Herndon FM. West: Arrivals proceed well right of U.S. Route 29 until past Falls Church. Departures proceed well right of U.S. Route 29 until past Centerville. Southwest: Arrivals proceed on the right side of Potomac River until past Mount Vernon, then via the river to the Washington Range. Departures proceed well right of Potomac River until past Occoquan River. Southeast: Arrivals proceed via Charlotte Hall-Waldorf-Fort Washington. Departures proceed via Fort Washington-La Plata. Caution: Jet Penetration Route 187° radial of Andrews VOR crossing Andrews LFR at 1500'. East: Arrivals proceed from Shadyside via Andrews LFR to Fort Washington, avoid Andrews AFB Ctl Zone. Caution: Jet departures from Andrews AFB make their climb out on the 060° radial of the Andrews VOR. Northeast: Arrivals proceed well right of the Washington-Baltimore Parkway until past Beltsville, then NW of the city to Chain bridge. Departures proceed well right of the Washington-Baltimore Parkway until past Beltsville Airport. All acft flying in VFR conditions departing or arriving Washington National are requested to remain well clear of the Andrews AFB Ctl Zone, Bolling AFB and the Anacostia NAS VFR Corridors. ANACOSTIA/BOLLING AIRPORTS: VFR air tfc operg to and from Anacostia and Bolling AFB shall proceed to and from the local tfc patterns via established air corridors. North Corridor: Two miles wide extending from the Anacostia N boundary along the SE bank of the Anacostia River to a point on the E bank abeam of the Riverdale Rdo Bcn. Departures from both fields proceed via the corridor at 1500' MSL. Arrival tfc from N and NE enter the corridor E of the Anacostia River and abeam of the Riverdale Rdo Bcn at 2000' MSL. South Corridor: Two miles wide aligned along a 165/345° magnetic track from the Bolling Rdo Bcn to a point 1-1/2 miles E of Fort Washington Inlet. Departures will proceed at 1500' MSL until past Fort Washington. Arrivals will maintain 2000' MSL. Military pilots are requested not to exceed 160 knots IAS, while in the corridors. (9-9)

JET ACROBATIC AREAS - VICINITY WASHINGTON, D. C. - Acrobatic maneuvers by jet aircraft are conducted daily, VFR daylight hours only, between the altitudes of 10,000' and 20,000' MSL inclusive, within the following areas:

Area #1: The uncontrolled portion of that airspace which is bounded on the N by V-174; on the E and SE by B-47 and V-140; and on the S by V-156.

Area #2: The uncontrolled portion of that airspace which is bounded on the N by V-156; on the E by V-140; on the S by V-290; and on the W by V-103.

REGULATIONS OF THE ADMINISTRATOR PART 570: Rules of Washington National Airport-"570. 49 - No pilots other than those possessed of at least a private pilot rating or the equivalent shall operate aircraft on the airport."

SIMULTANEOUS VOICE TRANSMISSIONS FROM A SINGLE LOCATION: At several FAA facilities, simultaneous voice transmissions are made from a single location. For example, the New York .FSS. controls the transmitters at Idlewild, La Guardia, Newark, Colts Neck, Solberg and Wilton L/MF or VOR facilities.

To provide a uniformly brief announcement, generally for broadcast purposes, the name of the controlling facility, followed by the word AREA will be used, e.g., THIS IS NEW YORK AREA RADIO, etc.

Call from aircraft will be answered using the name of the station as stated by the pilot, e.g., a pilot calling "Newark Radio" will be answered by the New York FSS, "THIS IS NEWARK RADIO, etc."

The word "AREA" signifies that the transmission from the named (controlling) location is emanating simultaneously from one or more remotely controlled facilities, having a different name or names, as indicated in the ANRA Section of the AIRGI and/or applicable RF Charts.

A NOTAM will be issued from those facilities affected by the foregoing when the change to this procedure is made.

INTERFERENCE TO AIRCRAFT COMMUNICATIONS AND NAVIGATION EQUIPMENT: Several reports have recently been received involving interference to aircraft communications navigation and integrated flight instrumentation systems. This interference has been traced directly to passenger operated portable recorders and radio receivers. The interference, in some cases, resulted in the oscillation of the glide slope and VOR indicator needles. While all reports received to date have come from the airlines, it is recognized that many unreported cases may exist as any aircraft equipped with electronic devices is susceptible to this type of interference.

Due to the seriousness of interference of this nature and pending further investigation and resolution of the problem, the Federal Aviation Agency strongly urges that action be taken by all aircraft operators to preclude the use of such portable electronic devices during flight. To assist in the resolution of this problem, detailed reports of any instances of interference of this nature should be forwarded to the Federal Aviation Agency, Washington 25, D. C. (Attention: FS-1). This does not apply to portable recorders and dictating machines which meet Military Specifications MIL-1-16910 or other comparable military specifications nor to hearing aids.

TRANSCRIBED WEATHER BROADCASTS: Equipment is being provided at selected FAA FSS by which meteorological and Notice to Airmen data will be recorded on tapes and broadcast continuously over the low-frequency (200-400 kc) navigational aid (L MF range or H facility.)

Broadcasts are made from a series of individual tape recordings. The first three tapes identify the station, give general wea conditions in the area, pilot reports (PIREP) and radar reports, when available, and winds aloft data. The remaining tapes contain weather at selected locations within a 400 mile radius of the central point. Changes, as they occur, are transcribed onto the tapes.

Transcribed weather broadcasts are presently being made at the following locations as indicated:

Location	Freq.
Boise, Idaho	359 kc
Boston, Mass.	382 kc
Chicago, (Joliet), Ill.	350 kc, 257 kc
Cincinnati, Ohio	335 kc
Cleveland, Ohio	344 kc
Denver, Colo	379 kc
Fort Worth, Texas	365 kc
Indianapolis, Ind.	260 kc
Los Angeles, Calif.	332 kc
Miami, Florida	365 kc
Milwaukee, Wisconsin	242 kc
Minneapolis, Minnesota	206 kc
New York, N. Y.	209 kc
Oakland, Calif.	362 kc
Pittsburgh, Pa.	254 kc
Washington, D. C.	332 kc
Wichita, Kans.	332 kc

SMUGGLING IS THREAT TO SECURITY: The smuggling of instruments of war, including atomic devices and biological agents, and the illegal entry of aliens, are a serious threat to the security of the U. S. The Bureau of Customs and the Immigration and Naturalization Service are your first line of defense.

Customs offers generous rewards for original information leading to the apprehension and conviction of any person or persons smuggling or attempting to smuggle into this country any of the articles or devices mentioned herein. Payment in cash will be made immediately following seizure and conviction of violators. The identity of the payee will be kept secret and fully protected at all times.

To qualify for a reward, information must be original and in sufficient detail to make possible the seizure of the article being smuggled and the arrest of the person or persons involved. If you have such information, use the quickest means available to report it to the nearest Customs, Immigration or FAA officer who will see to it that when seizure is made and violators convicted you will receive the award. The Bureau of Customs will also make cash payment for information leading to seizure and forfeiture of any article or device covered by this notice even though no arrest is made.

NAVIGATIONAL WARNING: The following are low level "FAIRBALL" routes used by the USAF when conducting low level navigation flights in jet aircraft at 500 to 2,000 feet above the terrain. At the termination of the low level flight, aircraft will climb to altitudes between 14,000 to 20,000 feet MSL. Aircraft will fly hemispheric rules. Flights will be operated at random intervals and under VFR conditions during daylight hours only.

Route 2-J-2: Start at 40-14N, 93-36W (Entry - call Lamoni VOR): 40-25N, 92-07W; 42-21N, 90-54W; 43-28N, 91-00W; end nav leg 43-25N, 92-50W; to target 43-22-30N, 94-04W. Note: For a bomb run only, entry reporting will be 43-28N, 91-00W (Call Lone Rock VOR); remainder of route is identical as above.

Route 2-M-1: Start at 31-45N, 91-49W (entry - call Alexandria Radio), 31-35N, 94-20W; 34-00N, 95-02W; 34-27N; 94-38W; 34-35N, 93-20W(end nav. leg), to target-Little Rock. Note: for a bomb run only, entry reporting point will be 34-27N, 94-38W, (call-Fort Smith Radio), remainder of route is identical with above.

Route 2-P-1: Start at 39-11N, 86-52W (entry-call Terre Haute Radio), 38-02N, 86-31W; 38-18N, 87-55W; 39-23N, 90-37W; 38-52N, 92-18W (end nav. leg.) 38-44N, 92-44W; start climb to target-Clinton, Mo. Note: for a bomb run only, entry reporting point will be 38-52N, 92-18W (call-Columbia Radio), remainder of route is identical with above.

Route 2-S-1: Start at 29-29, 91-46, (entry reporting point-Baton Rouge VOR); to turning point 28-00, 91-30; to turning point 27-00, 92-30; to turning point 27-50, 94-00; to navigation termination point, bomb run entry point, and LONG LOOK start climb (if applicable) 27-50, 95-45; to SHORT LOOK start climb (if applicable) 28-11, 96-34; to target at Matagorda Island 28-13-30, 96-39-00. After bombs away, proceed to 28-21-30, 96-42-00, then right turn to Palacios VOR. On SHORT LOOK mission do not exceed 5000' MSL until past Port O'Connor, Texas. On LONG LOOK do not descend below 18,000' MSL until past Port O'Connor, Texas.

Route 8-J: Cross Florence VOR at flt alt (entry point-call Jacksonville ARTCC) descend to start low level 34-22N, 79-05W; 33-21N, 80-05W; 32-08N, 82-11W; 31-20N, 81-54W; 30-32N, 82-51W; 30-21N, 83-00W; 29-47N, 83-30W; 28-48N, 82-42W. Start climb to target Tampa/St. Petersburg.

Route 8-J Alternate: Cross Tallahassee L/F at flt alt (entry point - call Jacksonville ARTCC) descend to start low level 29-31N, 83-24W; 28-48N, 82-42W. Start climb to target Tampa/St. Petersburg.

Route 8-K: Cross Niagara Falls TACAN/TVOR at flt alt (entry point - call Cleveland ARTCC) descend to start low level 42-49N, 77-18W; 42-14N, 79-21W; 42-07N, 79-30W; 40-55N, 79-28W; 40-50N, 78-57W; 42-28N, 76-55W; 42-46N, 76-16W; 42-47N, 76-08W; 42-28N, 73-55W. Start climb to target Springfield. NOTE: This route is used by jet fighter aircraft on Sats and Suns.

Route 8-K Alternate: Cross Syracuse VOR at flt alt (entry point - call Boston ARTCC) descend to 42-28N, 73-55W. Start climb to target Springfield.

Route 8-M: Cross Columbia VOR at flt alt (entry point - call Columbia Radio) descend to 34-23N, 80-25W. Start climb to target Charlotte.

Route 8-P-1: Start at 43-42N, 69-50W; terminate at 44-20N, 68-04W.

Route 8-P-2: Start at 43-42N, 69-50W; 43-53N, 69-07W; terminate at 44-20N, 68-04W.

Route 8-R-1: Start at 18-05N, 67-54W; 17-56N, 67-11W; 17-56N, 66-18W; 18-00N, 66-00W. Entry reporting point San Juan ARTCC.

Route 8-S: Cross Nantucket VOR at flt alt (entry point - call Boston ARTCC) descend to start low level at 41-23N, 70-03W; 41-12N, 67-25W; 42-30N, 66-40W; 43-00N, 68-30W; 43-38N, 68-44W; 43-53N, 68-17W. Start climb to target at 44-46N, 67-50W.

Route 8-S Alternate: Cross Brunswick TVOR at flt alt (entry point - call Boston ARTCC) descend to start low level at 43-53N, 68-18W. Start climb to target 44-46N, 67-50W.

Route 8-T: Cross St. Petersburg VOR at flt alt (entry point - call Tampa Approach Control) descend to start low level at 27-33N, 83-16W; 27-30N, 84-43W; 27-24N, 84-51W; 26-10N, 85-00W; 26-00N, 84-51W; 25-51N, 81-41W; 25-56N, 81-32W; 26-57N, 81-03W; 27-01N, 81-03W. Start climb to target at 27-39N, 81-16W.

Route 8-T Alternate: Cross Ft. Myers VOR flt alt (entry point - call Miami ARTCC) descend to start low level at 25-51N, 81-41W; 25-56N, 81-32W; 26-57N, 81-03W. Start climb to target at 27-39N, 81-16W.

Route 15-A-1: Cross Salt Flat VOR at flight altitude (entry point - Call Salt Flat Radio), descend to start low level 30-50N, 103-00W; 30-10N, 102-10W; 30-30N, 100-05W; 32-00N, 99-15W; 33-05N, 99-30W; 34-25N, 100-30W. Start climb 34-39N, 100-56W; level off 35-01N, 101-33W, target Amarillo.

Route 15-A-3: Cross Douglas VOR at flight altitude (entry point - Call Douglas Radio), descend to start low level 43-00N, 103-00W; 41-30N, 101-30W; 39-25N, 102-10W; 38-00N, 101-40W, 36-00N, 100-45W. Start climb 35-50N, 101-00W; level off 35-25N, 101-36W, target Amarillo.

Route 15-B-2: Cross Peach Springs VOR at flight altitude (entry point-Call Las Vegas Radio), descend to start low level 37-07N, 114-30W; 38-45N, 116-30W; 39-40N, 115-10W; 41-00N, 114-50W; 42-10N, 113-55W; 43-10N, 114-25W. Start climb 43-18N, 115-02W; level off 43-30N, 115-52W, target Boise.

Route 15-C-1: Start descent Reno VOR, entry point 40-11N, 121-05W. Start climb 40-47N, 121-04W, target 41-55N, 121-04W.

Route 15-D-2: Entry at 32-37N, 102-37W to target at 32-34N, 101-08W.

Route 15-D-3: Start descent at Hudspeth VOR, Texas to start low level point at 31-08N, 105-10W to start climb at 30-48N, 104-46W to target at 30-18N, 104-02W.

Route 15-E-1: Start descemt 44-28N, 100-40W, entry point 44-34 1/2N, 101-30W. Start climb 44-43N, 103-28W, target 44-44 1/2N, 103-36W.

Route 15-F-1: Fairchild Air Force Base to 47-26N, 118-16W, target 47-52N, 119-07W.

Route 15-G-1: Cross Ukiah, California VOR at flight altitude (entry point)-(Call Ukiah Radio), descend to start low level 39-06N, 124-17W to 39-08N, 124-45W; 40-24N, 125-29W; 42-20N, 125-35W; 43-08N, 126-00W to climb point 43-32N, 124-48W to start climb for Long Look at 43-43N, 124-17W or to start climb for Short Look at 43-54N, 123-20W to target 43-58N, 123-05W, S of Eugene, Oregon.

Route 15-H-1: Entry at 43-21N, 117-18W to 42-24-30N, 118-36W.

Route 15-H-2: Entry at 42-31N, 120-14W to 42-44N, 119-38W to 43-34N, 118-12W.

Route 15-M-2: 36-18 1/2N, 121-54W to target, 35-19N, 120-52W, to target 36-18 1/2N, 121-54W. Route will be flown in both directions.

Route 15-R-1: Entry at 33-00N, 103-00W; to 34-00N, 102-28W; to target at 34-38-30N, 102-43W.

Route 15-T-1: Entry at 32-58N, 111-23W; to 32-54N, 109-50W.

PREFERRED ROUTES BETWEEN METROPOLITAN AREAS - Effective May 12, 1959 a complete list of preferred routes between major metropolitan areas will be published at periodic intervals in the Airman's Guide. The effective date of the published list and the date the next complete list is scheduled for publication will be provided.

Pilots are requested to use the preferred routes when filing IFR flight plans whenever possible. These routes have been developed to increase the efficiency of the air traffic control system.

1. Pilots can normally expect to receive clearance via the routes listed, thereby simplifying flight planning.
2. Considerable reduction in air/ground communication will ensue.
3. Departure and en route delays will be reduced.

Only those routes which are essential to achieve the above objectives have been included. Frequent review will be made to maintain accuracy of these routes on a national basis. Necessary revisions will be published in each issue of the Airman's Guide. Pilots are requested to make ink corrections to the last published list and retain and use, until a complete revised list is published.

RADAR WEATHER ADVISORY SERVICE (STAR GAZER) - On page 31 of the Flight Information Manual Volume 13 dated December 1959, Radar Weather Advisory Service (Star Gazer) will be discontinued on August 1, 1960, in the geographical area bounded by the following coordinates: 40-00N, 120-47W; NW to 41-25N, 121-50W; N to 45-50N, 121-50W; NE to 46-30N, 121-00W; N to a point on the U.S. - Canadian Border at 121-00W; thence E along the U.S. -Canadian Border to a point 113-25W; S to 42-00N, 113-25W; W to 42-00N, 119-25W; SW to the point of beginning.

RADAR - On page 30 of Flight Information Manual Volume 13, dated December 1959, add subtopic No-Gyro Vector or Approach - Aircraft Under Radar Control: A pilot under radar control will occasionally experience circumstances wherein his directional gyro or other stabilized compass is inoperative or inaccurate. When this occurs, he should so advise air traffic control and request a no-gyro vector or approach. Pilots of aircraft not equipped with a directional gyro or other stabilized compass who desire radar handling may also request a no-gyro vector or approach. Prior to commencing such vector/approach the pilot will be advised to make all turns at standard rate, and that turn instructions should be executed immediately upon receipt. For example, "Turn Right"; "Stop Turn." When a surveillance or precision approach is made the pilot will be advised after his aircraft has been turned onto final approach to make turns at half standard rate.

RADAR WEATHER ADVISORY SERVICE - On pages 31 and 32 of Flight Information Manual Volume 13 dated December 1959, under Radar Advisory Service Air Defense Command delete listings under Michigan, Oregon and Washington.

GOOD OPERATING PRACTICES-IFR RADAR DEPARTURE SERVICE AVAILABLE- On page 53 of Flight Information Manual Volume 13 dated December 1959, delete paragraph 12.

FLIGHT ASSISTANCE FOREIGN EXCHANGE AND INTERPHONE SERVICE: As an aid to substantial groups of pilots operating from airports not within local calling distance of an FAA Flight Service Stations, leased telephones services are provided to the nearest FAA station. One such service, entitled "Foreign Exchange" (FX), permits dialing a local number which will connect to the distant FSS at the cost of a local call. Another is "Interphones" a private line extension to the nearest FAA station and is normally located in the operations office at an airport where it is available to all pilots. Fixed base operators at the same airport may lease extension service on these lines for the convenience of pilots at the cost of a local telephone extension.

✓ LIST OF PERSONS NOT PERMITTED TO FLY TO OR OVER CUBA IN PRIVATE PLANES: On November 1, 1959, the Secretary of State, under the powers delegated to him by Presidential Proclamation 3004 and pursuant to the provisions of Section 215 of the Immigration and Nationality Act and regulations and rules prescribed thereunder, requested the Attorney General to prevent the departure of certain persons to or over Cuba in private aircraft. Pursuant to this request, the Commissioner of Immigration and Naturalization Service has served "Notice of Prevention of Departure" on the below-listed individuals.

Section 215 of the Immigration and Nationality Act provides that if a plane is used as an instrument for the illegal departure of a person from the United States contrary to such an order, the plane is subject to confiscation in addition to criminal penalties which may be imposed on the violator or persons who aid and abet violators.

The Service continues investigation of all illegal activities in the United States in connection with the present situation in Cuba. From time to time additions to the list may be made. In the meantime, if a person seeking to rent a plane is not well known to you or there is any doubt as to whether he is in any way connected with illegal Cuban activities, you are requested to call the nearest Immigration and Naturalization Service office for advice. You may also obtain this information from the Flight Information Center, Miami, Florida, telephone FRanklin 7-1495, which is operated by the Immigration and Naturalization Service.

Your cooperation in this matter will materially aid the Immigration and Naturalization Service in carrying out its mission and possibly save you the loss of an aircraft.

BE SAFER WITH A FLIGHT PLAN!

FLIGHT ADVISORY SERVICE IN SPECIFIED AREAS: This service has been established as a means of providing an increased degree of safety for civil turbojet air carrier flights while operating within defined flight advisory areas. The service is performed by certain selected radar equipped facilities and provides the civil turbojet air carrier pilot with information to assist him in avoiding other pertinent traffic. Areas where radar is used to provide advisory service are referred to as "radar advisory areas." Areas within which advisory service is provided without the use of radar are referred to as "nonradar advisory areas." The following procedures applicable to said areas are designated by the Administrator of the Federal Aviation Agency as standing air traffic control instructions:

A. The procedures applicable to all aircraft operating VFR or operating on an ATC clearance to climb or descend in VFR conditions or to maintain VFR-on-top with respect to the radar advisory areas or nonradar advisory areas are defined as follows:

NOTE: The radar advisory areas and nonradar advisory areas and the flight levels comprising these areas are depicted on charts entitled "Flight Information Publication - En Route - High Altitude (U.S.)," published by the Aeronautical Chart and Information Center, Air Photographic and Charting Service(MATS) USAF, and "High Altitude - En Route " published by the U.S. Coast and Geodetic Survey, Washington, D.C.

These charts are available to users through the U.S. Coast and Geodetic Survey.

1. Radar Advisory Areas

a. No additional operational restriction, control or communications requirement is placed on civil or military flights conducted under visual flight rules (VFR flights or flights cleared to climb or descend in VFR conditions or cleared to maintain VFR-on-top) provided such flights when operating within the areas specified as radar advisory areas from flight level 240 to flight level 390 inclusive are equipped with a functioning radar beacon transponder. Unless advised otherwise by ATC, transponders shall be adjusted to reply as follows:'

(1) Basic Mark X equipped aircraft - Mode 3 .
(2) Civil turbojet air carrier aircraft - Mode A Code 40 .
(3) Civil aircraft (other than turbojet air carrier) and military SIF equipped aircraft operating at an assigned level- Mode A (military Mode 3) Code 02.
(4) Civil aircraft (other than turbojet air carrier) and military SIF equipped aircraft operating VFR or VFR-on-top - Mode A (military Mode 3) Code 62.
(5) NORAD interceptor aircraft on air defense duties - Mode 3 Code 00
(6) Flights operating on a mode other than Mode 3 will adjust transponder to reply on Mode 3 and the assigned mode simultaneously.

Aircraft operating within restricted, warning or prohibited airspace are encouraged to operate transponders as outlined above when in proximity to radar advisory areas but such operation is not a requirement except when leaving those areas to enter radar advisory areas.

b. Any aircraft not equipped with a functioning beacon operating VFR, or cleared to climb or descend in VFR conditions, or cleared to maintain VFR-on-top from flight level 240 to flight level 390, inclusive desiring to operate within radar advisory areas must obtain specific authorization from the appropriate ARTC center prior to the time of entering such areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across radar advisory areas without a functioning beacon.

c. **In the event of two-way communications failure which precludes obtaining authorization to operate within radar advisory areas, the pilot may proceed across these routes maintaining an appropriate VFR cruising altitude as specified in CAR 60 or AFR 60-16 for the direction of flight.**

2. **Nonradar Advisory Areas**

The following operational procedures apply to aircraft operating VFR, as well as those cleared by ATC to climb or descend in VFR conditions or cleared to maintain VFR-on-top, while between flight levels 270 and 310 inclusive with desire to fly across or within those areas specified as nonradar advisory areas.

a. **Specific authorization must be obtained directly from the appropriate ARTC center or through the nearest FSS prior to entering these specified areas. ATC clearance to climb or descend in VFR conditions or ATC clearance to maintain VFR-on-top does not constitute specific authorization to operate within or across nonradar advisory areas.**

b. Request for specific authorization to proceed VFR or VFR-on-top on or across these segments must include a position report, type of aircraft, and estimated time of entry and exit from these segments. Unrestricted authorization will be granted, except that when conflict with a civil turbojet air carrier flight is indicated, aircraft operating VFR-on-top will be advised of the civil jet traffic and said approval will restrict operation to specific flight level(s), time or place as appropriate to preclude conflict with civil jet traffic.

B. These services should not be considered as providing positive separation. Within the limitation of the service, civil turbojet air carrier aircraft will be provided with traffic information and radar vectors to avoid observed traffic. Consequently, these services do not relieve pilots of their responsibilities to see and avoid other aircraft.

C. Radio and radar failure procedures applicable to civil air carrier turbojet flights while operating within radar advisory areas follow:

1. In the event of a ground radar failure the pilot will continue in accordance with ATC clearance remaining on the facility's frequency unless otherwise advised;
2. In the event of loss of communication with a USAF(ADC) radar facility on the designated control frequency the pilot should attempt to re-establish communication with the facility on 121.5 mc. If unable, he should utilize either direct center frequency, the nearest FSS, or company radio.

The above procedures are applicable to the following jet routes and areas:

1. VOR/VORTAC Jet Route #1 (Los Angeles, Calif., to Seattle, Washington.)
2. VOR/VORTAC Jet Route #2 (San Antonio, Texas to Tallahassee, Florida.)
3. VOR/VORTAC Jet Route #3 (Oakland, Calif., to Spokane, Washington.)
4. VOR/VORTAC Jet Route #4 (Los Angeles, Calif., to Phoenix, Ariz.)
5. VOR/VORTAC Jet Route #8 (Tulsa, Okla., to New York, N. Y.)
6. VOR/VORTAC Jet Route #12 (Baltimore, Md., to Pittsburgh, Pa.)
7. VOR/VORTAC Jet Route #16 (Portland, Ore., to Pullman, Mich.; Buffalo, N.Y. to Boston, Mass.) Nonradar advisory area from 60 nmi W of Dillon, Mont. to Int. of J16V with Category "A" radar flight advisory area of J90V SW of Billings, Mont.
8. VOR/VORTAC Jet Route #19 (Omaha, Nebr., to Int. J19V with J64V.)
9. VOR/VORTAC Jet Route #21 (Omaha, Neb., to Duluth, Minn.) (Dallas, Tex., to San Antonio, Tex.)
10. VOR/VORTAC Jet Route #22 (Lake Charles, La., to intersection with J55V)
11. VOR/VORTAC Jet Route #24 (Phoenix, Ariz., to Albuquerque, N.M.) (Indianapolis, Ind. to its Int with J-43-V near Cincinnati, Ohio.)
12. VOR/VORTAC Jet Route #25 (Dallas, Tex., to Tulsa, Okla.)
13. VOR/VORTAC Jet Route #26 (Amarillo, Tex., to Appleton, Ohio.)
14. VOR/VORTAC Jet Route #29 (Houston, Tex., to Cleveland, Ohio.)
15. VOR/VORTAC Jet Route #31 (Dallas, Tex., to Chicago, Ill.)
16. VOR/VORTAC Jet Route #33 (Shreveport, La., to the Int. with J31V and Kansas City, Mo., to Des Moines, Iowa.)
17. VOR/VORTAC Jet Route #34 (Cleveland, Ohio to Pittsburgh, Pa.)
18. VOR/VORTAC Jet Route #35 (New Orleans, La., to St. Louis, Mo.)
19. VOR/VORTAC Jet Route #37 (New Orleans, La., to Spartanburg, S. C.)
20. VOR/VORTAC Jet Route #41 (Miami, Fla. VOR to St. Petersburg, Fla. VOR.)
21. VOR/VORTAC Jet Route #41 (Kansas City, Mo., to Omaha, Nebr.)
22. VOR/VORTAC Jet Route #42 (Dallas, Tex., to New York, N. Y.)
23. VOR/VORTAC Jet Route #43 (St. Petersburg, Fla. to the Int of J43V with J84V.)
24. VOR/VORTAC Jet Route #45 (Alma, Ga., to St. Louis, Mo.)
25. VOR/VORTAC Jet Route #49 (Alma, Ga., to Spartanburg, S. C.)
26. VOR/VORTAC Jet Route #52 (Dallas, Tex., to Atlanta, Ga.) via Texarkana, Ark., VOR; Greenwood, Miss., VOR; Birmingham, Ala., VOR. (Dallas, Tex-Birmingham, Ala; extension to J52V.)
27. VOR/VORTAC Jet Route #53 (Miami, Fla., to the Int. of J53V and J81V; Spartanburg, S. C., to Pittsburgh, Pa.)
28. VOR/VORTAC Jet Route #55 (From the intersection with J22V to Kenton, Del.)
29. VOR/VORTAC Jet Route #56 (Salt Lake City, Utah to Denver, Colo.) Nonradar advisory area from 163 nmi E of Salt Lake City to 19 nmi W of Kremmling, Colo.
30. VOR/VORTAC Jet Route #58 (San Francisco, Calif., to New Orleans, La.) Nonradar advisory area from 170 nmi E of Tonopah, Nev. to 20 nmi SE of Bryce Canyon, Utah. Effective 25 August 1960.
31. VOR/VORTAC Jet Route #60 (Los Angeles, Calif., to New York, N.Y.) Nonradar advisory area from 25 nmi SW of Bryce Canyon, Utah VOR to 70 mi WSW of Denver, Colo., and from 120 nmi ENE of Denver, Colo., VOR to 50 nmi WSW of Wolbach, Neb. VOR.
32. VOR/VORTAC Jet Route #62 (Idlewild, N. Y. to Nantucket VOR.)
33. VOR/VORTAC Jet Route #64 (Los Angeles, Calif., to Chicago, Ill.) Nonradar advisory

(30 August 1960)

ar: a from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.
Jet Route #57 (Idlewild, N. Y., to U. S. - Canadian Border.)

12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 165° and Molokai, Hawaii 257° M radials, Molokai, Hawaii VOR; thence via the Molokai, Hawaii 050° M radial for a distance of 101 nmi.

area from 20 nmi SW of Alamosa, Colo., VOR to 25 nmi SW of Hill City, Kansas VOR.

34. VOR/VORTAC Jet Route #67 (Idlewild, N. Y., to U. S. - Canadian Border.)
35. VOR/VORTAC Jet Route #69 (Spartanburg, S. C., to Gordonsville, Va.)
36. VOR/VORTAC Jet Route #70 (Seattle, Wash. to Idlewild, N. Y.)
37. VOR/VORTAC Jet Route #71 (Appleton, Ohio to Front Royal, Va.)
38. VOR/VORTAC Jet Route #75 (Miami, Fla., to U. S. - Canadian Border)
39. VOR/VORTAC Jet Route #77 (Miami, Fla., to U. S. - Canadian Border)
40. VOR/VORTAC Jet Route #78 (Los Angeles , Calif., to New York, N. Y.)
41. VOR/VORTAC Jet Route #79 (Miami, Fla., to Idlewild, N. Y.)
42. VOR/VORTAC Jet Route #80 (Oakland, Calif. to New York) Nonradar advisory areas from 145 nmi E of Tonopah, Nev. to 70 nmi WSW of Denver, Colo; from 120 nmi ESE of Denver, Colo. to 25 nmi W of Hill City, Kans.
43. VOR/VORTAC Jet Route #81 (The intersection of J81V and J53V to Barracuda Int.)
44. VOR/VORTAC Jet Route #82 (Chicago, Ill., to Boston, Mass.)
45. VOR/VORTAC Jet Route #84 (Oakland, Calif., to the U. S. Canadian Border) nonradar advisory areas from 50 nmi E of Rock Springs, Wyo. to 150 nmi E of Rock Springs and from 40 nmi E of Scottsbluff, Nebr., to 50 nmi W of Wolbach, Nebr. Advisory Service on Jet 84 Victor will be provided flight level 270 and above from 100 nmi W to 40 nmi E of Scottsbluff, Nebr.
46. VOR/VORTAC Jet Route #85 (Miami, Fla., to the U. S. - Canadian Border.)
47. VOR/VORTAC Jet Route #87 (Houston, Tex., to Northbrook, Ill.)
48. VOR/VORTAC Jet Route #89 (Northbrook, Ill., to Miami, Fla.)
49. VOR/VORTAC Jet Route #90 (Seattle, Wash., to Chicago, Ill.)
50. VOR/VORTAC Jet Route #95 (Idlewild, N. Y. to U. S.-Canadian Border.)
51. VOR/VORTAC Jet Route #97 (Boston, Mass. to the U. S./Canadian Border)
52. VOR/VORTAC Jet Route #103 (St. Petersburg, Fla. to Orlando, Fla.)
53. CONTROL 1150 (West Palm Beach, Fla., to Wilmington, N. C.)

AREAS

1. That area 20 nmi either side of a line from Des Moines, Iowa VOR; intersection of Des Moines, Iowa 060° & Northbrook, Ill., 274° M radials; Northbrook, Ill., VOR; Pullman, Mich., VOR; Waterville, Ohio VOR; Joliet, Ill., VOR; Des Moines, Iowa VOR plus the area bounded by this line.

2. Duluth, Minnesota to the U.S.-Canadian Border via the Duluth 047° M radial (direct route between Duluth & Lakehead, Canada.)

3. Spokane, Washington to the U.S.-Canadian Border via the Spokane 028° M radial (direct route between Spokane & Cowley, Canada.)

4. Los Angeles, Calif., VOR; intersection of Los Angeles, Calif. 170° & Long Beach, Calif. 208° M radials; thence via the Long Beach, Calif 208° M radial (Control Area Extension 1177 for a distance of 180 nmi.

5. Los Angeles, Calif. VOR; thence via the Los Angeles, Calif. 236° M radial (Control Area Extension 1316) for a distance of 180 nmi.

6. Los Angeles, Calif. VOR; Santa Barbara, Calif. VOR; thence via the Santa Barbara, Calif. 232° M radial (Control Area Extension 1176) for a distance of 180 nmi.

7. Oakland, Calif. VOR; thence via the Oakland, Calif. 218° M radial (Control Area Extension 1173 over Sunset Intersection) for a distance of 150 nmi.

8. Oakland, Calif. VOR; thence via the Oakland, Calif 250° M radial (Control Area Extension 1173 over Francis Intersection) for a distance of 150 nmi.

9. Seattle, Wash. VOR; intersection of Seattle, Wash. 175° & Portland, Oregon 332° M radials; Portland, Oregon VOR; Newport, Oregon VOR; thence via the Newport, Oregon 216° M radial (Control Area Extension 1419) for a distance of 110 nmi.)

10. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 039° M radial for a distance of 118 nmi.

11. Honolulu, Hawaii VOR; Koko Head, Hawaii VOR; thence via the Koko Head, Hawaii 054° M radial for a distance of 114 nmi.

12. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Molokai, Hawaii 257° M radials; Molokai, Hawaii VOR; thence via the Molokai, Hawaii 056° M radial for a distance of 101 nmi.

13. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 250° M radial for a distance of 87 nmi.

14. Honolulu, Hawaii VOR; intersection of Honolulu, Hawaii 168° and Koko Head, Hawaii 243° M radials; thence via the Koko Head, Hawaii 243° M radial for a distance of 107 nmi.

15. Honolulu, Hawaii VOR; thence via the Honolulu, Hawaii 168° M radial for a distance of 99 nmi.

16. Honolulu, Hawaii LFR; thence NW via Red Airway 87 to a point 40 nmi NW of Port Allen rbn.

17. Newark, New Jersey LFR; via the Newark LFR SE crs. (Control Area Extension 1147) to the Tuna Intersection.

18. Miami, Florida VOR; via the Miami VOR 118° M radial for a distance of 92 nmi (boundary of the Miami Oceanic Control Area)

19. Seattle, Washington VOR to the U.S.-Canadian Border via the Seattle VOR direct radial to the Victoria (Patricia Bay), B.C., Canada RR.

20. Wolbach, Nebraska VOR; direct to Pawnee City, Nebraska VOR.

21. Boston, Mass., Terminal Area--That area within 20 nmi to either side of J-16-V between Albany, N.Y. & Boston, Mass.

22. New York City, N.Y., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Bridgeport, Conn. Int. via Poughkeepsie, N.Y. VOR to Albany, N.Y., VOR.
b. Idlewild, N.Y., VORTAC via Huguenot, N.Y., VOR; Wilkes-Barre, Pa., VOR; to Philipsburg, Pa., VORTAC.

23. Baltimore, Md., Terminal Area -- That area within 20 nmi to either side of a direct crs from Baltimore, Md., VOR via Harrisburg, Pa., VOR to Philipsburg, Pa., VOR Baltimore,Md., Terminal Area--
a. That area within 20 nmi from the sides and within the triangle formed by a direct course from the Baltimore, Md., VOR to the Idlewild, N.Y., VOR to the Salisbury, Md., VOR; to the Baltimore, Md., VOR.
b. That area within 20 nmi to either side of the center line of Control Area Extension 1148.

24. St. Louis, Mo., Terminal Area--That area within 20 nmi to either side of a direct crs from the:
a. Int of J-80-V & Terre Haute, Ind., 268° M radial; via the Int. of Terre Haute VOR 268° & St. Louis VOR 057° M radials; to St. Louis VOR.
b. St. Louis, Mo., VOR via Troy, Ill., VOR; V-12 Bible Grove, Ill., VOR; to Int. of Bible Grove VOR 040° M radial and J-80-V.
c. Maryland Heights, Mo., VOR via V-12 Readsville, Mo., VOR; to Int. of Readsville VOR 302° M radial and J-80-V.
d. Springfield, Ill., VOR via V-69 to Gillespie, Ill. Int.
e. Marion, Ill., Int. via V-179 and V-4 to St. Louis, Mo., VOR.

25. Los Angeles, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. Los Angeles, Calif., VOR via V-208 Thermal, Calif., VOR; V-432 to Rice, Calif. VOR.
b. Los Angeles, Calif., VOR via V-201 Palmdale, Calif., VOR; V-12 to Hector, Calif., VOR.
c. Los Angeles, Calif., VOR via Int. of V-299 and Palmdale, Calif, 264° M radial; to Int. Palmdale, Calif., 264° M radial and J-1-V.
d. Los Angeles, Calif, VOR via V-25 Santa Barbara, Calif., VOR; to Int. of Santa Barbara VOR 336° M radial and J-1-V.
e. Peach Springs, Ariz., VOR via Twenty-Nine Palms, Calif., VOR; V-264 and V-16 to Los Angeles, Calif., VOR.

26. Oakland, Calif., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
a. San Francisco, Calif., VOR via V-199 to Red Bluff, Calif., VOR.
b. Pedro, Calif., Int. via V-27-W Salinas, Calif., VOR; to Int. of Salinas VOR 102° M radial and J-1-V.
c. Oakland, Calif., VOR via V-195 Benecia, Calif., Int.; Linden, Calif., VOR; to Int. of Linden VOR 100° M radial and J-58-V.

(30 August 1960)

27. Dallas, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Wichita Falls, Tex., VOR via Bridgeport, Tex., VOR to Dallas, Tex., VOR.
    b. Texarkana, Ark., VOR via V-278 to Dallas, Tex., VOR.
    c. Dallas, Tex., VOR via V-18 Quitman, Tex., VOR; V-54 to Texarkana, Ark. VOR.
    d. Dallas, Tex., VOR via the Int. of the Dallas VOR 230° and the Waco, Tex., VOR 344° M radials; to the Waco, Tex., VOR.
    e. Dallas, Tex., VOR via the Int. of the Dallas VOR 178° and the Waco, Tex., VOR 028° M radials; to the Waco, Tex., VOR.

28. Atlanta, Ga., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Nashville, Tenn., VOR to Crossville, Tenn. VOR.
    b. Spartanburg, S. C., VOR via V-20-N to Norcross, Ga., VOR.
    c. Atlanta, Ga., VOR via V-454 and V-185 to Spartanburg, S. C. VOR.

29. Miami, Fla., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Orlando, Fla., VOR via J-81-V to Miami, Fla., VOR.
    b. Lakeland, Fla., VOR via V-7, V-35, V-35-W, V-157-W, and V-51 to Biscayne, Bay, Fla., VOR.
    c. West Palm Beach, Fla., to Biscayne Bay, Fla., VOR.

30. Detroit, Mich., Terminal Area -- That area within the United States which is 20 nmi to either side of a line drawn from the Pullman, Mich., VOR via direct Lansing, Mich., VOR; direct Salem, Mich., VOR; via Salem VOR 109° M radial to the U.S. Canadian border; plus that area within the United States which is S of the above described line and N of J-60-V.

31. Denver, Colo., Terminal Area -- That area within 20 nmi to either side of a direct crs. from the:
    a. Denver, Colo., VOR via V-160 to a point 100 nmi NE of Denver VOR.
    b. Denver, Colo., VOR via V-148 Thurman, Colo., VOR; thence via Thurman VOR 028°M radial to a point 68 nmi NE of Thurman VOR.
    c. Kiowa, Colo., VOR via V-19 Pueblo, Colo., VOR thence via J-13-V to the northern edge of the currently depicted Category "B" area of J-64-V.
    d. Roggen, Colo., Int. via V-220 to Kremmling, Colo., VOR.
    e. Kiowa, Colo., VOR via Kiowa VOR 250° M radial to a point 80 nmi SW of Kiowa VOR.

32. From the Miami, Florida, VOR via the Marathon, Florida, Rdo Bcn; thence via Ctl Area Extension 1234 for a distance of 56 nmi -- bndry of the Havana Cuba Ctl Area.

33. Houston, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. Houston, Tex., VOR via the Int of the Houston 036° and the Lake Charles, La, 265° M radials to the Lake Charles VOR (V-222N).
    b. Houston, Tex., VOR via the Int of the Houston VOR 082° and the Lake Charles, La., VOR 233° M radials to the Lake Charles VOR. (V20S).
    c. Houston, Tex., VOR via the Int of the Houston VOR 315° and the Leona, Tex., VOR 162° M radials; to the Leona, Tex., VOR.
    d. Houston, Tex., VOR via the Int of the Houston VOR 345° and the Leona, Tex., VOR 132° M radials; to the Leona, Tex., VOR.

34. San Antonio, Tex., Terminal Area -- That area within 20 nmi to either side of a direct crs from the:
    a. San Antonio, Tex., VOR via the Int of the San Antonio VOR 048° and the Austin, Tex., VOR 166° M radials to the Austin, Tex., VOR.
    b. San Antonio, Tex., VOR via the Int of the San Antonio VOR 353° and the Austin, Tex., VOR 248° M radials; to the Austin, Tex., VOR.

35. New Orleans, La., Terminal Area -- That area within 20 nmi to either side of a direct course from the:
    a. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 320° and the Alexandria, La., VOR 098° M radials; to the Alexandria, La., VOR. (Overlies V-114-N)
    b. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 030° and the McComb, Miss., VOR 142° M radials; to the McComb, Miss., VOR.(Overlies V-9-E).
    c. McComb, Miss., VOR to the Int. of the McComb, Miss., VOR 222° and the New Orleans, La., VOR 320° M radials. (Overlies V-194).
    d. New Orleans, La., VOR via the Int. of the New Orleans, La., VOR 094° and the Mobile, Ala., VOR 219° M radials; to the Mobile, Ala., VOR. (Overlies V-240).
    e. Mobile, Ala., VOR to the Int. of the Mobile, Ala., VOR 258° and the New Orleans, La., VOR 030° M radials. (Overlies V-20-N.)
    f. Alexandria, La., VOR to the Baton Rouge, La., VOR. (Overlies V-114.)
    g. Baton Rouge, La., VOR via the Int. of the Baton Rouge, La., VOR 126° and the New Orleans, La., VOR 269° M radials; to the New Orleans, La., VOR.
    h. New Orleans, La. VOR via the Int of the New Orleans, La. VOR 220° and the Lafayette, La. VOR 102° M radials; to the Lafayette, La. VOR (overflies Victor Airway 20 South.)
    i. From the New Orleans, La. VOR via the Int of the New Orleans, La. VOR 094° and the Picayune, Miss. VOR 155° M radials; to the Int of the Picayune, Miss. VOR 155° M radial with Control Area Extension 1226.
    j. From the Int. of the Picayune, Miss. VOR 155° and the New Orleans, La. VOR 116° M radials to the Int of the New Orleans, La. VOR 116° M radial with Control Area Extension 1226.

36. Tampa, Fla., Terminal Area -- That area within 20 nmi to either side of a direct course from the:
    1. St. Petersburg, Florida VOR direct to the Orlando, Fla., VOR. (Overlies V-152.)
    2. St. Petersburg, Fla., VOR via the Int. of the St. Petersburg, Fla., VOR 038° and the Orlando, Fla., VOR 257° M radials; to the Orlando, Fla., VOR. (Overlies V152N).
    3. St. Petersburg, Fla., VOR via the Lakeland, Fla., VOR; to the Orlando, Fla., VOR. (Overlies V-152S).
    4. Ft. Meyers, Fla. VOR via direct St. Petersburg, Fla. VOR; to the Int of the St. Petersburg, Fla. VOR 349° and the Ocala, Fla. 233° M radials (Overlies Victor Airway 35.)
    5. From the Ocala, Fla. VOR 233° M radial to its int with the Cross City, Fla. VOR 183° radial.
    6. From the St. Petersburg, Fla VOR via the Int. of St. Petersburg, Fla. VOR 288° and the Cross City, Fla. VOR 183° M radials; to the Int of the Cross City Fla. VOR 183° and the Ocala, Fla. VOR 233° M radials.

37. From the St. Petersburg, Fla., VOR to the Int. of the St. Petersburg, Fla., VOR 274° M radial with Control Area Extension 1226.

38. From the Egmont Key, Fla., NDB via Control Area Extension 1226 to the Grand Isle, La., NDB.

39. From the Grand Isle, La., NDB via direct to the New Orleans, La., VOR.

40. From the Int. of J85-V and J41-V direct to the Egmont Key, Fla, NDB.

41. Green Federal Airway #1 (From the Int. of G1 with U.S.-Canadian Border W of Millinocket, Me., to Int. of G1 with U.S.-Canadian Border NE of Millinocket, Me.)

42. Within 100 nmi radius of Guam rdo rng and 20 nmi either side of a rhumb line route as indicated below:
    1. Honolulu/Guam
    2. Guam/Wake
    3. Guam/Manila

43. Pullman, Mich, VOR via direct Peck, Mich VOR; thence via the Peck, Mich VOR 078° M radial to the U.S./Canadian Border.

44. Cleveland Terminal Area - That area 20 nmi either side of the Cleveland 027° radial between Cleveland, Ohio, VORTAC and the U.S./Canadian Border.

AIR FORCE BLACKOUT TRAINING: A waiver to the provisions of section 60.23(A) of part 60 of the Civil Regulations has been granted to the Air Defense Command and they are conducting Interceptor Training against target acft without navigation lights at and above flight level 400 within the continental limits of the U.S.A. during hours of darkness. ADC assumes responsibility for radar separation between target and interceptor aircraft and all other aircraft.

VOR RECEIVER CHECK POINTS: The following means are available for checking the accuracy of VOR receivers: radiated test signals, airborne check points and ground check points. Pertinent details on the radiated signals and a tabulation of the check points (by facility, including complete location of the check points) will be found on pages 15-25 of the Flight Information Manual, Vol. 13, dated December 1959. As required, amendments to the radiated signals or check points are carried in the Airman's Guide under the heading "Flight Information Manual Corrections" Likewise, the radiated signals and the list of airports at which check points are located (tabulated by city and airport but without the specific details on the check points) are carried in the Airman's Guide from time to time.

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling opera

✓ JACKSONVILLE CENTER/WASHINGTON CENTER FLIGHT ADVISORY AREA BOUNDARY described as follows: Beginning at a point 32-40-00N, 76-25-00W; thence direct to 33-58-30N, 77-50-00W to 34-00-00N, 78-07-00W; 34-12-00N, 78-17-00W; 34-21-00N, 79-17-00W; 34-31-00N, 79-30-00W; 34-33-00N, 79-43-30W; 35-01-45N, 80-02-00W.

✓ PREFERRED ROUTES CORRECTIONS: Volume 15, Number 9 dated 5 July 1960:

(1) Page 126, Charleston to Cleveland should read: V35 PKB V59 V427 Kent, AVR 355 radial, ACO 302 radial Ascot, direct CLE.

(2) Page 126, Charlotte to Cleveland should read: V37 PAK V59 V427 Kent, AVR 355 radial, ACO 302 radial Ascot, direct CLE.

(3) Page 126, Chicago (Midway) to Cleveland should read: V6 VWV, V30, MFD 052 radial Penfield, direct CLE.

(4) Page 127, Chicago (O'Hare) to Cleveland should read: V84 PMM, V30, MFD 052 radial Penfield, direct CLE.

(5) Page 127, Cleveland to Charlotte should read: Medina V443E V133.

(6) Page 127, Cleveland to Columbus should read: Medina V443E V43.

(7) Page 127, Cleveland to Miami should read: Medina V443E V133 CRW V35 AVL V185 Dover V157 LAL V7 FMY V35.

(8) Page 127, Cleveland to Philadelphia should read: V6 V33 V12 V29 Darby direct PHL.

(9) Page 127, Dayton to Cleveland should read: V275 FDY, V14 ATO, V30, MFD 052 radial Penfield, direct CLE.

(10) Page 128, Miami to Cleveland should read: V157 ALD V37 PSK V59 V427 Kent, AVR 355 radial, ACO 302 radial Ascot, direct CLE.

(11) Page 130, St. Louis to Cleveland should read: V12 Wilbur, V11 IND, V14 ATO, V30, MFD 052 radial Penfield, direct CLE.

✓ RESTRICTED AREA AMENDMENTS: The following Restricted Area Amendments shall become effective as follows:

(Part 608)

Effective 0001 EST 15 October 1960:

In Section 608.43, the Wilmington, Ohio, Restricted Area (R-109) is amended by deleting "Wright Air Development Center, Wright-Patterson AFB, Dayton, Ohio" and substituting therefor "Federal Aviation Agency, Indianapolis, Ind., Air Route Traffic Control Center."

Effective upon date of publication in Federal Register.

In Section 608.30, the Hammond Bay, Michigan, Restricted Area (R-424) is revoked.

SMUGGLING BY AIR INTO U. S: The cooperation of all pilots is requested by the U. S. Immigration and Naturalization Service and the U. S. Bureau of Customs in combatting the smuggling of illegal aliens and contraband into the U. S. by air. Many pilots may be in a position to obtain information concerning such illegal activity.

Report immediately any information which may come to your attention regarding smuggling by air, whether it be of persons or contraband, directly to the nearest U. S. Immigration and Naturalization Service or U. S. Bureau of Customs office, or through the FAA, if desired. To do so will help law enforcement and thereby lessen the possible need for imposing more restrictive regulations on flying and flyers. Rewards for original information leading to arrests and convictions or the seizure of contraband are paid by the Bureau of Customs.

BE SAFER WITH A FLIGHT PLAN!

USAF HIGH ALTITUDE AIR REFUELING AREAS (SAC TAC)

USAF jet aircraft have implemented, on a continuing basis, high altitude refueling operations in the areas described below, and at the altitudes and times specified for each area. During the scheduled refueling period, other IFR traffic will not be cleared through an active refueling area unless the refueling aircraft and the aircraft proposing to traverse the area can be provided radar separation by the FAA. Additional refueling areas on the east coast will be published in the near future. Effective date of changes (which are indicated by ✓) is September 11, 1960

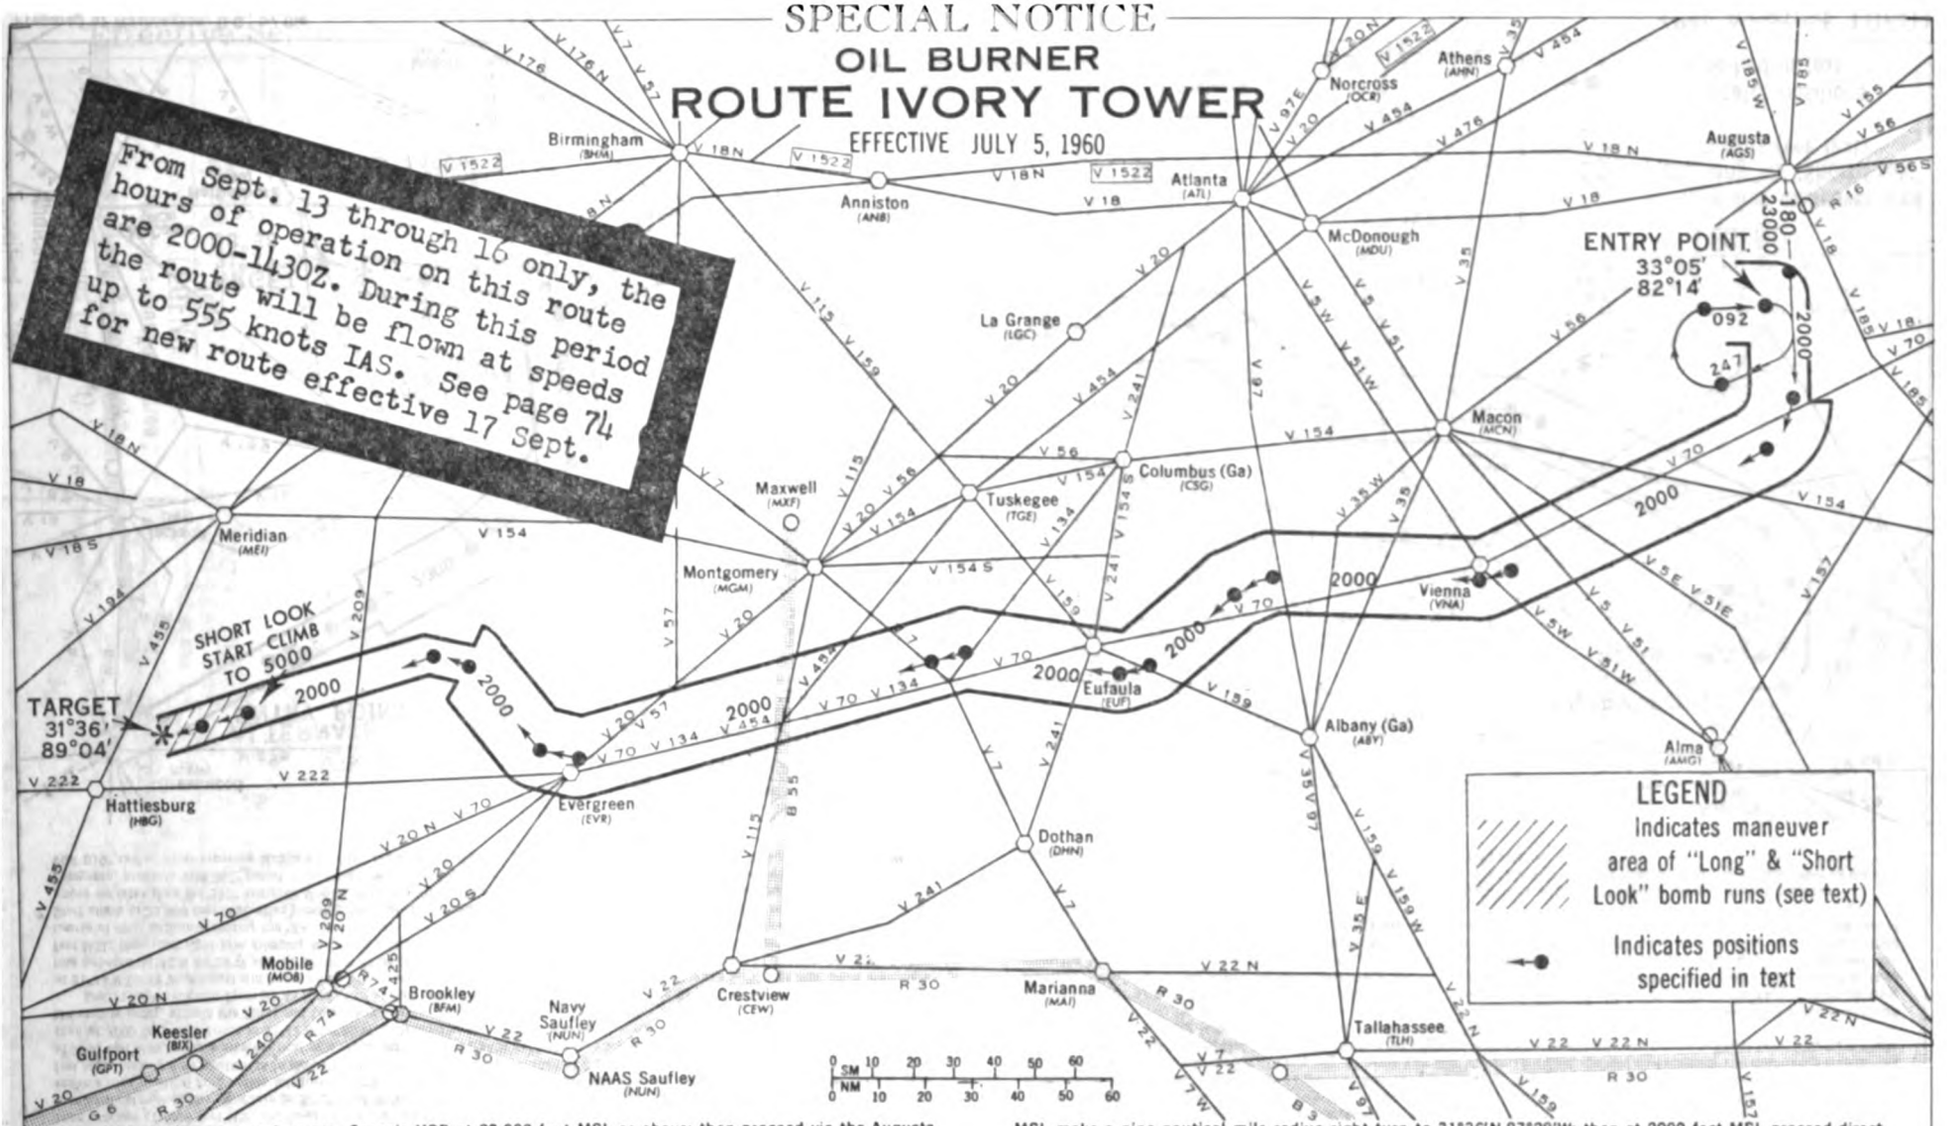
SECOND ANNUAL GENERAL AVIATION FLY-IN: All pilots are invited to attend the second annual general aviation "fly in" to be held October 1, 1960 at the Federal Aviation Agency's National Aviation Facilities Experimental Center at Atlantic City, New Jersey."

SKY SHIELD EXERCISE: Effective September 10, 1960 between 0600Z and 1200Z a large scale air defense exercise to be known as SKY SHIELD will be conducted regardless of weather. The exercise will encompass the entire North American Continent North of the Mexican Border. The Administrator of FAA has determined that in the interest of safety, non-participating aircraft should not operate in the continental U.S. and Alaska during the exercise period. Pilots must plan their flights so as to be on the ground or outside the exercise area by 0600Z giving consideration to possible delay factors such as weather, departure delays, etc. During the early phase of the exercise, participating aircraft will be operating at all altitudes out to approximately 600 nmi from the coastline. Aircraft bound for the continental U.S. including Alaska will not be issued an Air Traffic Control clearance to approach closer than 150 miles to the Coast prior to 1200Z since flight in the offshore area will be hazardous during the entire exercise period.

NAVIGATIONAL WARNING-USAF OPERATION "OIL BURNER". USAF (Strategic Air Command) is conducting low level navigational flights in jet aircraft in both VFR and IFR weather conditions within 10 statute miles either side of the centerline of the routes on the following pages, and at the alts specified therein. At the termination of the low level flights, the acft climb to alts between 4000 and 22,000 feet MSL for simulated bomb runs on a target, which is located in the vicinity of a Radar Bomb Scoring site. The low alt simulated bomb run is referred to as a "Short Look;" the intermediate alt one as a "Long Look." "Oil Burner" flights are conducted during both the hours of daylight and darkness, only during times specified for each route.

(30 August 1960)



SPECIAL NOTICE

SPECIAL NOTICE

OIL BURNER
ROUTE IVORY TOWER

EFFECTIVE JULY 5, 1960

From Sept. 13 through 16 only, the hours of operation on this route are 2000-1430Z. During this period the route will be flown at speeds up to 555 knots IAS. See page 74 for new route effective 17 Sept.

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until 20 nautical miles South, then start a descent to 2000 feet MSL. At 30 nautical miles South, aircraft will start a right standard rate turn to a true course of 247° to 32°49'N-82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N-82°30'W to the entry point of the low level route at 33°05'N-82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N-82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N-82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL Southwest along the South edge of Victor Airway 70 to 32°10'N-83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N-83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N-84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N-84°32'W, then at 2000 feet MSL proceed direct to 31°53'N-84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N-85°01'W, then at 2000 feet MSL proceed direct to 31°54'N-85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N-85°49'W; then at 2000 feet MSL proceed direct to 31°34'N-87°18'W; then at 2000 feet MSL make a nine nautical mile radius right turn to 31°36'N-87°28'W; then at 2000 feet MSL proceed direct to 31°53'N-87°46'W; then at 2000 feet MSL make a nine nautical mile radius left turn to 31°55'N-87°55'W; then proceed at 2000 feet MSL to 31°43'N-88°43'W. At this point, "Short Look" missions will start a climb so as to reach 5000 feet MSL at 31°39'N-88°55'W; then at 5000 feet MSL proceed direct to the target at 31°36'N-89°04'W.

After the simulated bomb run, aircraft will proceed straight ahead, on the bomb run track, and climb to 6000 feet MSL. Upon reaching 6000 feet MSL, aircraft will make a right turn to a true course of 106° and maintain 6000 feet MSL until past the 180° radial of the Meridian, Mississippi VOR; then start a climb to 22,000 feet MSL proceeding direct to the intersection of the McComb, Mississippi VOR 068° radial and the Meridian VOR 160° radial; then continue climbing in a non-standard, one minute holding pattern (making all turns to the left) Southwest of the intersection on the 068° radial of the McComb VOR.

Only "Short Look" missions are conducted on this route. The hours of operation on this route are 2000Z to 2400Z Monday through Friday, and 0000Z to 0800Z Tuesday through Saturday.

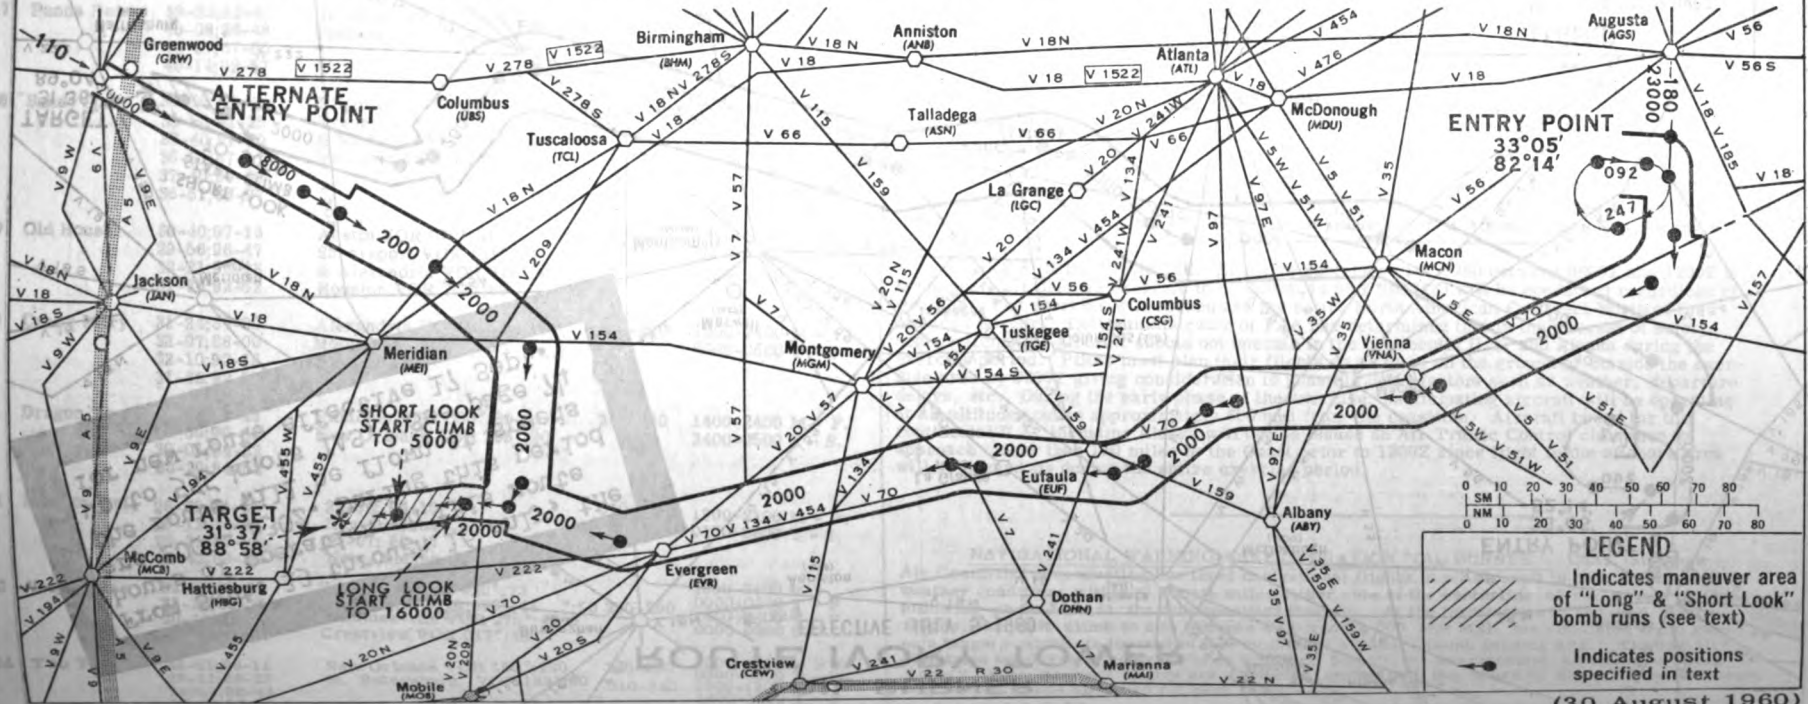
SPECIAL NOTICE

OIL BURNER

ROUTE IVORY TOWER

EFFECTIVE SEPTEMBER 17, 1960

Aircraft will enter at Augusta, Georgia VOR at 23,000 feet MSL or above; then proceed via the Augusta VOR 180° radial at assigned altitude until twenty nautical miles south, then start a descent to 2000 feet MSL. At thirty nautical miles south, aircrafts will start a right standard rate turn to a true course of 247° to 32°49'N 82°26'W; then start a right standard rate turn to a true course of 092° at 33°06'N 82°30'W to the entry point of the low level route at 33°05'N 82°14'W, and at 2000 feet MSL, turn right to intercept the 180° radial of the Augusta VOR to 32°46'N 82°08'W. Aircraft will then make a nine nautical mile radius right turn to 32°35'N 82°16'W at 2000 feet MSL; then proceed at 2000 feet MSL southwest along the south edge of Victor Airway 70 to 32°10'N 83°25'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 32°09'N 83°30'W; then at 2000 feet MSL, proceed direct to 32°09'N 84°25'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 32°07'N 84°32'W, then at 2000 feet MSL proceed direct to 31°53'N 84°54'W; then at 2000 feet MSL, make a nine nautical mile radius right turn to 31°51'N 85°01'W, then at 2000 feet MSL proceed direct to 31°54'N 85°46'W; then at 2000 feet MSL, make a nine nautical mile radius left turn to 31°54'N 85°49'W; then at 2000 feet MSL proceed direct to 31°32'N 87°32'W; then at 2000 feet MSL direct to 31°42'N 88°06'W, at this point the navigation portion of the route ends and the route width narrows to ten statute miles, at both the Short and Long Look targets.



Short Look bomb run: From 31°42'N 88°06'W aircraft will proceed direct at 2000 feet MSL to 31°42'N 88°21'W; thence direct to target at 31°37'N 88°58'W. Aircraft will begin climb after passing Meridian, Mississippi 178° radial, and reach 5000 feet MSL when crossing a line between 31°42'N 88°59'W and 31°37'30"N 88°54'30"W. After passing target aircraft will proceed direct to 31°35'N 89°14'W at 5000 feet MSL; then start right turn climbing to cross 31°45'N 89°14'W at 6000 feet MSL on a true course of 080°. Aircraft will maintain a true course of 080° until intercepting the 064° radial of McComb, Mississippi VOR, maintain 6000 feet to Meridian, Mississippi VOR 180° radial. Start climb to 23,000 feet MSL after crossing Meridian 180° radial. Proceed outbound on McComb 064° radial, reach 15,000 feet MSL or above no later than the 352° radial of Mobile, Alabama VOR. Maintain 23,000 feet MSL or below until reaching the intersection of the Evergreen, Alabama VOR 300° radial. Turn right inbound on Evergreen VOR 300° radial maintaining 23,000 feet MSL until crossing Mobile VOR 010° radial. After crossing Mobile VOR 010° radial, start climb to Flight Level 270, reach Flight Level 270 prior to crossing Mobile VOR 027° radial. Maintain Flight Level 270 to Evergreen VOR.

Long Look bomb run: From 31°42'N 88°06'W aircraft will proceed direct to 31°42'N 88°21'W at 2000 feet MSL. Start climb to 16,000 feet MSL, aircraft will reach 16,000 feet MSL at or before crossing a line between 31°42'N 88°59'W and 31°37'30"N 88°54'30"W; maintain 16,000 feet MSL to target at 31°37'N 88°58'W; then turn left to 31°24'N 89°04'W maintaining 16,000 feet MSL. Turn right to 31°40'N 89°22'W at 16,000 feet MSL; continue right turn climbing to 17,000 feet MSL so as to cross 31°45'N 89°14'W at 17,000 feet MSL on a true course of 080°. Aircraft will maintain a true course of 080° until intercepting the 064° radial of McComb, Mississippi VOR, maintain 17,000 feet MSL to Meridian, Mississippi VOR 180° radial. Start climb to 23,000 feet MSL after crossing Meridian 180° radial. Proceed outbound on McComb 064° radial, reach 21,000 feet MSL no later than 352° radial of Mobile, Alabama VOR. Maintain 23,000 feet MSL or below until reaching the intersection of Evergreen, Alabama VOR 300° radial. Turn right inbound on Evergreen VOR 300° radial maintaining 23,000 feet MSL until crossing Mobile VOR 010° radial. After crossing Mobile VOR 010° radial, start climb to Flight Level 270, reach Flight Level 270 prior to crossing Mobile VOR 027° radial, maintain Flight Level 270 to Evergreen VOR.

Alternate Entry to the oil burner route. Cross the Greenwood, Mississippi VOR at 20,000 feet MSL, proceed via the Greenwood VOR 110° radial to 32°47'N 88°30'W maintaining 20,000 feet MSL until fifteen nautical miles southeast; then descend so as to cross the Jackson, Mississippi Vor 037° radial at 8,000 feet MSL; maintain 8,000 feet MSL until crossing the Jackson VOR 053° radial; then descend so as to cross the Jackson VOR 061° radial at 2000 feet MSL. Then at 2000 feet MSL proceed direct to 32°20'N 88°00'W; then at 2000 feet MSL direct to 31°45'N 88°03'W; then at 2000 feet MSL direct to 31°42'N 88°06'W; thence execute Short Look or Long Look via established route. Alternate entry route width restricted to ten statute miles until crossing the Jackson, Mississippi VOR 061° radial. Remainder of alternate entry route width twenty statute miles.

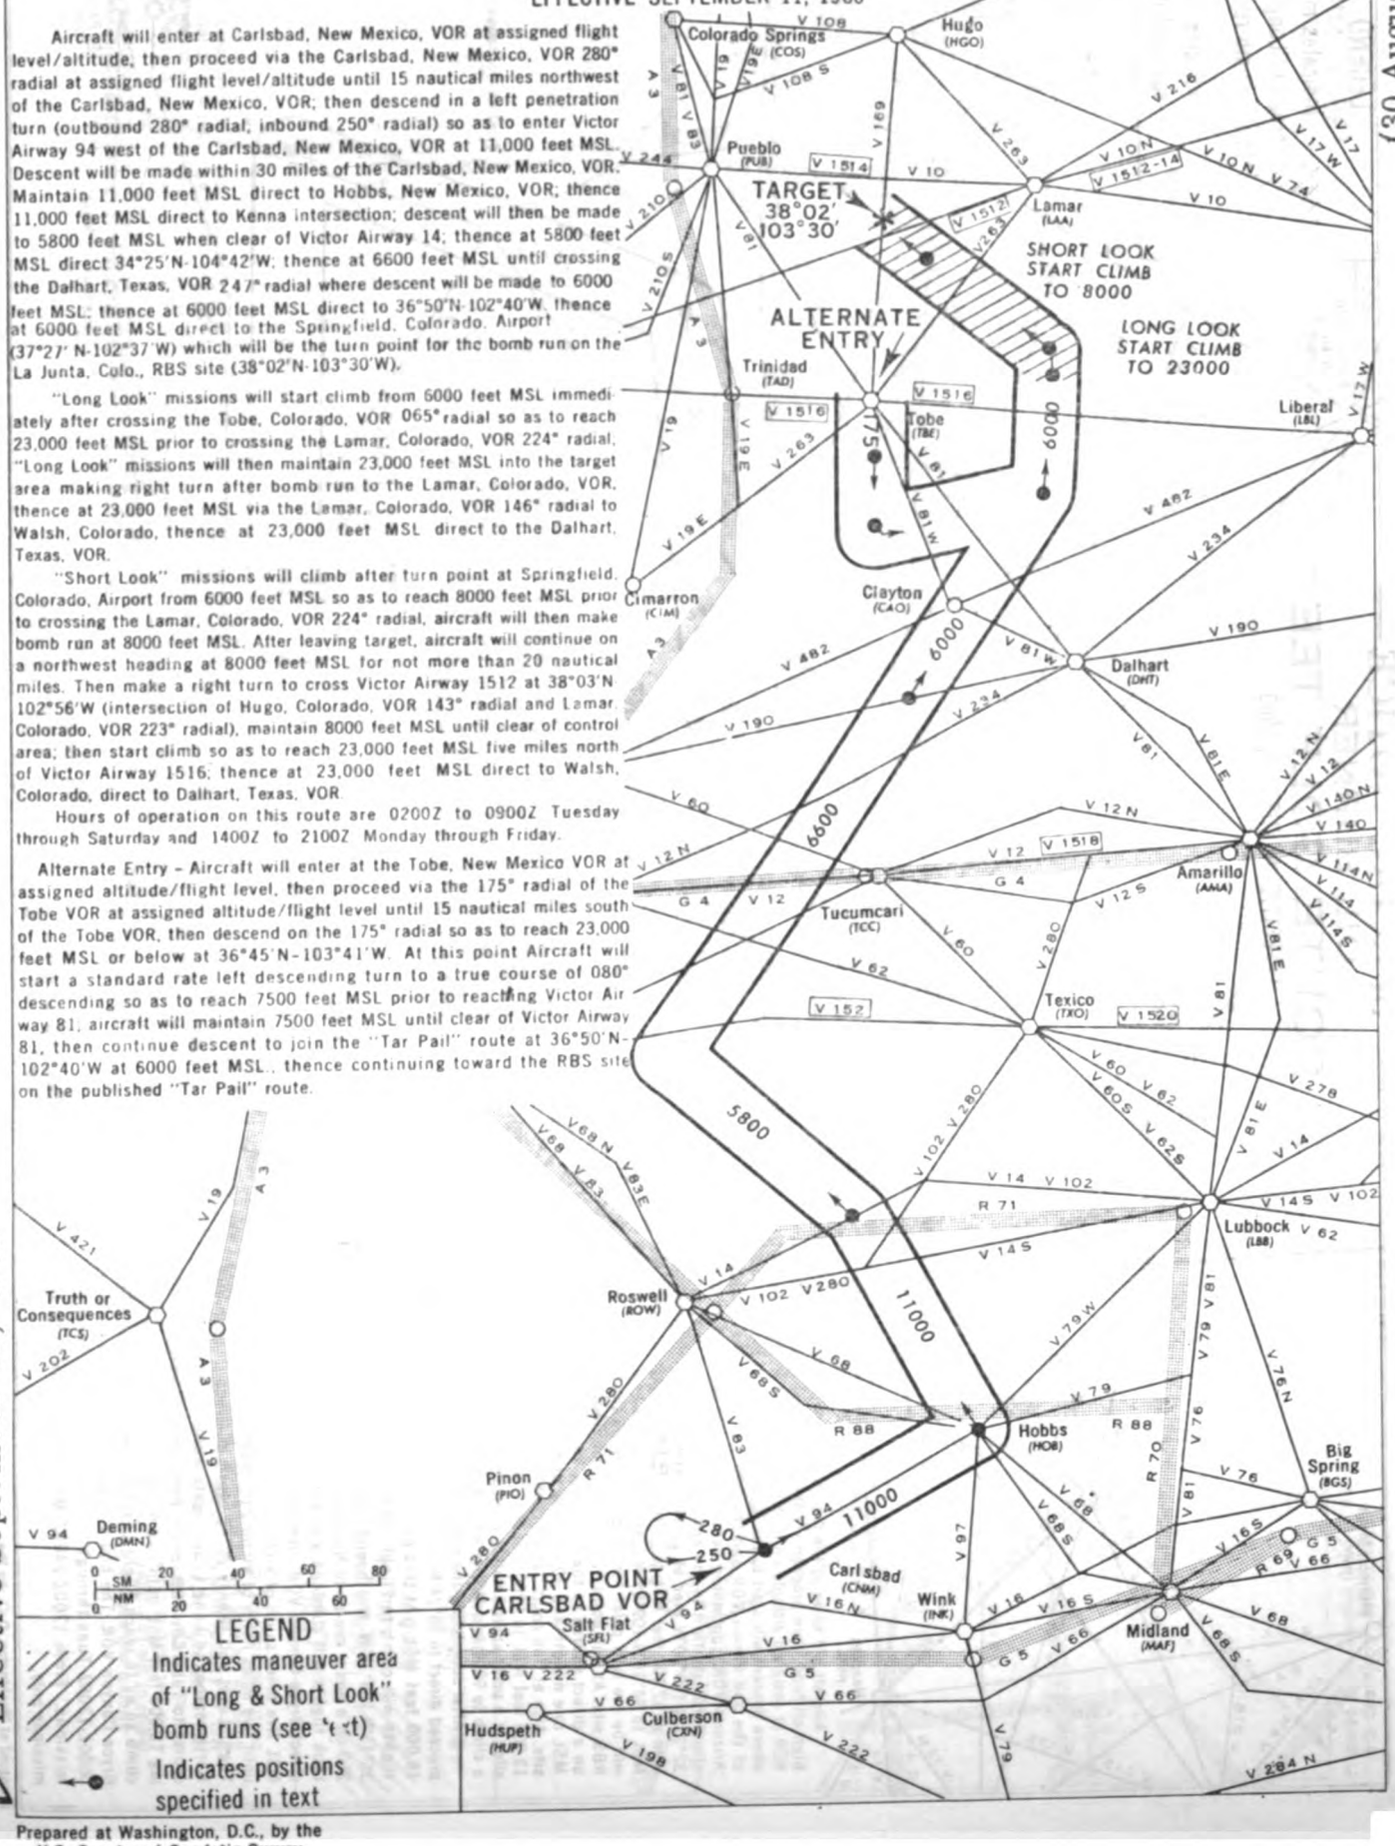
Hours of operation on this route are 2000Z to 2400Z Monday through Friday and 0000Z to 0800Z Tuesday through Saturday.

The route width on the 180° radial of the Augusta, Georgia VOR from the VOR to 32°46'N 82°08'W, is five statute miles on the east side of the route centerline and ten statute miles on the west side of the route centerline.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(30 August 1960)

SPECIAL NOTICE
OIL BURNER
ROUTE TAR PAIL
EFFECTIVE SEPTEMBER 11, 1960



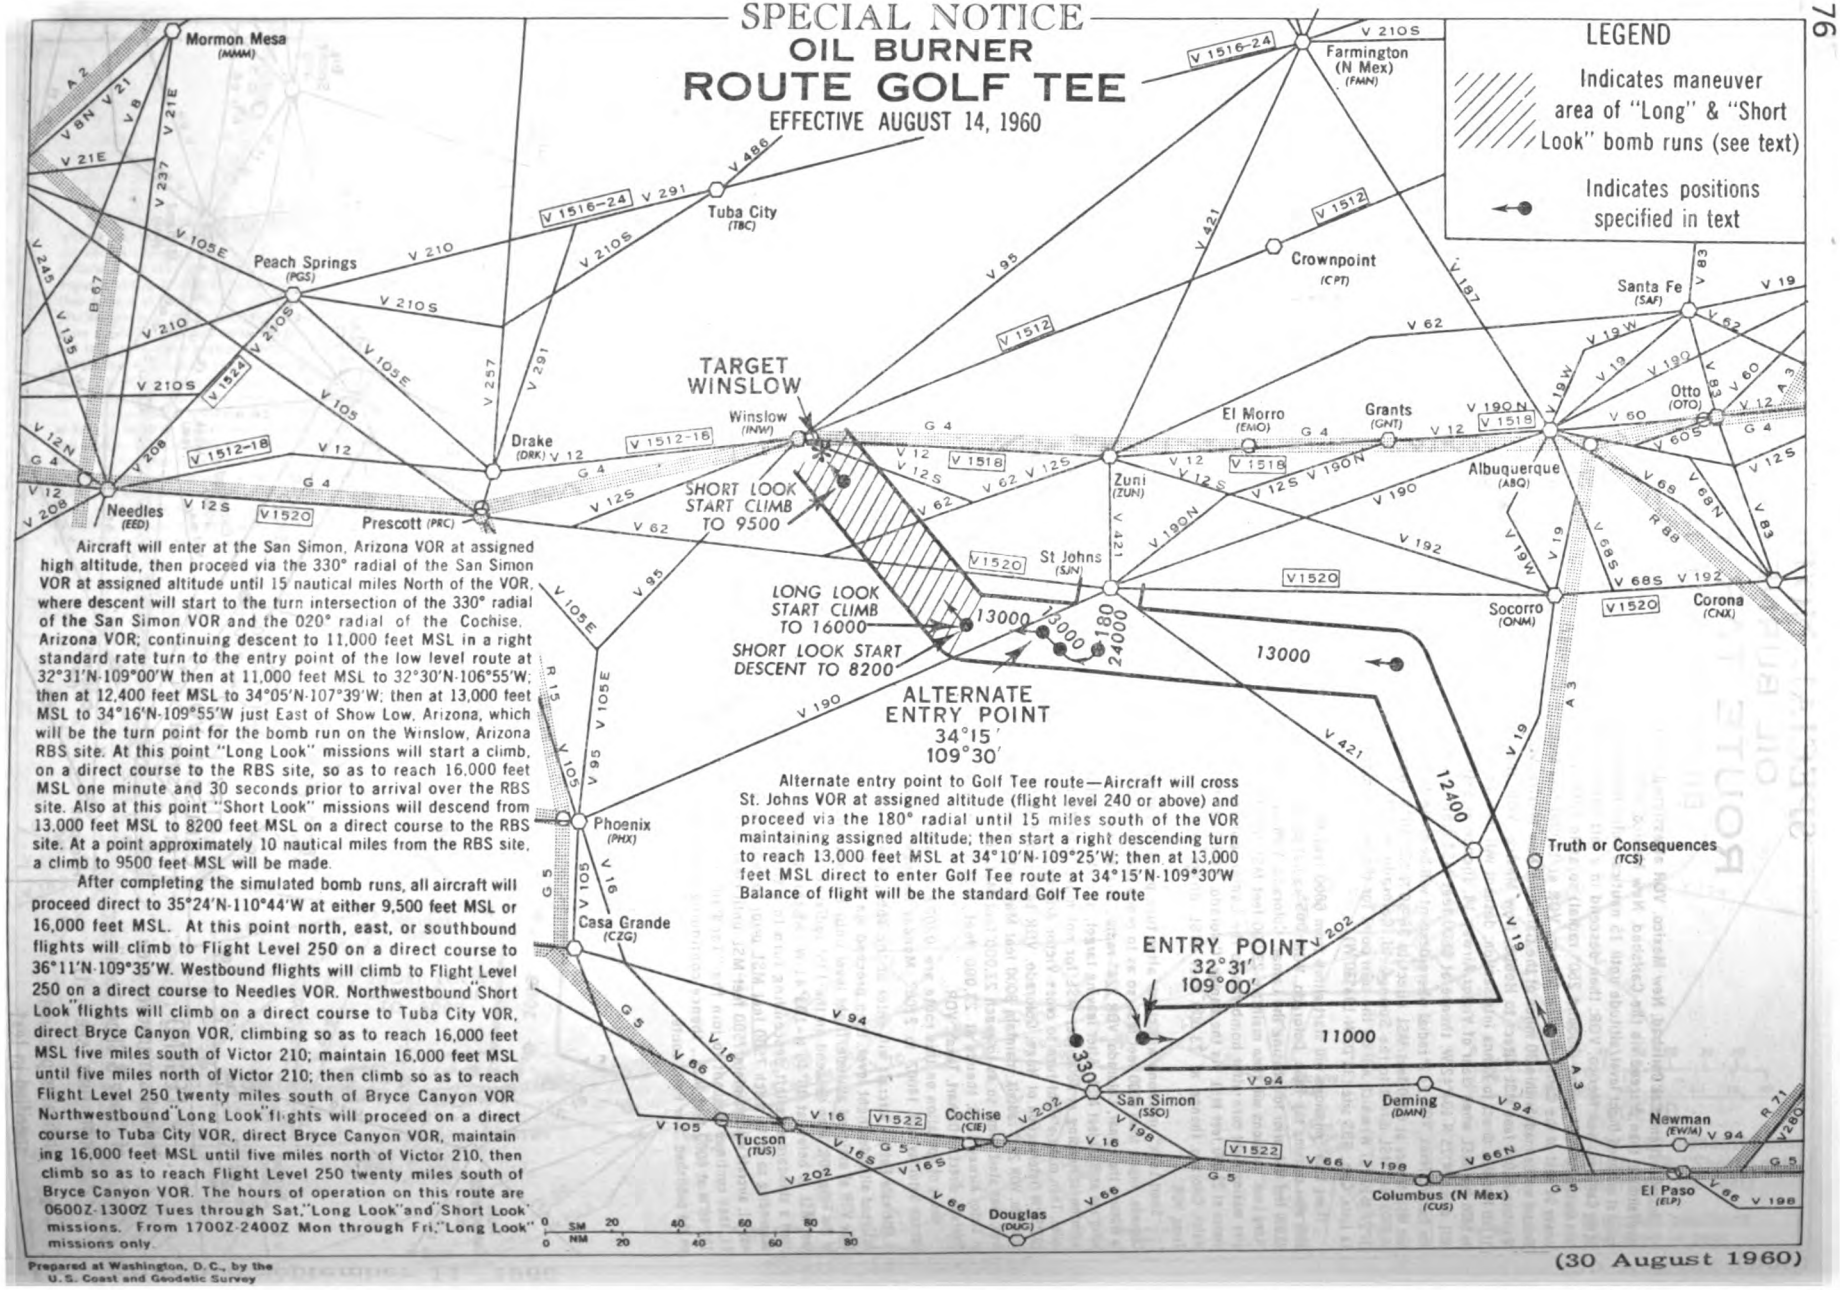
Aircraft will enter at Carlsbad, New Mexico, VOR at assigned flight level/altitude, then proceed via the Carlsbad, New Mexico, VOR 280° radial at assigned flight level/altitude until 15 nautical miles northwest of the Carlsbad, New Mexico, VOR; then descend in a left penetration turn (outbound 280° radial, inbound 250° radial) so as to enter Victor Airway 94 west of the Carlsbad, New Mexico, VOR at 11,000 feet MSL. Descent will be made within 30 miles of the Carlsbad, New Mexico, VOR. Maintain 11,000 feet MSL direct to Hobbs, New Mexico, VOR; thence 11,000 feet MSL direct to Kenna intersection; descent will then be made to 5800 feet MSL when clear of Victor Airway 14; thence at 5800 feet MSL direct 34°25'N-104°42'W; thence at 6600 feet MSL until crossing the Dalhart, Texas, VOR 247° radial where descent will be made to 6000 feet MSL; thence at 6000 feet MSL direct to 36°50'N-102°40'W, thence at 6000 feet MSL direct to the Springfield, Colorado, Airport (37°27' N-102°37'W) which will be the turn point for the bomb run on the La Junta, Colo., RBS site (38°02'N-103°30'W).

"Long Look" missions will start climb from 6000 feet MSL immediately after crossing the Tobe, Colorado, VOR 065° radial so as to reach 23,000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial. "Long Look" missions will then maintain 23,000 feet MSL into the target area making right turn after bomb run to the Lamar, Colorado, VOR, thence at 23,000 feet MSL via the Lamar, Colorado, VOR 146° radial to Walsh, Colorado, thence at 23,000 feet MSL direct to the Dalhart, Texas, VOR.

"Short Look" missions will climb after turn point at Springfield, Colorado, Airport from 6000 feet MSL so as to reach 8000 feet MSL prior to crossing the Lamar, Colorado, VOR 224° radial, aircraft will then make bomb run at 8000 feet MSL. After leaving target, aircraft will continue on a northwest heading at 8000 feet MSL for not more than 20 nautical miles. Then make a right turn to cross Victor Airway 1512 at 38°03'N 102°56'W (intersection of Hugo, Colorado, VOR 143° radial and Lamar, Colorado, VOR 223° radial), maintain 8000 feet MSL until clear of control area; then start climb so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; thence at 23,000 feet MSL direct to Walsh, Colorado, direct to Dalhart, Texas, VOR.

Hours of operation on this route are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

Alternate Entry – Aircraft will enter at the Tobe, New Mexico VOR at assigned altitude/flight level, then proceed via the 175° radial of the Tobe VOR at assigned altitude/flight level until 15 nautical miles south of the Tobe VOR, then descend on the 175° radial so as to reach 23,000 feet MSL or below at 36°45'N-103°41'W. At this point Aircraft will start a standard rate left descending turn to a true course of 080° descending so as to reach 7500 feet MSL prior to reaching Victor Airway 81; aircraft will maintain 7500 feet MSL until clear of Victor Airway 81, then continue descent to join the "Tar Pail" route at 36°50'N-102°40'W at 6000 feet MSL., thence continuing toward the RBS site on the published "Tar Pail" route.



Effective September 11, 1960

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

SPECIAL NOTICE

OIL BURNER
ROUTE GOLF TEE

EFFECTIVE AUGUST 14, 1960

Aircraft will enter at the San Simon, Arizona VOR at assigned high altitude, then proceed via the 330° radial of the San Simon VOR at assigned altitude until 15 nautical miles North of the VOR, where descent will start to the turn intersection of the 330° radial of the San Simon VOR and the 020° radial of the Cochise, Arizona VOR; continuing descent to 11,000 feet MSL in a right standard rate turn to the entry point of the low level route at 32°31'N-109°00'W then at 11,000 feet MSL to 32°30'N-106°55'W; then at 12,400 feet MSL to 34°05'N-107°39'W; then at 13,000 feet MSL to 34°16'N-109°55'W just East of Show Low, Arizona, which will be the turn point for the bomb run on the Winslow, Arizona RBS site. At this point "Long Look" missions will start a climb, on a direct course to the RBS site, so as to reach 16,000 feet MSL one minute and 30 seconds prior to arrival over the RBS site. Also at this point "Short Look" missions will descend from 13,000 feet MSL to 8200 feet MSL on a direct course to the RBS site. At a point approximately 10 nautical miles from the RBS site, a climb to 9500 feet MSL will be made.

After completing the simulated bomb runs, all aircraft will proceed direct to 35°24'N-110°44'W at either 9,500 feet MSL or 16,000 feet MSL. At this point north, east, or southbound flights will climb to Flight Level 250 on a direct course to 36°11'N-109°35'W. Westbound flights will climb to Flight Level 250 on a direct course to Needles VOR. Northwestbound "Short Look" flights will climb on a direct course to Tuba City VOR, direct Bryce Canyon VOR, climbing so as to reach 16,000 feet MSL five miles south of Victor 210; maintain 16,000 feet MSL until five miles north of Victor 210; then climb so as to reach Flight Level 250 twenty miles south of Bryce Canyon VOR. Northwestbound "Long Look" flights will proceed on a direct course to Tuba City VOR, direct Bryce Canyon VOR, maintaining 16,000 feet MSL until five miles north of Victor 210, then climb so as to reach Flight Level 250 twenty miles south of Bryce Canyon VOR. The hours of operation on this route are 0600Z-1300Z Tues through Sat. "Long Look" and "Short Look" missions. From 1700Z-2400Z Mon through Fri. "Long Look" missions only.

Alternate entry point to Golf Tee route—Aircraft will cross St. Johns VOR at assigned altitude (flight level 240 or above) and proceed via the 180° radial until 15 miles south of the VOR maintaining assigned altitude; then start a right descending turn to reach 13,000 feet MSL at 34°10'N-109°25'W; then at 13,000 feet MSL direct to enter Golf Tee route at 34°15'N-109°30'W Balance of flight will be the standard Golf Tee route

SPECIAL NOTICE

OIL BURNER
ROUTE BEAR CLAWS
EFFECTIVE MARCH 27, 1960

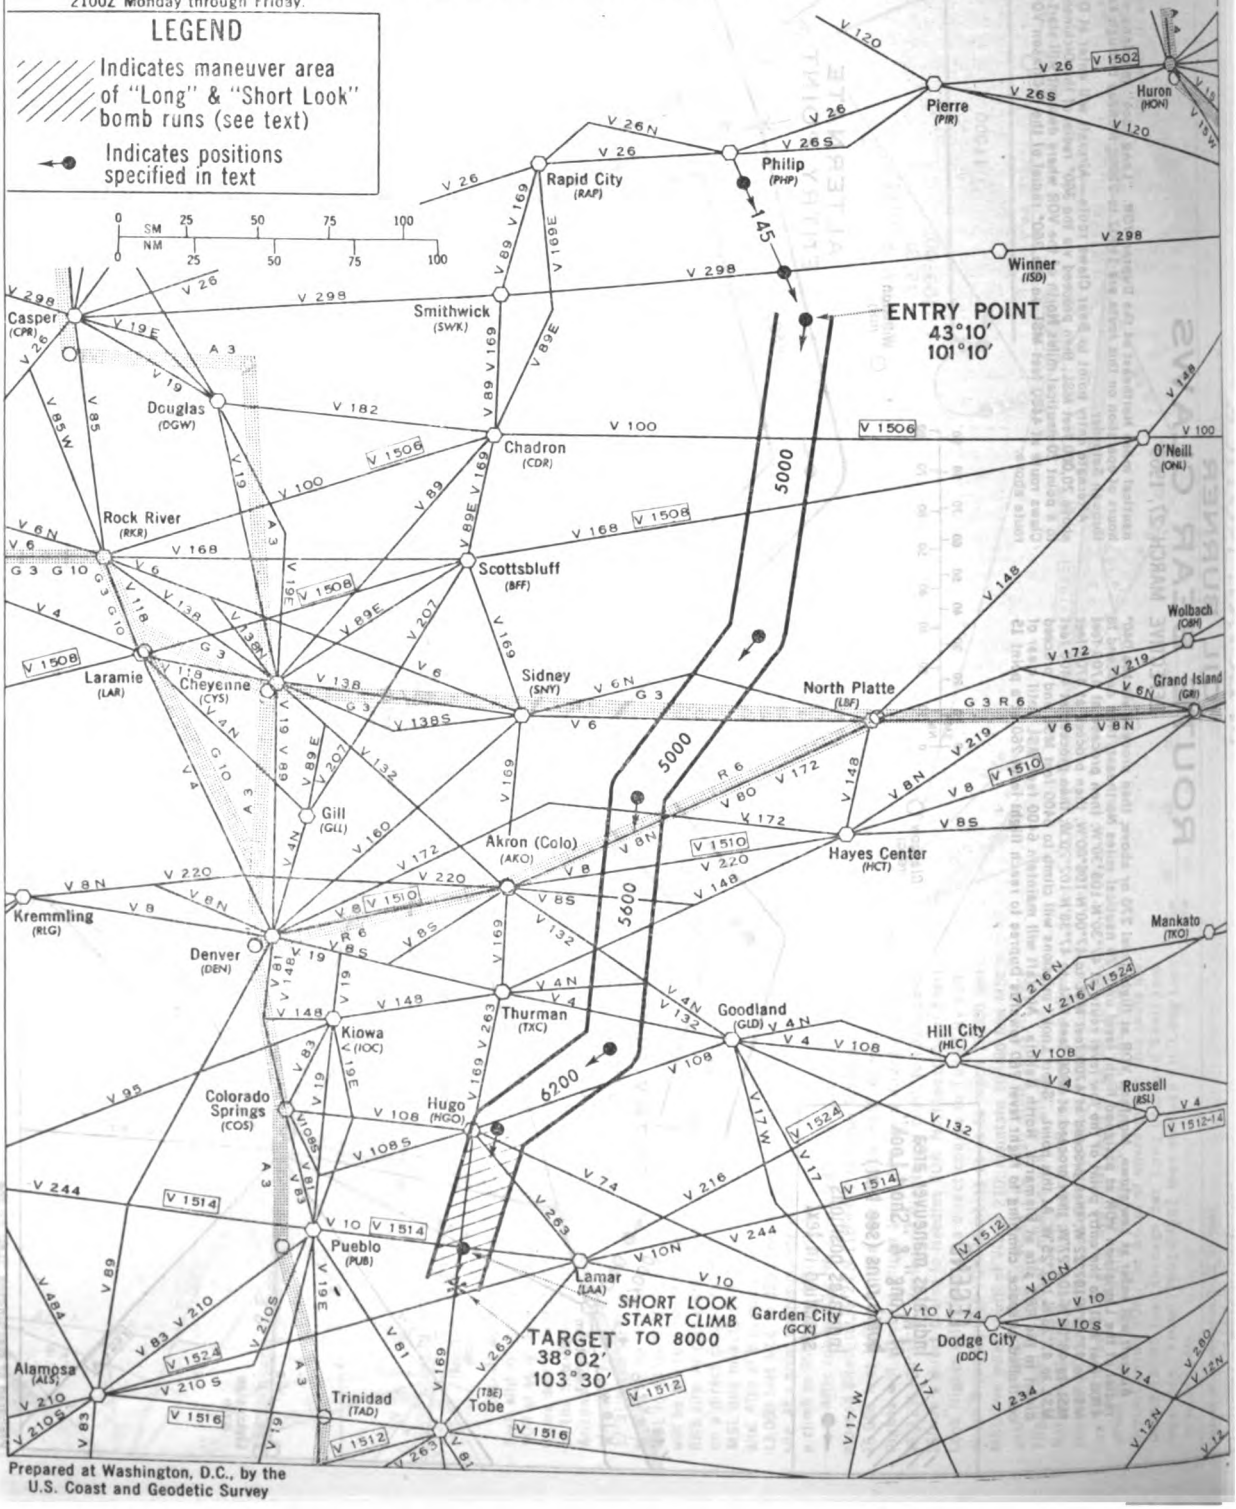
Aircraft will enter at Lewistown, Montana VOR at flight level 270 or above; then proceed via the 040° radial of the Lewistown VOR at assigned flight level until 20 nautical miles Northeast; then descend to 4700 feet MSL to the entry point of the low level route at 47°30'N-108°30'W; then proceed at 4700 feet MSL to 47°45'N-107°22'W; then proceed at 4700 feet MSL to 47°00'N-106°00'W; then proceed at 4700 feet MSL to 48°00'N-104°27'W; then proceed at 4800 feet MSL to 47°38'N-102°20'W; then proceed at 4400 feet MSL to 47°28'N 101°25'W. At this point, "Short Look" missions will climb to 6400 feet MSL and proceed direct to the RBS site at Bismarck, North Dakota. Aircraft will maintain 6400 feet MSL until clear of controlled airspace, climbing to flight level 260 towards Dupree to reach flight level 260 at a point 15 nautical miles Northeast of the Dupree VOR. "Long Look" missions will not be made on this route. The hours of operation on this route are 1400Z to 2100Z Monday through Friday, and 0200Z to 0900Z Tuesday through Saturday.

Alternate entry point to Bear Claws route—Aircraft will enter at Dickinson, North Dakota VOR at or above 20,000 feet MSL, then proceed via the 360° radial of the Dickinson VOR at 20,000 feet MSL or above to a point 20 nautical miles North of the VOR where descent will start to 4400 feet MSL to join the Bear Claws route at 4400 feet MSL on the 360° radial of the Dickinson VOR; thence continue on Bear Claws route above

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(30 August 1960)

SPECIAL NOTICE



OIL BURNER

ROUTE ROUGH WOOD

EFFECTIVE JUNE 19, 1960

Aircraft will enter at Philip, South Dakota, VOR at assigned altitude/flight level (between 20,000 feet MSL and flight level 250); then proceed via the Philip VOR 145° radial, maintaining assigned altitude until 10 nautical miles southeast of the Philip VOR where descent will start to 5,000 feet MSL, crossing 43°26'N-101°20'W at or below 13,000 feet MSL, proceeding direct to low-level entry point at 43°10'N-101°10'W; then at 5,000 feet MSL direct to 41°30'N-101°30'W; then at 5,000 feet MSL direct to 40°40'N-102°20'W; then at 5,600 feet MSL direct to 39°19'N-102°29'W; then at 6,200 feet MSL direct to 38°52'N-103°13'W; then at 6,000 feet MSL direct to the La Junta, Colorado RBS site at 38°02'N-103°30'W; aircraft will start climb when crossing the Lamar, Colorado VOR 252° radial and reach 8,000 feet MSL when crossing the Lamar VOR 247° radial; maintain 8,000 feet MSL over the La Junta, Colorado RBS Site; turn left to a direct course to Walsh, Colorado, maintain 8,000 feet until five nautical miles southeast of Victor Airway 169; then climb on a direct course to Walsh, Colorado so as to reach 23,000 feet MSL five miles north of Victor Airway 1516; maintain 23,000 feet MSL direct to Dalhart, Texas, VOR.

"Short Look" missions only authorized over this route. Hours of operation are 0200Z to 0900Z Tuesday through Saturday and 1400Z to 2100Z Monday through Friday.

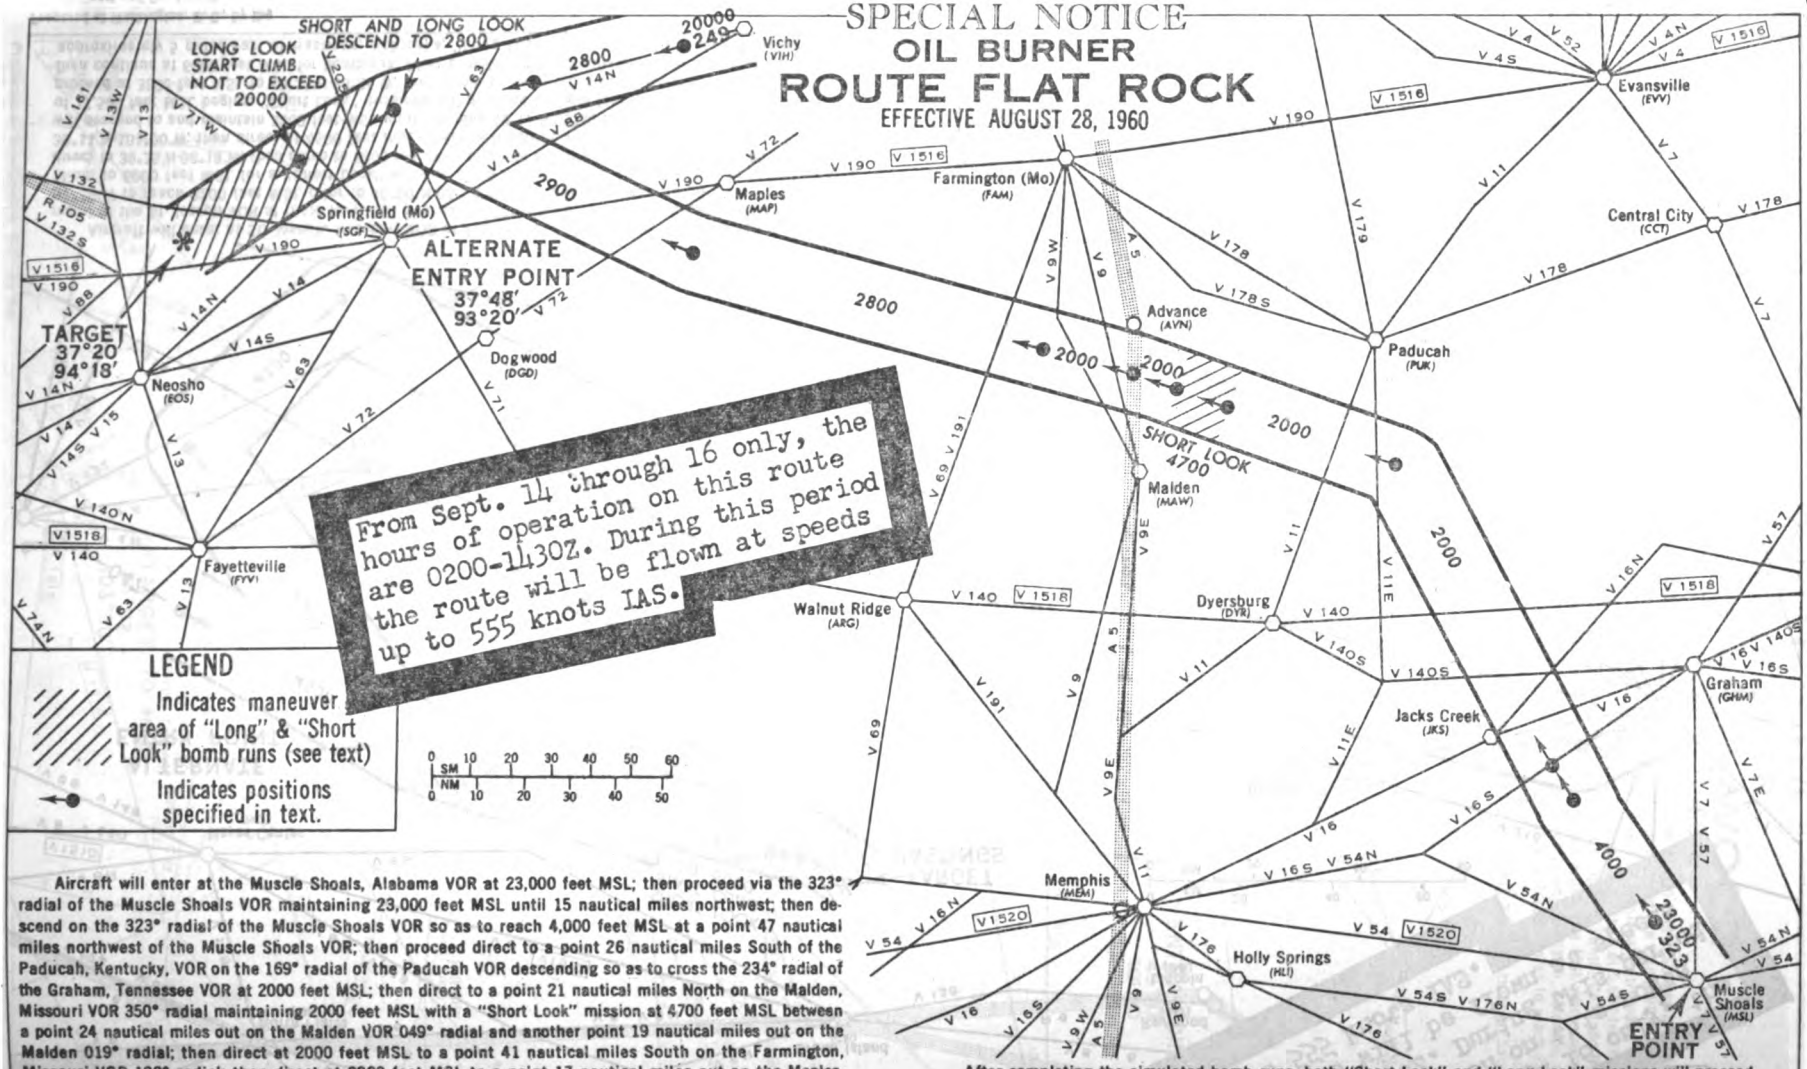
OIL BURNER

ROUTE CLEAR VIEW

EFFECTIVE APRIL 24, 1960

Aircraft will enter at St. Joseph, Missouri VOR at flight level 240 or above; then proceed via the 293° radial of the St. Joseph VOR at flight level 240 or above to 40°06'N-95°14'W; then descend direct to 39°43'N-97°30'W to reach 3200 feet MSL prior to 40°00'N-96°00'W, then proceed direct to 39°43'N-97°30'W, then climb to 6000 feet MSL for a "Short Look" mission at 39°41'N-97°41'W; then descend to 2900 feet MSL direct to 39°35'N-98°18'W; then climb to 3800 feet MSL to 38°44'N-100°22'W; then climb to 4500 feet MSL to 39°11'N-101°00'W; then direct at 4500 feet MSL to 40°08'N-100°06'W. At this point "Long Look" missions will descend to and maintain 3800 feet MSL until reaching 40°17'N-99°30'W where climb to bombing altitude of 17,500 feet MSL begins. "Short Look" missions will descend to 3800 feet MSL at 40°08'N-100°06'W, and proceed at 3800 feet MSL to 40°28'N-98°35'W; then climb so as to cross 40°29'N-98°26'W at 6000 feet MSL; then continue at 6000 feet MSL for bomb run. After completing the simulated bomb runs over the RBS site approximately 5 miles east of Hastings, Nebraska, "Long Look" missions will maintain heading for two minutes; then make a climbing right turn to 20,000 feet MSL to intercept the Grand Island VOR 180° radial at 20,000 feet MSL; then maintain 20,000 feet MSL direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR. "Short Look" missions, after passing the RBS site, will maintain an easterly heading for two minutes and then start a right climbing turn to 8000 feet MSL to intercept the Grand Island VOR 180° radial; then proceed direct to Grand Island VOR; then direct to Wolbach, Nebraska VOR maintaining 8000 feet MSL. Enroute clearance will then be received from Denver ARTC Center. The hours of operation on this route are 0000Z to 1400Z Tuesday through Saturday.



Alternate entry point to Clear View route—Aircraft will enter at Goodland, Kansas VOR at 23,000 feet MSL; then proceed via the 047° radial of the Goodland VOR at 23,000 feet MSL or assigned altitude to a point 35 nautical miles Northeast on the Goodland VOR 047° radial. At this point start descent to 4500 feet MSL, level off at or before a point 52 nautical miles on the Hill City, Kansas VOR 358° radial; thence via the primary route

The route width from 99°00'W to the target is five statute miles on the north side of the route centerline and ten statute miles on the south side of the route centerline.

SPECIAL NOTICE
OIL BURNER
ROUTE FLAT ROCK
EFFECTIVE AUGUST 28, 1960

Aircraft will enter at the Muscle Shoals, Alabama VOR at 23,000 feet MSL; then proceed via the 323° radial of the Muscle Shoals VOR maintaining 23,000 feet MSL until 15 nautical miles northwest; then descend on the 323° radial of the Muscle Shoals VOR so as to reach 4,000 feet MSL at a point 47 nautical miles northwest of the Muscle Shoals VOR; then proceed direct to a point 26 nautical miles South of the Paducah, Kentucky, VOR on the 169° radial of the Paducah VOR descending so as to cross the 234° radial of the Graham, Tennessee VOR at 2000 feet MSL; then direct to a point 21 nautical miles North on the Malden, Missouri VOR 350° radial maintaining 2000 feet MSL with a "Short Look" mission at 4700 feet MSL between a point 24 nautical miles out on the Malden VOR 049° radial and another point 19 nautical miles out on the Malden 019° radial; then direct at 2000 feet MSL to a point 41 nautical miles South on the Farmington, Missouri VOR 182° radial; then direct at 2800 feet MSL to a point 17 nautical miles out on the Maples, Missouri VOR 200° radial; then direct at 2900 feet MSL to a point 27 nautical miles out on the Springfield, Missouri VOR 352° radial; then direct at 2800 feet MSL to a point 25 nautical miles out on the Springfield, Missouri VOR 300° radial.

At this point "Short Look" missions will proceed to the target at 37°20'N-94°18'W maintaining 2,800 feet MSL to a point 33 nautical miles out on the Neosho, Missouri VOR 009° radial; then climb so as to cross the target at 4,700 feet MSL.

"Long Look" missions will start a climb at a point 25 nautical miles out on the Springfield VOR 300° radial to a predetermined altitude, above the RBS site as filed in the flight plan. This altitude will never exceed 20,000 feet MSL.

After completing the simulated bomb runs, both "Short Look" and "Long Look" missions will proceed to Bartlesville, Oklahoma VOR, maintaining bombing altitude. Normally aircraft will be routed by ATC via the Tulsa, Oklahoma VOR.

The hours of operation on this route are 0200Z to 1400Z Tuesday through Saturday.

Alternate Entry Point–Aircraft will enter at Vichy, Missouri, VOR at or above 20,000 feet MSL, then proceed via the 249° radial of the Vichy VOR at 20,000 feet MSL or above to a point 15 nautical miles southwest of Vichy VOR where descent will start to 2,800 feet MSL, reaching 2,800 feet MSL at a point 46 nautical miles out on the 034° radial of the Springfield, Missouri, VOR thence via the 249° radial of Vichy VOR to a point 27 nautical miles out on the 352° radial of the Springfield VOR at 37°48'30"N-93°20'W thence continue on Flat Rock route.

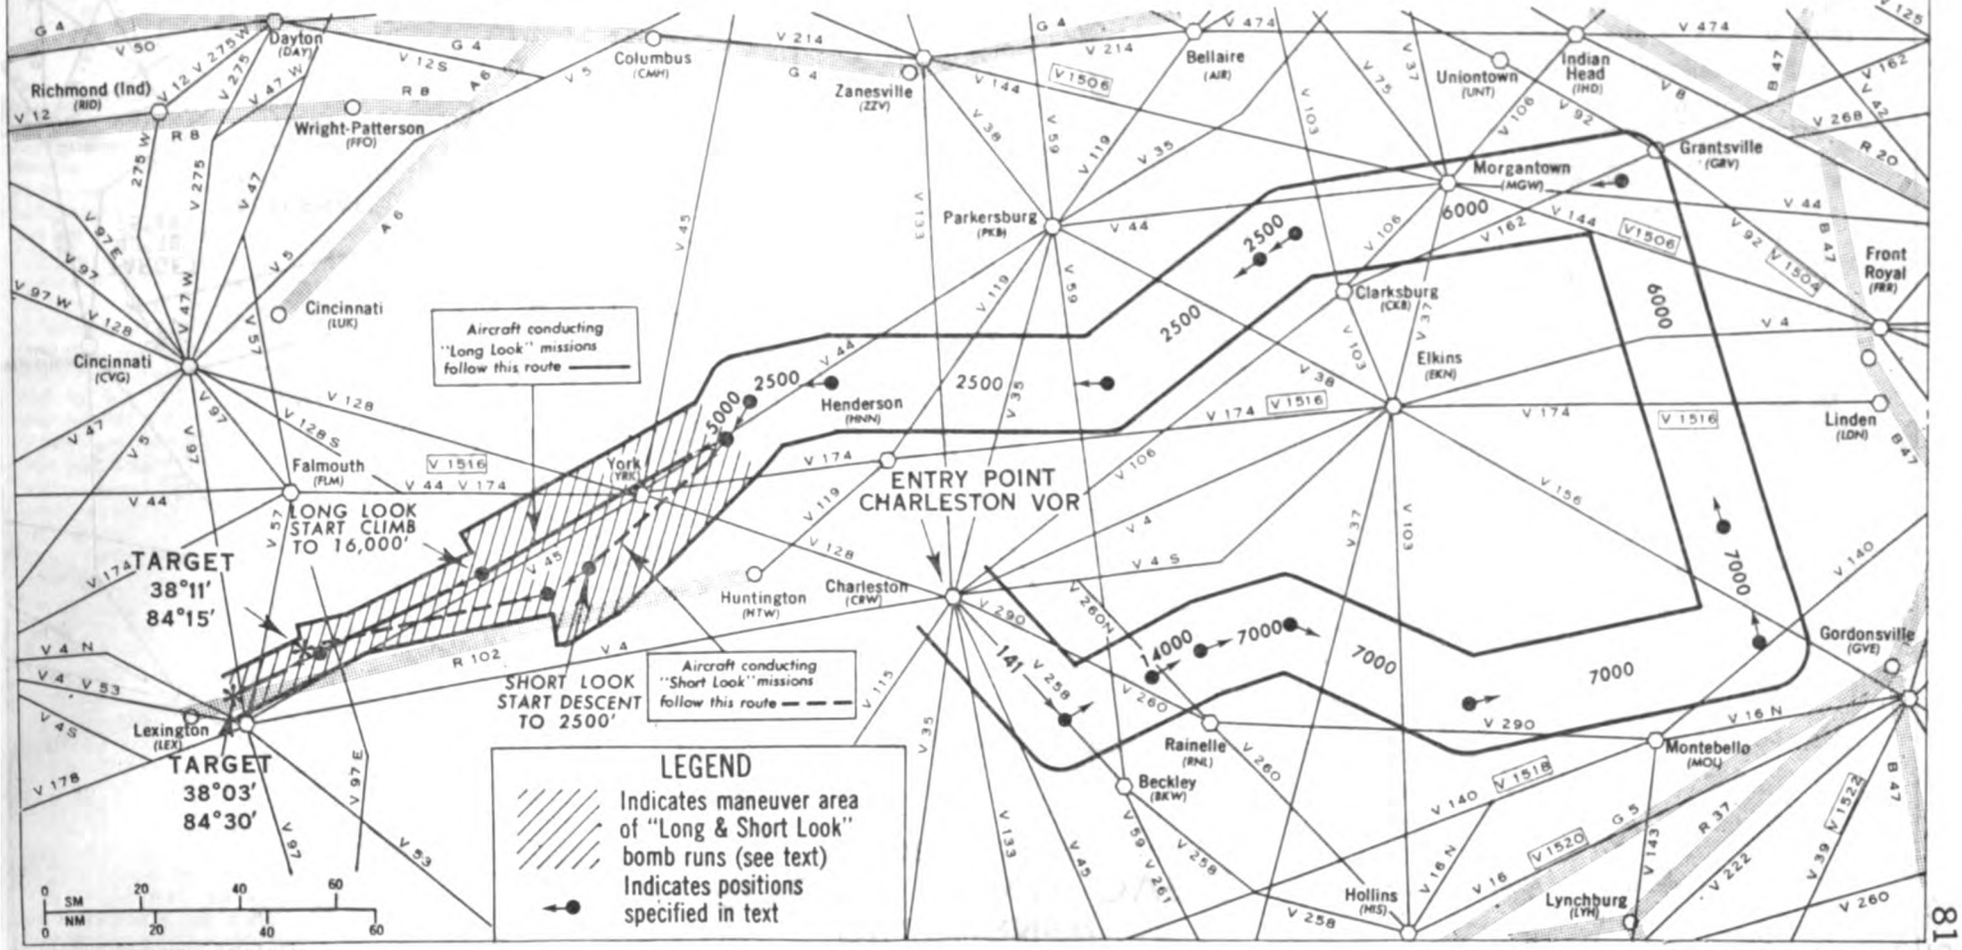
SPECIAL NOTICE

SPECIAL NOTICE



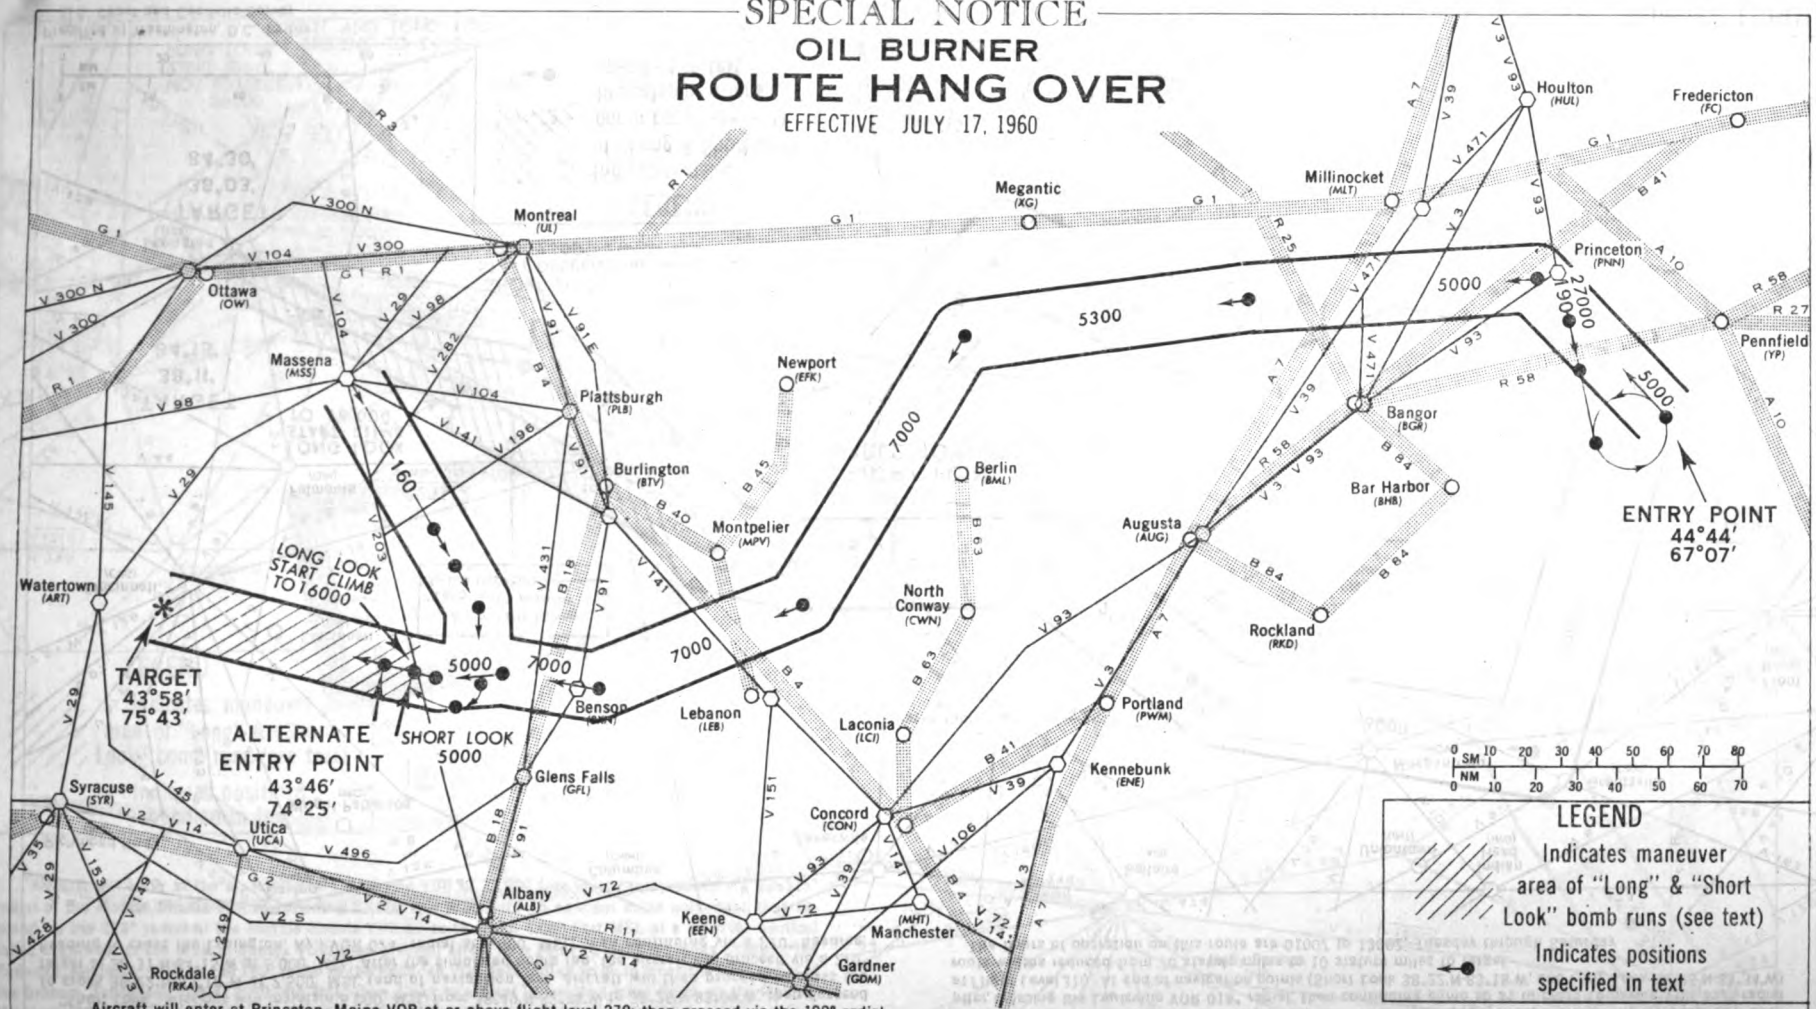
OIL BURNER
ROUTE GREEN VALLEY
EFFECTIVE July 31, 1960

Aircraft will enter at Charleston, W. Va., VOR at or above Flight Level 240; and proceed via the 141° radial of the Charleston VOR to 37°59'N-81°22'W, maintaining assigned flight level to this point. Then proceed to 38°08'N-81°00'W descending to cross this point at 19,000' MSL or above. Aircraft will then continue descent to cross 38°12'30"N-80°49'W at 14,000' MSL; and to cross 38°16'N-80°30'W at 7,000' MSL; then proceeding to 38°01'N-79°49'W at 7,000' MSL; then to 38°11'N-78°41'30"W at 7,000' MSL; then to 38°32'N-78°49'W at 7,000 MSL; descend to 6,000' MSL immediately after passing 38°32'N-78°49'W; then at 6,000 feet MSL to 39°33'N-79°10'W; then 39°25'N-80°27'W at 6,000' MSL; then descending to cross 39°21'N-80°34'W at 2,500' MSL; then to 38°59'N-81°11'W at 2,500' MSL; then to 38°59'N-82°14'W at 2,500' MSL; then to 38°51'N-82°33'W at 2,500' MSL; then climbing to cross 38°49'N-82°38'W at 5,000' MSL.

"Short Look" Missions will maintain 5,000' MSL from 38°49'N-82°38'W to 38°26'N-83°09'W; then descend to cross 38°22'N-83°18'W at 2,500' MSL (end of navigation leg). Aircraft will then proceed to cross the target at 38°11'N-84°15'W at 5,000' MSL. After the simulated bomb run, the aircraft will proceed via a 270° heading to cross the Lexington, Ky., VOR 024° radial at 6,000' MSL; then continuing via a 270° heading, cross Lexington VOR 322° radial at 6,000' MSL. The aircraft will then climb on the Lexington VOR 322° radial to cross Louisville, Ky., VOR 070° radial at 11,000' MSL; cross Louisville VOR 050° radial at 17,000' MSL, maintaining this altitude until after crossing Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 280.

"Long Look" Missions will proceed from 38°49'N-82°38'W; maintaining 5,000' to 38°25'N-83°34'W; then climb to cross 38°10'N-84°11'W at 16,000' MSL; then to the target at 38°03'N-84°30'W at 16,000' MSL. After the simulated bomb run, the aircraft will make a right turn to intercept the Lexington, Ky., VOR 322° radial, still at 16,000' MSL; then climb on the Lexington VOR 322° radial so as to cross Louisville VOR 070° radial at 17,000' MSL and the Louisville VOR 050° radial at 21,000' MSL; maintaining 21,000' MSL until after crossing the Louisville VOR 018° radial; then continuing climb so as to cross Louisville VOR 352° radial at Flight Level 310. At end of navigation points (Short Look 38°22'N-83°18'W, and Long Look 38°25'N-83°34'W) route widths reduced from 20 statute miles to 10 statute miles to target.

The hours of operation on this route are 0100Z to 1300Z, Tuesday through Saturday



Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

OIL BURNER
ROUTE HANG OVER

EFFECTIVE JULY 17, 1960

Aircraft will enter at Princeton, Maine VOR at or above flight level 270; then proceed via the 190° radial of the Princeton VOR at flight level 270 until 45°08′N-67°39′W. Descent will then be made Southbound on the 190° radial of the Princeton VOR to cross 44°56′N-67°36′W at or above 20,000 feet MSL; then continuing descent to 44°39′N-67°32′W; then start a complete orbit in a left-hand pattern to reach 5000 feet MSL at the entry point of the low level route at 44°44′N-67°07′W; then to 45°19′N-67°49′W at 5000 feet MSL; then to 45°16′N-69°30′W at 5000 feet MSL; then climb to 5300 feet MSL to 45°08′N-71°09′W; then climb to 7000 feet MSL to 44°03′N-72°04′W; then to 43°42′N-73°12′W at 7000 feet MSL; then to 43°45′N-73°45′W at 7000 feet MSL; then descend to 5000 feet MSL to 43°44′N-74°07′W; then to 43°45′N-74°15′W at 5000 feet MSL; then to 43°46′N-74°25′W at 5000 feet MSL; then to the RBS site at 43°58′N-75°43′W. "Long Look" missions will start climb at 43°45′N-74°15′W so as to cross the RBS site at 16,000 feet MSL. "Short Look" missions will maintain 5000 feet MSL from 43°45′N-74°15′W direct to the RBS site. After the simulated bomb runs are completed, "Short Look" missions will make a right turn to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then climb clear of Victor Airway 29 on the 060° radial of the Watertown VOR to intercept the 296° radial of the Burlington, Vt. VOR at 17,000 feet MSL; then proceed via the 296° radial of the Burlington VOR to cross the 190° radial of the Massena, New York VOR at altitude of 20,000 feet MSL; to cross the 240° radial of the Plattsburgh, New York VOR at flight level 280; then to the Burlington VOR. "Long Look" missions will maintain 16,000 feet MSL, turn right to the 060° radial of the Watertown, New York VOR to 44°13′N-75°38′W; then via the same route and altitudes as "Short Look". The hours of operation on this route are 1830Z-2400Z Monday through Friday, and 0000Z-0630Z Tuesday through Saturday.

Alternate entry to "Hang Over" route – Aircraft will enter at Massena, N.Y. VOR at flight level 290, then proceed via the 160° radial of the Massena VOR maintaining flight level 290, after crossing the 280° radial of the Burlington, Vermont VOR descent will be started to 5,000 feet MSL; continue on the 160° radial of the Massena VOR and cross the Burlington VOR 267° radial at 23,500 feet MSL, cross the Burlington VOR 250° radial at 14,500 feet MSL; at this point turn right to intercept the 010° radial of the Albany, New York VOR; continue descent on the Albany VOR 010° radial to its intersection with the Benson, Vermont VOR 287° radial; at this point make a standard right turn to intercept the "Oil Burner" "Hang Over" route at 43°46′N-74°25′W. Aircraft will be at 5,000 feet MSL prior to crossing the 74°W longitude. Remainder of flight via the "Hang Over" route.

Prepared at Washington, D. C., by the U. S. Coast and Geodetic Survey

SPECIAL NOTICE

SPECIAL NOTICE

OIL BURNER

ROUTE IRON MAN

EFFECTIVE JULY 3, 1960

Aircraft will enter at the Traverse City, Michigan VOR at 23,000 feet MSL or above as assigned by the Detroit Center Maintain assigned altitude to a point 31 nautical miles out on the 360° radial of the Traverse City VOR, then descend to 2200 feet MSL direct to 46°01'N-85°37'W, maintain 2200 feet MSL direct to 46°41'N-85°38'W, then proceed at 1700 feet MSL direct to Manitou Is. (47°25'N-87°35'W), then proceed at 2500 feet MSL direct to Cumberland Pt. (47°52'N-89°16'W), then proceed at 3000 feet MSL direct to Tom Lake (47°56'N-90°04'W), then proceed at 3000 feet MSL direct to 47°25'N-91°05'W, then proceed at 2000 feet MSL direct to Bark Pt. (46°53'N-91°11'W), then proceed at 2800 feet MSL direct to 45°55'N-91°42'W, then proceed at 2900 feet MSL to 45°32'N-91°02'W, maintain 2900 feet MSL to Short Look start climb point at 46°18'N-90°18'W. At this point start climb to Short Look bomb altitude of 6000 feet MSL reaching 6000 feet MSL at 46°21'N-90°15'W. Target located at 46°24'N-90°14'W. After bombs away maintain 6000 feet MSL and bomb run heading to 46°49'N-89°48'W At this point start climb to 22,000 feet MSL maintaining bomb run heading until intersecting the 270° radial of Houghton, Michigan, VOR, then proceed inbound to Houghton, Michigan via the 270° radial of Houghton, Michigan, crossing the Houghton, Michigan, VOR at 22,000 feet, contact Detroit ARTCC for further clearance.

Route width reduced to 5 statute miles either side of center line from Cumberland Pt. to Tom Lake, and on the south side only from Tom Lake to 47°25'N-91°05'W, and on both sides from 46°05'N-90°31'W to target.

Hours of operation are 2000Z to 1000Z Monday through Saturday.

Alternate Entry to Iron Man route. Aircraft will cross the Eau Claire, Wisconsin, VOR at 23,000 or below, descending to 2900 MSL on the 022° radial of Eau Claire, Wisconsin, VOR to join the "Iron Man" route at 2900 MSL at 45°32'N-91°02'W, then continue on "Iron Man" route.

Prepared at Washington, D.C., by the U.S. Coast and Geodetic Survey

(30 August 1960)

✓ OPERATION PATHFINDER: This is the area positive control program in the Indianapolis-Chicago area. The airspace between 24,000' MSL up to and including flight level 350 and within the coverage of the three long-range radar sites at Indianapolis, Indiana; London, Ohio, and Chicago, Illinois, will become positive controlled airspace effective 0500Z on October 15, 1960. A small portion of this airspace, east of Restricted Area R-109 and adjoining R-109, will extend from 24,000' MSL up to and including flight level 600. The area is depicted on all high-altitude RF charts and described in Part 601 of the Regulations of the Administrator. The positive control route segments which underlie this area have been raised from 22,000' MSL up to, but not including, 24,000' MSL. All other positive control route segments extend from 17,000' MSL to 22,000' MSL, inclusive.

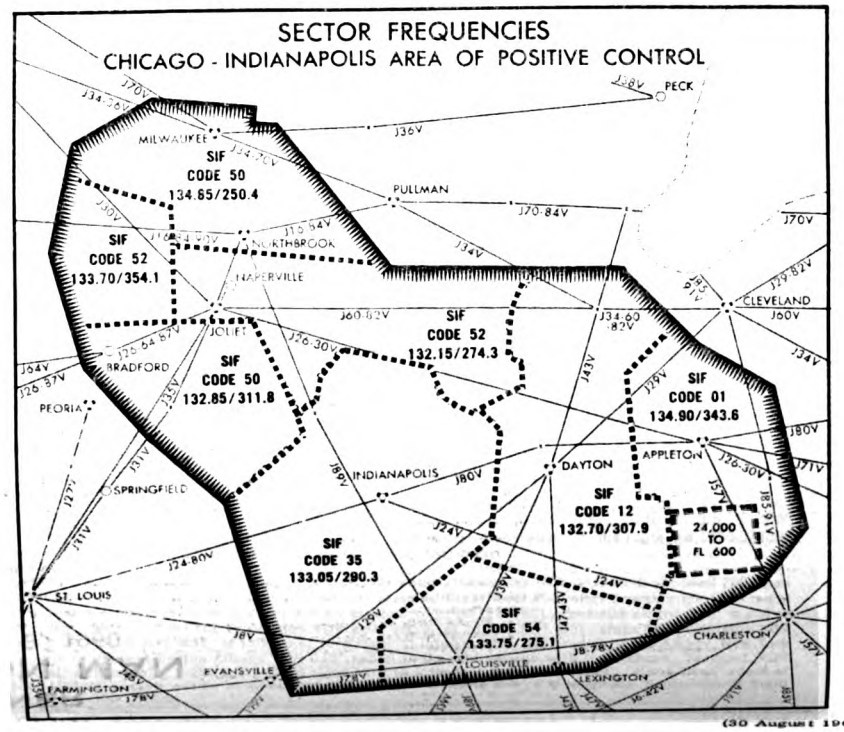
The following are the requirements for flight in the positive control area:

1. No person shall operate an aircraft without prior approval of air traffic control.
2. All VFR activities, including aircraft on IFR flight plans operating VFR conditions on top, are prohibited.
3. All aircraft shall be equipped for IFR flight and all pilots shall be rated for instrument flight.
4. All aircraft shall be equipped with a functioning radar beacon transponder which shall be operated to reply on such mode and/or code as may be specified by ATC.
5. All aircraft shall be equipped with radio equipment capable of providing direct pilot-controller communications on the frequencies specified by air traffic control for the area in which flight is conducted.

It should be noted that items 1, 2 and 3 above are applicable to any positive controlled airspace, i.e., positive control route segments or the positive control area. The special equipment requirements in items 4 and 5 are applicable only to the positive control area. Aircraft not meeting these equipment requirements will be rerouted around, over or under the area if operating on ATC clearance. It is the responsibility of all pilots to avoid the area if not on ATC clearance.

Operating Practices

1. Pilots operating VFR, including those on IFR flight plans operating VFR conditions on top, must obtain an ATC clearance at assigned flight level prior to or at the time of entry into the positive control area.
2. Pilots operating on IFR flight plans at assigned flight level require no special clearance to enter the positive control area.
3. Pilots operating VFR or VFR conditions on top may climb or descend in VFR conditions as necessary in order to avoid positive control area, if they so desire.
4. Pilots operating VFR, and desiring to penetrate positive control area, must file an abbreviated flight plan with ATC as follows:
   a. Aircraft identification and type;
   b. True air speed;
   c. Altitude/flight level being maintained VFR (if air filed, present position and altitude);
   d. Estimated time of penetration of positive controlled airspace;
   e. Point of penetration;
   f. Requested route and flight level in positive control area.



This flight plan may be filed prior to departure or air filed with an FAA Flight Service Station. In either case, it must be filed at least 30 minutes prior to the estimated time of penetration of the positive control area.

5. It is emphasized that the flight level assigned to pilots operating VFR/VFR conditions on top is valid only within the positive control area. Such pilots are expected to revert to their original status (VFR/VFR conditions on top) when leaving positive control area.
6. The chart (facing) shows the required frequencies for flight through the various positive control sectors of Indianapolis and Chicago ARTC Centers. Pilots flying in aircraft without manual tuning capabilities should preset the required frequencies shown on this chart prior to departure. If after presetting the frequencies required by Indianapolis and Chicago Centers, insufficient capability exists to preset other center area discrete frequencies needed along the route of flight, the national common frequency (301.4 mc) may be used for communication with other centers.

✓ SPECIAL NOTICE: Operation Pathfinder, the area positive control program, will be implemented commencing October 15, 1960, at 0500Z in the Indianapolis-Chicago area. The positive control area, which is depicted on high-altitude RF charts extends from 24,000' MSL up to and including flight level 350. In this area, all VFR activities, including VFR conditions on top operations, are prohibited. Pilots operating VFR/VFR conditions on top and desiring to enter the Positive Control Area must be IFR qualified and must obtain ATC clearance at assigned flight level prior to entry. In addition, the following following special equipment requirements must be met:

1. All aircraft must have functioning airborne radar beacon transponder.
2. All aircraft must have radio equipment capable or providing direct pilot/controller communications on the frequencies specified by ATC for the area in which flight is to be conducted.
3. All aircraft must have the instruments and equipment required for IFR operations.

Positive control route segments underlying the Indianapolis-Chicago positive control area have have been raised to 24,000' MSL, also effective October 15, 1960, at 0500Z. See chart below.

(30 August 1960)

Positive Control Area - That area bounded by a line beginning at lat 41-45-30, long. 83-19-45; thence to 41-39-30, 83-15-15; 41-00-00, 82-30-00; 40-32-00, 81-40-00; 39-12-00,

✓ ATC PROCEDURES - On page 73 of Flight Information Manual Volume 13 dated December 1959, delete left column and substitute the following:

Positive Controlled Airspace - Positive controlled airspace is that airspace wherein all aircraft are controlled in accordance with the provisions of Special Civil Air Regulation 424C. There are two types of positive controlled airspace: positive control route segments and positive control areas.

The following basic requirements are applicable in any positive controlled airspace (this includes any route segments or areas so designated):

1. No person shall operate an aircraft without prior approval of air traffic control.

2. All VFR activities, including aircraft operating VFR conditions on top, are prohibited.

3. All aircraft shall be equipped for instrument flight and all pilots shall be rated for instrument flight.

The following procedures are applicable to any positive controlled airspace:

1. A pilot flying VFR must file a flight plan and receive ATC clearance for flight across positive controlled airspace. This flight plan may be abbreviated but must include the following items.

   a. Aircraft identification;
   b. Aircraft type;
   c. True air speed;
   d. Altitude/flight level being maintained VFR (if air filed-present position and altitude);
   e. Estimated time of penetration of positive controlled airspace;
   f. Point of penetration;
   g. Requested route and altitude flight level.

2. Pilots operating VFR/VFR conditions on top will be assigned an altitude/flight level by ATC prior to or at the time of penetration of positive controlled airspace. It is emphasized that this clearance is valid only within positive controlled airspace. It is expected that pilots will revert to their original status (VFR/VFR conditions on top) upon leaving positive controlled airspace unless the pilot requests and is cleared to do otherwise.

Positive Control Route Segments - That airspace normally between 17,000' MSL and 22,000' MSL, inclusive, on all airways or portions of airways coincident with those listed below comprise positive control route segments, except positive control route segments which underlie positive control area extend from 17,000' MSL up to but not including 24,000' MSL.

Positive Control Areas - That airspace within the continental control area so designated by the Administrator.

In addition to the terms and conditions specified above for flight in any positive controlled airspace, the following special equipment requirements are applicable in positive control areas:

1. All aircraft shall be equipped with a functioning radar beacon which shall be operated to reply on such mode and/or code as may be specified by ATC.

2. All aircraft shall be equipped with radio equipment capable of providing direct pilot-controller communications on the frequencies specified by ATC for the area in which flight is conducted.

Aircraft not meeting the above equipment requirements will be rerouted by ATC around, under or over the positive control area, if operating on ATC clearance. It is the responsibility of pilots operating VFR to avoid the area.

Positive control areas are depicted on high-altitude RF charts. The discrete frequencies required for flight within positive control areas and the appropriate radar beacon transponder codes are depicted in the Airman's Guide. Pilots flying in aircraft without manual tuning capabilities should preset the appropriate positive control frequencies prior to departure.

Positive Controlled Airspace

Positive Control Route Segments

(List the current airspace so designated. It is not necessary to differentiate between the segments which extend from 17,000' MSL to 22,000' MSL and those portions underlying positive control area which extend to 24,000' MSL. This point is covered above.)

Positive Control Area - That area bounded by a line beginning at lat 41-45-30, long. 83-19-45; thence to 41-39-30, 83-15-15; 41-00-00, 82-30-00; 40-32-00, 81-40-00; 39-12-00, 81-25-00; 38-40-00, 82-00-00; 37-51-00, 84-00-00; 37-40-00, 87-30-00; 39-45-00, 88-11-00; 40-18-00, 89-00-00; 41-00-00, 89-50-00; 42-00-00, 90-15-00; 43-00-00, 90-00-00; 43-25-00, 89-00-00; 43-20-00, 87-43-20; 43-14-20, 87-44-30; 43-14-55, 87-30-00; 41-53-00, 86-08-00; thence to point of beginning, extending upward from 24,000' MSL to flight level 350, inclusive. Within this airspace the area bounded by a line beginning at 39-30-00, 83-02-00; 39-25-00, 82-00-00; 38-48-30, 82-00-00; 38-48-30, 83-02-00; thence to point of beginning, extends upward to flight level 600.

✓ ATC PROCEDURES - On page 88 of Flight Information Manual Volume 13 dated December 1959 under Recommended ADIZ Practices change paragraph carried over from page 87 from "FAA stations will not accept long distance collect calls from any pilot within either the Eastern or Western Defense Area" to read: "FAA stations will not accept long distance collect calls from any pilot within the Defense Area, as defined by the Air Defense Identification Zones and Defense Area chart on page 89."

✓ SEARCH AND RESCUE - On page 50 of the Flight Information Manual Volume 13 dated December 1959 under Rescue Coordination Centers chg Robins AFB, Georgia "Robins AFB, Georgia, telephone Warner Robins, Georgia WAlker 6-2781, or ask operator for Robins Rescue Coordination Center ."

✓ SEARCH AND RESCUE - On page 50 of the Flight Information Manual Volume 13 dated December 1959 under Area of Responsibility add: "Robins Rescue Coordination Center (CONAC): Ohio, Kentucky, Virginia, West Virginia, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi and District of Columbia."; and delete under Area of Responsibility of Mitchell Rescue Coordination Center (CONAC) delete Kentucky, Ohio, Virginia and West Virginia."

✓ FLIGHT INFORMATION CORRECTIONS: Correct Flight Information Manual Volume 13 dated December 1959 as follows:

(1) Page 50, corrections for Search & Rescue - see this issue of Airgi page 85.
(2) Page 73, corrections for ATC Procedures - see this issue of Airgi page 85.
(3) Page 88, corrections for ATC Procedures - see this issue of Airgi page 85.

NEW AIR TRAFFIC CONTROL ADVISORY SERVICE: IFR aircraft operating in accordance with an ATC authorized cruising level of VFR conditions-on-top are required by CAR 60.44 to be flown at the altitudes/flight levels specified in CAR 60.32 for VFR flight. Noncompliance by pilots with the cruising level requirements of CAR 60 compromises intended segregation between aircraft operating at VFR and IFR altitudes/flight levels. Beginning April 5, 1960, pilots of IFR aircraft operating in accordance with an air traffic control authorized cruising level of VFR conditions-on-top and reporting at an altitude/flight level incorrect for direction of flight will be advised by air traffic control facilities of the appropriate level/s for direction of flight. Controllers will provide this advisory service on a "workload permitting" basis. The provision, or lack of provision of this service should not be construed to relieve or diminish pilot responsibility for operation at the correct altitudes/flight levels for direction of flight.

USAF LOW ALTITUDE REFUELING AREAS: USAF aircraft conduct refueling operations throughout the continental United States at altitudes ranging from 13,000 to 18,000 feet. These refueling operations may be conducted anywhere in the United States at anytime, however, they are generally confined to these areas. Refueling aircraft have right of way over other aircraft in accordance with C.A.R. 60.14 (b).

VOR RECEIVER CHECK POINTS

Provisions are being made to provide pilots with a means of checking the accuracy of VOR receivers to insure satisfactory operations of the airborne system. These provisions consist of three different methods:(a) a radiated test signal consisting of a signal radial; (b) certified check points on the airport surface; or (c) certified airborne check points. The radiated test signal is used by tuning the receiver to the published frequency of the test facility. With the flight path deviation indicator(FPDI) centered, the omnibearing selector should read 0° with the to-from indication being "From"; or the omnibearing selector should read 180° with the to-from indication reading "To". Should the VOR receiver be of the automatic indicating type the indication should be 180°. (This is true for all airborne receivers except Mitchell which will indicate 0°). Two means of identification are used with the VOR radiated test signal. In some cases, a continuous series of dots is used while in others a continuous 1020 cycle tone will identify the test signal. Information as to identification of an individual test signal can be obtained from the local control tower. Ground and airborne check points consist of certified radials that should be received at specific points on the airport surface or over specific landmarks while airborne in the immediate vicinity of the airport. Pilots are requested to contact control tower, communication station or airport manager for location details. Should an error in excess of ±4° be indicated through use of the ground check or ±6° using the airborne check, IFR flight should not be attempted without first correcting the source of error. CAUTION, no correction other than the "correction card" figures supplied by the manufacturer should be applied in making these VOR receiver checks. As of this date check points or facilities have been established at the following airports (listed under city name).

RADIATED TEST SIGNAL

**Atlanta (Municipal 112.0 mc)

SPECIAL NOTICE

CALIFORNIA
OCEANSIDE
MARINE CORPS MANEUVER AREA

Maneuvers, including air support to Marine Corps landing exercises are being conducted in the charted area. Pilots should contact Oceanside, San Diego, Thermal, Long Beach, Ontario and Los Angeles FSS for information pertaining to air activity during daylight hours on the maneuver dates.

(30 August 1960)

Attention, Pilots!

CHECK YOUR AERONAUTICAL CHARTS AND MAKE SURE THAT EACH OF THE OBSTRUCTIONS LISTED BELOW IS CARRIED!
IF ANY ARE MISSING, INSERT THEM NOW, DON'T DELAY! ONLY YOU CAN MARK YOUR CHARTS - IT IS YOUR RESPONSIBILITY!

The Coast and Geodetic Survey sectional charts show all known dangerous obstructions at the time a particular chart is issued. As these charts are published at intervals of six months to a year, dangerous obstructions built during the interim between issues must be placed on the charts by the user. The position, height and top elevation above MSL of these new obstructions can be taken from the list given below. New Obstructions will be carried in this list until six months after the issuance of the sectional charts depicting the obstruction data and then deleted.

This list covers recent obstructions (television tower, smoke stacks, etc) which are 500 feet or more above the ground. It will be carried in the Airman's Guide at frequent intervals. Newly added or changed information will be indicated by arrows. Towers under construction are carried in Notam section until completed.

REVISIONS TO STANDARD INSTRUMENT APPROACH PROCEDURES

Bearings, headings, courses & radials are magnetic. Elevations & altitudes are in feet MSL. Ceilings are in feet above airport elevation. Distances are in nautical miles unless otherwise indicated, except visibilities which are in statute miles.

STANDARD INSTRUMENT APPROACH PROCEDURE—TYPE ADF

If an instrument approach procedure of the above type is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure for such airport authorized by the Administrator of the FAA. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

TRANSITION				CEILING AND VISIBILITY MINIMUMS			
From	To	Course and Distance	Minimum Altitude	Condition	Two Engine or Less: 65 Knots or Less	Two Engine or Less: More Than 65 Knots	More Than Two Engine, More Than 65 Knots
